

JEWELL-RIDDLE CO. AWARDED PEACE INSTITUTE CONTRACT

Sanford Contractors Now Occupied Constructing New Buildings Here on Campus

A contract for the construction of a new library and dormitory at Peace Institute was recently given to the Jewell-Riddle Co., of Sanford, N. C., contractors for the building now under construction at State College.

The new dormitory will provide living quarters for fifty additional students, and will have classrooms on the first floor. The new library, which is to be named the Burwell Memorial Library, will also contain a study hall on the first floor.

Specifications and plans for the new structures were drawn by Atwood & Nash, of Chapel Hill and Raleigh. The architecture of the new buildings will be the same as that of the main building. The library will occupy a position corresponding to the chapel with reference to the main building. The dormitory is to be to the east of the library. In time there is to be added a west dormitory on the west side of the main building and chapel.

The building program resulted from the money raised in the late drive to increase the size of the school.

The old frame studio and science building have been moved somewhat to the rear, and work will begin on the new buildings at once. They are to be completed by September of this year.

Soph—Who are your new class officers?

Frosh—I do not know.

Soph—Didn't you go to the class meeting?

Frosh—No; they did not invite me.

Sixth Dormitory Students Organize "More Study" Club

The students on the third floor of sixth dormitory are planning to organize a "More Study" club in the near future.

The plans for this club are only tentative and will be completed soon. The purpose of this club is to create an atmosphere that will be conducive to study. According to the present plans the study hours will probably be from 7:30 until 10:30 o'clock.

In the past, and as it is now, there has been no definite time set aside to study. At the present time the only way one can study is to lock his door and stay in his room.

There is a great tendency for the boys to get together and hold "Bull Sessions" for at least an hour, and sometimes longer. "Bull Sessions" are all right at the proper time, but at night students should study, and consequently, "Bull Sessions" should be omitted. It is impossible to study in an environment where there is some kind of a noise going on at the same time one is trying to study.

If this system works as planned, it probably will spread to other dormitories on the campus.

There was a fearful crash as the train struck the car. A few seconds later Mr. and Mrs. Pickens crawled out of the wreckage. Mrs. Pickens opened her mouth to say something, but her husband stopped her. "Never mind talking!" he snapped. "I got my end of the car across. You were driving the back seat and if you let it get hit it's no fault of mine!"

Boulah Layne (teaching Sunday school)—Now, children, when you put your collection in the plate, I want each of you to say a verse.

Little Johnnie (after much deep thought)—A fool and his money are soon parted.

Fake Radio Tells Students State Won S. C. Contest

(Continued from page 1)

satisfactory. One fellow went out to collect his bet after the game! The next morning all were quite sure that the newspapers had made a gross error—that State College had won the game.

"I can't understand how the papers made such a big mistake," said one of the victims. "I heard the game from the court."

But it all happened in this manner:

In South dormitory at N. C. State College there is a young electrical wizard in the form of R. C. Kirk, a freshman in the electrical school. Kirk's room resembles a mental picture of the late Steinmetz's laboratory. He has radios, wireless, motors, batteries, telephones—er, what have you?

State won the first game in the series with South Carolina Wednesday night, and the next night Kirk had an inspiration—he conceived a perfect hoax!

He rigged up a telephone transmitter in the next room, running the wire under the doors into his room, through his radio set to the speaker. The assistance of W. M. Klutz, a sophomore in the electrical school, was called upon. Kirk and the "victims" assembled in Kirk's room, waiting for the game to start. Klutz and those "in the know" assembled next door.

Everything worked out smoothly. Klutz proved himself a good radio announcer and reporter, but his memory failed him. Several times he forgot the score and "held up the game" while he figured it out. Then he lost the paper on which Kirk had written the call letters and wave length and frequency in kilocycles and in the middle of the game had to substitute some of his own, but no one knew the difference.

The operators became as enthusiastic as the victims. Freshman Herbst, with tears in his eyes, begged Klutz to "let" State make two more goals.

In the absence of Gene Austin, several of his records, played on a portable phonograph, performed that part of the program between quarters.

Yesterday—Mother's little pet. Today—Mother's little petter.

Prof.—What color is best for a bride? Stude—I would prefer a white one.

Gauntlet Abolished Here By Student Body Vote

(Continued from page 1)

officers were always willing to follow the wishes of the student body. President Tucker concluded his talk by inviting open discussion upon the matter of abolishing the gauntlet, but refused to make known his personal feelings regarding the matter.

C. E. Loman was the first to take the floor. He argued for retaining the gauntlet upon disciplinary grounds, contending that the freshmen were "now about to take the school."

At this point of the discussion A. Parker rose to the floor and compared the running of freshmen through the gauntlet with the whipping of state convicts, and pointed out that all the states in the Union had passed laws against the whipping of prisoners. He concluded by asking whether or not State College enjoyed a higher civilization than a penitentiary.

This speech brought applause from the assembly. At this point H. H. Jobe jumped to his feet and continued where Parker had left off.

The orator of the evening was B. J. Kasten, who made Jobe the object of his attack. Things were now getting interesting.

Had "not Loman at this point jumped to his feet with a motion, things might have become hilarious. Loman's motion to let the freshmen decide themselves whether or not the gauntlet should be abolished was killed.

The opposition, sensing the sentiment of the majority, came forward with a motion to have the final voting postponed until a later date. But this motion, put into the form of a vote, was likewise killed. Everyone was persistent in his demand for an immediate showdown.

The meeting was concluded by 104 persons voting for abolition of the gauntlet against 60 for its retention.

Short Course in Poultry Terminated With Contest

(Continued from page 1)

by the men of the department and by Mr. Ricker of the Division of Marketing. The course had trips planned to different commercial plants near here and to the hatchery at Cary.

Every phase of poultry was discussed in the course. Not only were the different subjects lectured on, but questions from every angle were brought up and discussed.

This course not only gave information to the men and women attending the course, but was a help to the students that are specializing in poultry. The students were welcome at all meetings.

The students of the course organized a North Carolina Poultry Association while here. This association will be of benefit to the poultry producers of the state in marketing and solving their poultry problems.

The short course will be given next year in November instead of January, as in the past. The poultrymen seemed to think it would be much better then because they are starting hatching then, and, too, the weather will be more suitable.

Nell Battle Lewis To Speak Here Wednesday

(Continued from page 1)

est in literature and the stimulation of active interest on the part of the students in literary work.

Miss Lewis is a native North Carolinian; and is one of the foremost women of the state. She is a prominent figure in the North Carolina division of the Woman's Club, and is a leader in the state division of the League of Women Voters, being corresponding secretary of the latter organization. Miss Lewis is also a noted speaker.

The noted columnist and student of literature is well able to handle the subject which she chose for her address. Her column, "Incidentally," which appears each week in the Sunday News and Observer, has won for her much favorable comment and given her the enviable title of leading columnist of the state.

In her address Miss Lewis will deal with the rise of southern literature from the purely creative to the more critical type; and of the southern writers rising and taking their places alongside the literary geniuses of the North and the rest of the world.

The Brooks Literature Club, under whose auspices Miss Lewis will deliver her lecture, is endeavoring to present to the student body as often as possible some good speaker to discuss some phase of literary endeavor. During the fall term Dr. Franklin P. Gaines, noted educator and president of Wake Forest College, spoke to the student assembly under the auspices of the Brooks Literature Club on the subject of "Poetry."

The club considers itself very fortunate in having secured Miss Lewis for the address which she is to give. The student body and townspeople are urged to come out and hear this noted speaker.

"Did you get rid of any moths with those moth-balls you bought?" "No; I tried for five hours, but I could not hit a one."

Coronado blazed the trail

As explorer and discoverer in the great southwest, Coronado pioneered a trail which telephone lines now traverse. To project and construct these lines across plain and desert and over mountain range was also the work of pioneers, men not afraid to grapple with the frontiers either

of geography or of scientific knowledge. Men of the Bell system have penetrated through trackless problems of research, of manufacture, of telephone operation and of management. They purpose to continue their advance, all in the interest of better service to America.

"OUR PIONEERING WORK HAS JUST BEGUN"

It's a College Trained Pen!

More Students Use It Than Any Other Kind—and if you paid double you couldn't improve on it

Want a pen for lifelong use?—\$7 buys it; \$5, if you want a smaller size. Because of Parker's Non-Breakable Permanite Barrels these pens have been thrown from airplanes 3,000 feet aloft without damage. Want ease of writing?—Parker Duofold's famous Pressureless Touch, due to a fine ink channel ground between the prongs of the point (bringing capillary attraction to the aid of gravity feed) is greatest writing improvement in years. And Permanite, while Non-Breakable, makes Duofolds 28% lighter in weight than when made with rubber as formerly. Why do most college students use it?—try it yourself and know. 5 flashing colors. 3 sizes for men and women. Six graduated points—one to fit your hand exactly. Look for imprint, "Geo. S. Parker" on each pen. Pencils, too, in colors to match pens. See a Parker dealer now.

Cause of Recent Explosion Advanced by L. L. Vaughan
(Continued from page 1)

it expanded it could not get out through the faucets or could not go back into the cold water line, therefore the pressure was increased. By increasing the pressure on a condensed volume of water the boiling point was increased. By this means the water became super-heated before boiling. It is possible that the water may have reached the temperature of 300 or 400 degrees. When the volume of super-heated water became great enough to burst the boiler it sheared the rivets off the bottom, allowing the super-heated water to escape. The boiler being in a small pit, and this water, heated to a temperature of three or four hundred degrees, being suddenly reduced to atmospheric pressure, which would produce 1,600 to 1,700 times the original volume of steam, caused the boiler to be hurled upward.

The boiler was thrown through the first and second floors and then fell back to the basement.

The foundation was completely torn out on three sides, except for the pillars that support the house. The porch floors and the floors inside were lifted upward. Many of the windows were shattered and the wall of the back porch was pushed outward.

A man was seated in the room through which the boiler passed, but fortunately escaped serious injury. No one else was in the building when the accident occurred.

CAROLINA QUINTS WIN DOUBLE BILL

Terrors Lose One To Heels and the Freshmen Another

More Trained Quint Routs State 31-21 in Contest

MONITES DROP FIRST CONTEST OF YEAR 33-19

ason Stars for State in Thrilling Second-half Spurt, Aided by Haar and Young; Morris and Dodderer Star for Carolina; Referee Subjected to the Usual Hoops.

The University of North Carolina Heels and their freshmen brothers the Tar Babies, invaded Frank Simpson gymnasium Wednesday and carried off both pieces of the pie in the form of a 31-21 win forarsity and a 33-19 win for the men.

The variety contest got off to a start along the lines of scoring, it was not until five minutes had played that a field goal was made. Pursner, Carolina, broke the ice with a free throw. Goodfellow popped in one foul goal to even the count, and a little later McDowall one point, giving State a 2-1 lead. Dodderer made the first field goal and Carolina was in the lead. Young scored a field goal to tie the lead for State. This was the last time State was in the lead during the contest.

From that time on Carolina's rush victory was unchallenged until the end of the first half, when they were leading 20-8. The Terrors were faced with a 12-2 lead in the second half, and the Tech scoring machine got going and scored eleven points while Heels were netting a single field goal. With only four minutes left to the Heels were leading 25-21. Heels took time out and got into action by scoring three goals to end the contest with a point lead.

Johnson, State, led the second half comeback for the Techs and was supported by Haar and Young, at forward and center. Young was placed center after Goodwin went out on a foul and had been replaced by Owen. Young went in at center, giving State a fiercer and faster team. Johnson picked up the best game for the Techs, on the offensive and the defensive.

The Carolina passing game was the star of the contest throughout. It got the good passing that got the Tar around the tight-guarding Techs the first half. Mackney and Morris, Carolina, were the high scorers of the game with 7 points each. Haar and Johnson, State, were on their heels with 6 points each. Dodderer, Carolina, had 6 points, also. All the Tar men scored, and only Owens did score for State.

Referee Park came in for a lot of "singing" at the game. He was doing as well as any one official can do in such a fast game. The Tech officials were well pleased with the way he made in the contest. Sermon's Little Terrors were even in the class with the Carolina Fresh, and as a result the best game was won.

ABOUT THE GYMNASIUM

The Argument

It has been called to the attention of the writer, in writing this instance, by students and members of the faculty, that the gymnasium is not what it ought to be.

The first item of the argument is the swimming pool. For the past several months there has not been a gallon of water in the handsome white-tiled natatorium, covered completely by a glass skylight. Of what interest is it to the students that it is 75 feet long and 25 feet wide, and with sufficient room for spectators? There was turned into this department a scathing student-forum article asking if it was some fault of the equipment. The student writer says that the pool is kept open all summer for outsiders and then kept closed during the regular session. The students are required to pay an athletic fee. Maintenance of the swimming pool should, if it does not, come under this fee.

Another item is the fact that at some times there is absolutely no cold water in the gymnasium for the use of those who would take a bath after exercising, and then at times it is all cold. Why is this? The writer has on several occasions nearly burned his mouth trying to get a drink at the fountain.

There is another thing we would like to gripe about, and that is those lockers. At times there is an obstacle that prevents students from opening their lockers. The combination locks are continually getting out of order.

What is the matter? Is it the lack of funds that hinders the Athletic Department in making the necessary repairs? Does it take all the money to keep the athletic teams running? The students would appreciate it very much if something could be done towards bettering the situation.

It is not the policy of this department to criticize without some justification.

BASEBALL PRACTICE FOR '28 TEAM GETS STARTED

Thirty Candidates Work Out On Riddick Field In Early Start

Once more the sound of the horsehide on the ash is heard coming from the vicinity of Riddick Field. It is so, for Coach C. G. (Chick) Doak has his 1928 Tech baseball candidates out at work.

For nearly two weeks now they have been doing the daily dozen out on the local field. The thirty or more candidates who are out have been showing up good in practice, and all indications now point to a sweeping baseball team.

Up to the first of the week Coach Doak devoted all his time to batting practice. Monday afternoon the outfielders and the infielders were given a workout for the first time.

Every day the weather permits the candidates are on the field for practice, but when bad weather comes around Coach Doak gathers the men into the gymnasium for practice. At other times Coach Doak holds meetings to discuss fundamentals, etc.

The 1928 baseball schedule is very stiff, for there are fourteen Southern Conference games; also games with Wake Forest, Duke, Davidson, and Princeton. The season's opening game is with Lenoir-Rhyne on March 31 at Raleigh on Riddick Field (unless the management decides to play it down town).

reason, but the students have raised Cain for the past several months about conditions. When it comes to the professors themselves doing a little scolding it is high time that something is done about the situation.

The Reply

Mr. Brower announced Tuesday that a complete new set of filtering material had been recently ordered. This will be installed as soon as it is received. The filter pumps will kill the germs by chlorination, but does not remove the dirt. This fault will be remedied as soon as the material is received.

The fact about the hot water running in the drinking fountain is that the city water pressure is not at all times constant and there had to be installed a pump. This pump sometimes forces the hot water back into the cold water mains. This may be remedied by the use of a check valve. This valve will permit the water to run only one way, and will be installed as soon as possible, if it has not already been installed.

GREEN TERRORS DOWN CHARLOTTE HIGH 36-20

Gammon, Flashy State Forward, High Scorer With Sixteen Points

The N. C. State College freshman basketball team continued its winning streak here last Friday night in the Frank Thompson gymnasium by handily defeating Charlotte High School 36 to 20.

Wright, Techlet captain, started the ball rolling, and his teammates, Elliott, Thompson and Gammon, added ten more before the first quarter of eight minutes ended. While the Techlets were piling up the dozen points the State guards were working perfectly and the visiting Charlotte High team was held scoreless. Reid took two free shots at the basket, but missed, and this was the only chance the visitors had to score, except by wild throws at the goal. In the second period the Charlotte team broke the scoring ice when Hutchinson scored a pretty shot from the side. A foul shot gave the visitors one more point. The Charlotte team made four field goals and three free shots good in the second quarter, while the State fresh were making six points. State started the second half off with a whirlwind attack and scored six points in succession, and at the end of the third quarter was leading with the score 30-15. Gammon, flashy State forward, was the high scorer of the contest with 16 points to his credit, and Hutchinson of Charlotte was second with 8. Besides being the high scorer, Gammon was the outstanding player on either team. Hutchinson put up a good game for the losers.

TABELL'S WOLFPACK OUT FOR PRACTICES

First Spring Practice Held on First Day of Month With Good Results

To the uninitiated the sound of the boot against the pigskin would make him think Coach Miller's intramural men were out having a round or two of soccer, but in reality Coach Butch Slaughter is taking the variety grid candidates in hand for their spring training until Coach Tebell gets from under the basketball duty.

Approximately 45 men were asked to report for duty the first day, which was Wednesday. A few over twenty-five reported. There are yet some who have not yet turned their names and bodies over to the officials for the spring training. Outen is out for baseball, but someone said he went out and tried his hand at the pigskin Thursday. The others who are out for wrestling and basketball will report as soon as possible.

Misfortune struck the camp the second day. Crowson, one of the reserve men from last year, cracked his shoulder bone in wrestling practice, which will keep him out of spring football practice until the very last week or so.

"We ran signals the first time we tried it," was the remark of one of the varsity players last night in the "mop-up." That is where the advantage of spring practice comes in, explained someone.

TEN CASES OF MEASLES REPORTED AT INFIRMARY

There are now ten cases of measles in the infirmary. Some of these cases are probably due to the victims being exposed to the disease during the Christmas holidays or week-end visits.

It is reported that about twelve hundred cases were found raging throughout the State. Along with the ten cases of measles in the infirmary, two cases of mumps were reported. Most of the patients are getting along nicely and expecting to be out soon to resume their studies.

"It's toasted" No Throat Irritation-No Cough.

The scenic effects in "Blood Will Tell," a production starring Buck Jones, are unusually beautiful. It was taken around one of the most thrilling and romantic towns in the West—Sonora, California. This picture opens a two-day engagement at the Superba Theatre Friday.

In the days of '49, with prospectors, miners, gamblers, thieves, saloons, and dance halls, Sonora was the cesspool of humanity. Once a gathering place for thousands, today it is a law-abiding community, sheltering the descendants of the early days that number a paltry hundred.

"Golfer's Elbow" is the latest hit to afflict William Haines.

He says it's a vocational disease like "Housemaid's Knee"—in fact, with other geographical differences the latter ailment is what it would probably be.

Haines, who had never played golf, had to make himself an expert almost overnight for his new Metro-Goldwyn-Mayer starring vehicle, "Spring Fever," coming to the Superba Theatre Wednesday and Thursday.

The new picture is a comedy romance of the golf course, directed by Edward Sedgwick. The cast includes Joan Crawford, Eileen Percy, George Fawcett, Bert Woodruff, Lee Morgan, George K. Arthur, and others of note.

For smiles and chuckles and a polite gasp or two, we heartily recommend Betty Compton in "Say It With Diamonds," which opens at the Superba Monday and Tuesday.

You will be pleasantly shocked, too, when Earl Williams, in the role of the dotting husband, so far forgets himself as to measure a lady's ankle for an anklet. Or, if you are quite modern, you will be shocked, on the other hand, to learn that a wife in this day and age should object to such an indulgence.

Every time and in every way they make them funnier and funnier. Speaking of Wallace Beery, Raymond Hatton, and comedies.

In "Wife Savers," the Paramount comedy that comes to the State Theatre next Wednesday and Thursday, Beery and Hatton are the two funniest individuals that ever tried out a

yodel or made love to a girl in the Swiss Alps. The duel scene where Beery and Hatton do spectacular but bloodless battle upon the latter's return to the village to reclaim his girl, is one of the funniest sequences ever filmed.

An exceptionally capable cast, including Ford Sterling, Zasu Pitts, Tom Kennedy, Sally Blane, August Tolaire, and George Harvey, support the two comedy kings in this laugh producer.

What is generally predicted to be the fastest moving and most sophisticated farce-comedy of the season has been booked to be shown at the State Theatre, along with five excellent acts of Keith Vaudeville, next Monday and Tuesday. It is the Universal-Jewel production, "The Irresistible Lover," co-starring Lois Moran and Norman Kerry, and according to advance information, the State will be the scene of many a laugh during the run.

Survey Here Shows Student Gov't To Be Satisfactory

(Continued from page 1)

Professor Anderson says that the low grade submitted by the seniors may have two interpretations, due to the fact that some who are critical of student government, on the basis of the declining grades given by the classes, think that the opinion of the sophomore. Professor Anderson interprets that this indicates a greater demand on the part of the senior or denotes an improvement in the system, since the senior has seen the system in operation for three years, and poor operation for the first two or three years may have been the basis for his low evaluation.

Table II shows the averages on the system by schools. The Education students grade it 90.3, the highest average of any group; Science and Business next, with 84.3; Engineering, 84.0; Textile, 80.5, and Agriculture, 79.6.

According to Mr. Anderson, an interpretation of these averages would seem to suggest that as far as schools are concerned, the system is operating best among Education students and poorest in the Textile and Agriculture schools. It is true that the system is one involving the whole college group, but it is also true that the students get their experiences with the system as members of classes largely limited to students enrolled in the same school.

If one considers only one element, the elimination of cheating, the same conclusion may be drawn, and here the student's experience is largely confined to his own school.

But another interpretation is perfectly possible. The low estimate of the system in Agriculture and Textile may mean that the students of these schools have higher standards than in the other schools, and that the Education student does not expect nearly as much from student government as do the other groups.

Total for four Above Items	79.6	90.3	84.0	84.3	80.5	83.6
Respect for System	84.1	87.7	83.2	84.5	77.5	83.6

Professor Anderson drew the following conclusions from the survey:

1. Student government as the governmental system at North Carolina State College, in the opinion of the student body, is operating fairly efficiently.
2. The student body as a whole has

5. Seniors grade the system lower than sophomores, which may mean either improvement in the system or growing inefficiency.

6. Either student government operates less efficiently in the schools of Agriculture and Textiles or the students of these schools demand more from the system than the students of the other schools.

Incubator Causes Nightly Appearance Of Mysterious Light

For several weeks students have been puzzled about a light which goes off and on at night in the west side of Patterson Hall. Passers-by will see the light flash on and off, then mysteriously appear again. At first some student advanced the idea that Dr. Wells was doing some laboratory work, but this theory was soon abandoned when it was found that the light appeared every night and could be seen off and on at all times.

After interviewing Professor Lehman it was learned that a hand-made incubator was the cause of this mysterious light. He stated that he was germinating some beans and peas in the incubator for the purpose of experimenting with mildews. This incubator, nothing more than a glass cage, is heated by electric light bulbs, and as soon as the temperature drops

below that required the thermostat makes contact and causes current to flow through a coil that by magnetism closes a novel circuit breaker of mercury and the lights are automatically turned on.

When the temperature increases to the right degree the thermostat, which is made of two metals having different coefficients of expansion, breaks the circuit and the circuit breaker is opened. This operation is repeated automatically many times throughout the night.

Film Illustrating Rayon Manufacture Is Presented Here

The Textile School of North Carolina State College, on Monday night, presented the "Romance of Rayon," a film made by the Viscose Company. This film illustrates the various processes in the manufacture of rayon.

Between the reels Professor Grimshaw made a brief talk on the growing importance of rayon. He also gave a few figures showing the yearly output of the leading manufacturers of the fibre.

The Viscose Company has donated to the Textile School an exhibit showing the material in all of its processes from the wood block to the finished yarn. This was placed on exhibition

immediately after the film was shown, together with a number of rayon fabrics designed and woven by students in the Textile School.

About three hundred people saw the film. Among this number were the home economics classes from Meredith and Saint Mary's. Also, mill men from Raleigh and surrounding towns.

PLANNING BOXING CLUB HERE TO DEVELOP INTO INTERDORMITORY SPORT

A boxing club is likely to be organized on the campus. A handful of students in Seventh dormitory are enthusiastically working to organize a club for students interested in boxing, or those who are anxious to promote it.

At the beginning of the second term Mr. Miller mentioned the idea

of having interdormitory boxing, but with the lack of interest and backing this fell through, but it aroused interest in a few to form a boxing club.

The purpose of this club, other than boxing among the students here, is to bring teams from other schools and hold bouts here, also make trips to other schools. This boxing team will not represent the school, but go as a team from the boxing club from State College.

There have been around fifteen present at the few meetings held. The meetings are now held on Monday, Wednesday, and Friday nights at 8 o'clock.

Massey—Why was it so hard for Paul Revere to complete his ride?

Fain—Because he passed lots of houses where they had forgotten to pull down the shades.

SOCIAL ACTIVITIES

Date of Saints' Dance Changed
The Saints' Club have changed the date of their dance, to be given in the Frank Thompson gymnasium, from the 18th of February to the 11th of February.

Service League Cabaret
The Service League of Christ Church entertained Monday evening at a cabaret with many State College students present, including the co-eds.

The parish house hall was decorated in the form of a bewildering cabaret with the halls arranged so as to present a sylvan scene. Pine and evergreens were used in profusion with a pale moon at one hall,

Switches Back to Favorite Tobacco

Peoria, Ill.
Aug. 26, 1926
Messrs. Larus & Bro. Co.
Richmond, Va.

Dear Sirs:
Just a confession and an appreciation. A number of years ago I was a user of your Edgeworth smoking tobacco. But like some others, perhaps, I was led by alluring advertisements to change. A few days ago I went into a drug store to get some tobacco, and on the case was the familiar can of Edgeworth. I bought it and since then I have enjoyed old-time comfort.

So my confession is that I made a mistake in changing to other brands, and my appreciation is such that Edgeworth will be my Smoke Pal while life lasts, which may not be long, for I have passed my "three score years and ten."

Very truly yours,
(signed) E. P. Fishburn

Extra High Grade Smoking Tobacco

and with a rose arbor, artistically arranged, completing a most pleasing effect to the guests.

During the evening, as the guests dined at the tables and mingled informally and danced and swayed to and fro, the chorus composed of beauty and talent gave a number of specialty dances, in which the Varsity Drag was featured. A number of other dances and song hits were rendered by leading members.

Rev. Stone J. Crane, southeastern inspector of the Phi Pi Phi fraternity, spent a few days with the local chapter at their home on 10 Enterprise Street this week and last.

E. B. Armstrong and Tracey Smith are visiting their parents in Gastonia, N. C.

Charlie Seal will motor to Smithfield tonight.

Bob Fletcher will accompany "Jimmie" Johnson to his home in Rocky Mount today.

Bruce Gorham is visiting N.C.C.W. this week-end.

Frank Ulmer is spending a few days with his parents in Washington, N. C.

Allen Smith is a visitor at Salem College, in Winston-Salem, N. C.

F. G. Whitner has resigned from the London Shop in order to accept a position with the National City Bank in New York.

George Crisp is visiting fraternity brothers at the Kappa Sigma house.

"Billie" Lovell is spending the week-end at his home in Greensboro, N. C.

"FLYING COCKS" PROHIBITED TRIP BY FACULTY COUNCIL

The "Flying Cocks," representing the Poultry Science basketball team, have abandoned their western trip which they had planned for the first part of February.

Coach Armstrong announced to the players that due to a ruling of the Faculty Council none of the players would be excused from classes. This would mean a great loss of points to the players, should they go.

FORMER WOLFPACK MENTOR MENTIONED IN LIBERTY

Buck Shaw, Head Coach in 1924, Referred To In Magazine Article

Coach Lawrence I. ("Buck") Shaw, former head football coach at this college, was among those Rockne-trained coaches mentioned in a feature article in the Liberty magazine of January 21.

The article is written by Francis Wallace and has as its theme the favoritism shown the Notre Dame players by other colleges searching for coaches or assistant coaches. The article contains references to a great many of Rockne's former players, and has pictures of thirteen of the best known of them, including "Buck" Shaw, now head coach at the University of Nevada.

Following Harry Hartsell's resignation, Shaw came to State College in the fall of 1924, as head coach in football and track. Previous to that time he had been assistant coach at the University of Nevada.

After coaching for one year at State College, Shaw returned to Nevada as head coach. G. K. Tebell, then assistant coach here, was made head coach of football and basketball.

The article also has the picture of "Chuck" Collins, now head football coach at Carolina, and mentions William Cerny, who is assistant coach at Carolina.

Other southern coaches mentioned are Mehre and Crowley, University of Georgia, and D. Miller of Georgia Tech.

R.O.T.C. Red Flag Flies From Top of Watauga Dorm.

The Red Flag, as it is known to the R. O. T. C. students, has been promoted to a higher rank. Tuesday night, while everybody was in deep slumber, the Red Flag left, accompanied by an unknown body, its humble position on the water fountain and ascended to lofty position on top of Watauga Dormitory.

On rainy days the Red Flag is placed on the water fountain in front of the dining hall to inform the R. O. T. C. students that there will be no drill for that day. As it was raining Tuesday, the flag was placed on the fountain accordingly, but for some reason it was left there during the night. As some noble upholder of the military law passed by he conceived the idea that the emblem of militarism should fly from higher ground. Now the rainy-day emblem of the military department waves its authority high above everything on the campus except the American flag, which is mounted higher on Holladay Hall.

SELF-HELP CLUB PLANS TO BECOME POWERFUL CAMPUS ORGANIZATION

"We shall win the place upon the campus that we are worthy of," was the spirit of fifteen or more self-help men who met in the Y. M. C. A. Monday night to reorganize its weak organization into one of real power.

Definite requirements were set down by the club, which members must meet. They were: first, a man must be a gentleman; second, he must have a good character; third, he must be congenial and sincere; fourth, he must average 75 on his college work; fifth, he must be earning part of his expenses while in college during the college semester.

The club adopted as its motto "Service, Fidelity, and Friendship." Pins for the club were considered and a very beautiful design adopted. Joe Ellis submitted the design for the pin, as well as suggested that the motto be adopted.

The outlook for the Self-Help Club is bright, according to the president, who says that he has faith in its purpose and success.

STUDENTS OPEN PHOTOGRAPH GALLERY IN SOUTH DORMITORY

Photo finishing and enlarging is now done on the campus.

A. G. Bullard, sophomore in vocational agriculture, has announced that he has started such a service in his room, 320 South Dormitory.

Statements from several fellows for whom Mr. Bullard has already done work indicate that Bullard's photo finishing and enlarging is high grade and satisfactory.

Circulars and specimens have been distributed, and the circulars with the heading, "Have Your Beauty Struck," giving prices which are presumably below the standard rates, and urging students to give him a trial.

Bullard says he feels that by doing first-class work and giving service at lower prices he will succeed. Business was very good this first week, he says.

W. F. Sheffield and Fred Sloan were in Rocky Mount Thursday.

Diner—Say, waiter, I'll have lamb chops with potatoes, and have the chops lean.
Waiter—Which way, sir?

Discussion Leaders Form 'Y' Promotion Force and Cabinet

The group of men who led the freshman discussion groups last fall have organized themselves into a Y. M. C. A. Promotion Force, to assist the cabinet in carrying on the work of the "Y" for the remainder of the year. This group meets regularly each Monday night at 6:30, and extends an open invitation to all who are interested in helping with this work to meet with them.

The Y. M. C. A. is not putting on a Bible study program in the dormitories this term, as usual. The new plan calls for a series of addresses to be given on Wednesday nights during the coming weeks by prominent men from various parts of the state. These addresses will be preceded by short musical programs and followed by open forum discussions. The series will probably begin Wednesday, February 8, and continue for some time. The newly organized promotion force will assume a large part of the responsibility for putting over these

meetings and making a success of them. These men are not only planning to work, but are also hoping to take advantage of their meetings to make a further study of some of the questions raised by Mr. Eddy while here. They

will begin next Monday night a study of Mr. Eddy's book, "Facing the Crisis." This will continue for a period of eight or ten weeks. Any person interested in this study is invited to meet in the Leazar Society hall Monday night at 6:30.

Quality sent P.A. to the head of the class

YEARS ago, P.A. showed a clean pair of heels to the field of smoking-tobaccos. It has maintained its lead ever since, putting more distance behind it every year. There must be a reason why P.A. is the world's largest-selling brand.

There is! Open a tidy red tin and get a full breath of that class-by-itself fragrance. Then tamp a load into the bowl of your pipe and light up. The first pull tells you why more men smoke P.A. than any other brand. Cool and smooth and mellow and mild—not for one pipe-load, but always. Try this long-burning tobacco, Fellows. You'll say so!

PRINCE ALBERT

—the national joy smoke!

If you vibrate to quality, you'll gravitate to P.A.
