## MAJOR EARLY WILL REMAIN AT STATE FOR ANOTHER YEAR

### War Department Revokes Recent Order for His Transfer

#### HAS MADE GOOD RECORD IN 3 YEARS STAY HERE

#### Expresses His Gratification at Remaining at State College—Had Been Ordered to Report to Historical Section of the United States Army.

The recent order of the United States Army transferring Major C. C. Early, commandant of the Reserve Officers' Training Corps of State College, to the historical section of the Army with location elsewhere, has been revoked and Major Early will be allowed to remain at the college, according to information received by General Albert L. Cox Monday in a personal letter from General C. P. Summerall, Chief of Staff of the United States Army.

Major Early is completing his third year as Professor of Military Science and Tactics at State College, where he has made a notable record and has won a high place for himself not only in the regard of the faculty and students of the college, but among the people of the city as well.

As commander of the American Legion of North Carolina, General Cox wrote to General Summerall expressing high appreciation for the work of Major Early at State College and deep regret at the orders transferring him to another section of the Army. It was in reply to General Cox's letter that General Summerall wrote conveying the news that the order had been revoked and that Major Early would be allowed to remain at the college. The news brought much rejoicing at the college and Major Early expressed gratification at remaining.

## N. C. STATE HAS THREE OF NATIONAL B. P. K. OFFICERS

### Greaves-Walker, Hall, and Stafford Help Lead Ceramic Fraternity For Next Period

The national convention of Beta Pi Kappa, ceramic fraternity, was held last week in Atlantic City. At this meeting a chapter of the fraternity was installed at Alfred University, the New York State School of Ceramics. This chapter will be known as the New York chapter of Beta Pi Kappa.

At this meeting the national officers for the year were elected. They are: Prof. A. F. Greaves-Walker, grand president; Dr. Charles F. Binns, grand vice-president; D. B. Hall, grand secretary; F. P. Williams, grand treasurer; and W. L. Stafford, grand historian. Of the five national officers, State College has three of them. This should be considered a great honor for State, as Beta Pi Kappa is the leading ceramic fraternity in the country.

Recently Brigadier-General Edward Orton, Jr., was elected to membership in the North Carolina chapter of the fraternity. Dr. Orton was formerly dean of ceramics at Ohio State, and is the father of ceramics in the United States.

Dr. Binns, of Alfred, shares with Dr. Orton the honor of being one of the first ceramists in the country. Dr. Binns was formerly the Royal Potter for the king of England. Shortly after coming to this country Dr. Binns became director of the New York State School of Ceramics, where he has been for over twenty-five years. Dr. Binns is one of the world's leading authorities on pottery, glasses, and enamels.

Professor Greaves-Walker founded Beta Pi Kappa at Ohio State in 1902. To him belongs much of the credit for the success that the fraternity has had. Professor Greaves-Walker has specialized on heavy clay products and has written quite extensively on plant construction and operation.

## Stephenson Tells College Boys How To Get Their Jobs

Fifty-three eager men were packed into Pullen Library society hall; they had not come to join the society, nor to admire the inspiring pictures of Greek or Roman speakers—these men had come to hear a shoulder to shoulder talk from Gilbert T. Stephenson, on the subject of "The College Man's First Job."

College men, the banker went on to explain, often want to advance faster than a business can absorb them. A fellow has college debts to pay, he may have a girl he wants to marry.

"Little things, men," he said, "may cause you to lose your chance to get a good job. Look at the way I wear this hat. It is a light gray felt hat at a forty-five degree angle on his head. There is a Bill Jones whom Mr. Stephenson knew that came into the bank asking for a job, but the hat that sat at so rakish an angle lost his chance to a great extent.

"When a man comes into my office," the bank head said, "there are several things I look for: the way he dresses, for one, because, if a man doesn't care about his personal appearance he can't care much for the business he wants a job with."

"I also notice his shoes. These also tell me something about what a man cares about himself. A man's hair must be combed neatly and his teeth white. He wants to make the kind of an impression that is favorable on his would-be employer."

Many hands strayed to the hair as Mr. Stephenson talked, and feet that weren't polished up properly were tucked away under the seats.

"When you apply for a job, don't spend your time writing long letters," was Mr. Stephenson's advice. "Go and see the man. How many of you men would marry a girl by correspondence? Not many—unless you were awful bad off for a girl."

"Don't be a hot-air artist and try to tell all about what you can do, but leave some for another time, and yet don't go to the other extreme and understate yourself—the frank, be correct, and your chance for a job will be much better."

## SECOND ISSUE OF ALUMNI NEWS MAKES APPEARANCE

The Alumni News, published bi-monthly by the North Carolina State College of Agriculture and Engineering, recently made its second appearance this year.

This issue gave the alumni a brief survey of the events that have happened on the campus in the past four months. A complete outline of the football season was given, with each individual coach and player getting a separate write-up. Basketball and wrestling prospects were discussed in general, giving the outcome of previous games and matches.

## Large Variety Is Seen By Reviewer in Jan. Wataugan

The January issue of The Wataugan contains quite a variety of contributions. Among the features are "The Fair-Skinned Indians," by Harvey O. Tucker; "The Bushmen," by H. E. Ellis, and "Nikita of the Africans," by W. V. C. Ellis. All of these evince a commendable study of history, ethnology, and geography.

"What I Think of Eddyism," by Miss Martha Andrews, also a feature article, is interesting as a frank questioning, by a student, of the enormous pretensions of a certain type of Y. M. C. A. orators, some of whom, unfortunately, pose as almost omniscient, and suggests a doubt of the wisdom of excusing students from class work to hear the opinions of such speakers expounded.

In the way of fiction we find "The Bear-Trap," by J. E. Moore; "When the Whistle Blew," by J. Byron Gardner, the story of a State College student who lost all ordinary consciousness while he was loafing on Fayetteville Street, in Raleigh, and remained in this helpless condition until he was restored to "normalcy" by the toot of the whistle for dinner; "In the Cellars of Chinatown," by A. Laurance Aydtlett, an account of a visit and an adventure, in a dream, in New York's Chinatown, in which

—Continued on page 2.

## AIM OF EDUCATION IS TOPIC OF TALK BY GORDON POTEAU

### Says Purpose Is To Discover Trends of Modern Life

#### SPEAKER ALSO STRESSES RELATIONSHIPS OF LIFE

#### States That Many Things Given In Classroom as Facts Merely Theories and "Hot Air"—Defines Three Important Trends of Modern Life.

"The purpose of an education should be to discover the relationships of life and to discover the trends of modern life, and God help us in the future if we do not discover these relationships and trends." These two sentences formed the keynote of the address which Dr. Gordon Poteau delivered to the student body Wednesday at noon in Pullen Hall. Dr. Poteau is a nephew of Dr. William Poteau and has recently returned from China, where he spent twelve years in educational work.

Dr. Poteau chose as his subject "The Purpose of an Education." In the beginning Dr. Poteau asked what college students were trying to do in four years of college life. He said that their purpose could not be the mere gathering of facts, because no man's life is long enough for him to even begin to know all the facts related to any one occupation or field of life. He also stated that many of the things handed out in the classroom as facts were not facts at all, but only theories and hot air.

"There are three important trends in modern life," said the speaker, "which have or should have a vital meaning to us. The first of these is the utilization of scientific techniques of vast sources of power which no other generation ever knew. The problem for us to solve is how best to use this power for the advancement of mankind.—Continued on page 2.

## UNITED FRUIT COMPANY HAS OPENINGS IN TROPICS

### Agriculture and Engineering Students Can Be Used on Plantations

Wonderful opportunities for work are offered to agriculture and engineering students of the present senior class by the United Fruit Company.

This work is in the tropics, and consists of growing bananas, sugar, cane, cocoa, and a number of miscellaneous tropical products. These operations are carried on in Cuba, Jamaica, Colombia, Panama, Costa Rica, Honduras, and Guatemala, where nearly 70,000 men are employed, and supervised largely by Americans.

The starting positions for the agricultural students are as timekeepers or assistant overseers on the farms, and the duties include supervision of farm labor, keeping farm records, etc.

In engineering the starting positions are usually as junior engineers on survey work, irrigation and drainage, railway and port work, and general construction.

All men should be single and expect to remain in the tropics for some time.

Promotion comes where the right spirit is shown, and, if a man keeps working promotions continue until he reaches an executive position.

## UNIVERSITY OF TEXAS OFFERS SCHOLARSHIPS; FELLOWSHIPS

The University of Texas is offering several scholarships and fellowships in agricultural economics to college seniors in 1928. The scholarships pay \$200 and the fellowships \$600.

Dr. G. W. Forster, head of Agricultural Economics at State College, has received a letter from V. P. Lee, of the University of Texas, concerning the matter. Mr. Lee expressed himself as being very glad to cooperate in encouraging such exchange of students.

## YATES' SIGNATURE FORGED TO LETTER ANSWERING TILLET

### Charlotte Lawyer Sends Apology To State Freshman

#### LETTER WAS PUBLISHED IN SEVERAL NEWSPAPERS

#### Was Poorly Written and Cast a Reflection On State College Seniors; Yates Denies Having Anything to Do With the Letter.

In a telegram received by J. A. Yates, freshman at this college, C. W. Tillet apologized for the publication of the letter in Tuesday's *News and Observer* and other leading newspapers of the state. The letter referred to was in answer to Tillet's article on "bumming" and was alleged to have been written by Yates, who stated that someone had forged his name to the letter and positively denies having anything to do with it.

Yates stated when interviewed that the first time he knew anything of the letter alleged to have been written by him was Monday morning when his attention was called to the appearance of the epistle in a Charlotte paper by one of his classmates. Young Yates says that he immediately returned to his room and wrote Mr. Tillet a night letter which read as follows: "Your article published in the Sunday *Charlotte Observer* containing a letter signed J. A. Yates. This letter has caused me considerable embarrassment. I am not a senior at State College, but a freshman. I wish you would kindly notify the newspapers that the letter published by them and signed by J. A. Yates was a forgery of my name. I hope we can adjust the matter so that I shall be relieved of this embarrassment."

The telegram received Wednesday by Yates reads as follows: "Letter received. Deeply regret some forged publication of letter and consequent embarrassment to you. Am writing explanation to *News and Observer* and other papers. Am sending original letter to friend in Raleigh, where you can have access to it with view of ascertaining who wrote it. Letter to follow."

Freshman Yates has no explanation to make as to how his name became a subject of forgery.

The letter alleged to have been written by Yates contained many grammatical errors and left the impression with the reading public that it was the work of a State College senior. The letter, along with a reply by Tillet, appeared in most of the leading newspapers of the state, and in his reply the Charlotte lawyer made some harsh criticisms of seniors.

As a result it aroused the indignation of the seniors at this institution where an investigation as to the writer of the letter was likely to take place when Yates carried the telegram from Tillet to some of the college authorities who are of the opinion that the freshman is entirely innocent of the charge.

## HOME ECONOMICS CLASS OF MEREDITH TO STUDY MEATS IN POLK HALL

The home economics class of Meredith College will meet in Polk Hall Thursday afternoon, February 16, for the purpose of making a detailed study of meats.

There will be a lecture and demonstration given on meats by Prof. R. E. Nance of the animal husbandry department. He will point out why the housewives should have a thorough knowledge of the essentials in the selection of good meats for the home table, why they should know the different retail cuts of the different meats, and how to buy meat economically.

There will be three classes of meats used for the demonstration: beef, lamb, and hog. They will be cut in the regular retail market style and a comparison of good and poor quality meats will be made.

Cooks of Colorado Agricultural College called in spring year and ask college men to eat proms.

## STEVENS TO SPEAK

John H. Stevens, designer and first chief engineer of the Panama Canal, will address the students of State College in the Y. M. C. A. on Monday, February 20, at 6:30 p.m. The address is under the auspices of the Engineers' Council and the combined technical societies of the campus.

Mr. Stevens is recognized as one of the world's foremost civil engineers and has recently been appointed on presidential commission to investigate Mississippi flood conditions and the sinking of the Submarine S-4.

While Mr. Stevens comes to State College especially to address engineering students, all students as well as the people of Raleigh are cordially invited to hear him.

## SHORT COURSES TO BE GIVEN BY CIVIL AND HIGHWAY ENG. DEPTS.

The departments of Civil and Highway Engineering are offering a short course in "The Use and Testing of Paving Materials" here in March. The course will be given in Winston Hall beginning March 6, and lasting four days. It has been arranged by Professor Harry Tucker, of the Department of Highway Engineering.

It will consist of lectures by specialists in the paving field and actual tests will be made in the laboratory of all materials used in street and highway work.

Lecturers will be secured from the engineering staffs of the North Carolina Highway Commission, Portland Cement Association, Asphalt Association, and the National Paving Brick Manufacturers' Association.

T. S. Johnson, of William C. Olsen Company, consulting engineers, will give the first lecture on "Contracts and Specifications."

## COOLIDGE ASKED TO SPEAK AT ELON COMMENCEMENT

Elon College, Feb. 17.—(CP)—President Coolidge has been invited to give the literary address on May 28th at the approaching commencement. Last summer President Harper took this matter up with President Coolidge and received a very cordial reply, stating that early in the new year a definite answer would be given.

Last week Senator Simmons of North Carolina was asked to interview the President personally and to present the college's invitation to give the literary address and, according to newspaper dispatches, President Coolidge has the matter under serious advisement.

## State College Waiter Killed By S. A. L. Train Early Tuesday Morn

William Ligon, 19-year-old Negro, was killed early last Tuesday morning by a Seaboard passenger train as he was walking the tracks from his home in Method to his work at State College.

Coroner L. M. Waring reported that the youth's body had been pitched 30 feet by the train, that his neck had been broken, and his skull crushed.

As far as the coroner could learn, no one saw the accident. Engineer L. L. Vaughn, running the train which is supposed to have killed Ligon, made no report of the tragedy to division headquarters, and though the coroner has not been able to get in touch with him yet, he believed that the engineer did not know his engine had run a man down.

The accident occurred near the Makepeace Lumber Company crossing, but the coroner is not of the opinion that Ligon was crossing the tracks when he was struck. He believes that the youth did not hear the train that killed him until too late, if at all.

Ligon waited on State College students in the college dining room. His body was taken to an undertaking establishment and later claimed by his family at Method.

## DEBATE HERE NEXT WEEK TO BE FIRST OF KIND IN N. C.

### State College Debaters To Appear Against Women Speakers

#### AYDLETT-BURROUGHS TO ARGUE IN UNIQUE MEET

#### Debate Will Be Against Virginia State Teachers' College; State Speakers Will Uphold Negative of Armed Force for Foreign Capital Question.

For the first time in the history of intercollegiate debating in North Carolina a decision contest will be held between men and women speakers here Friday night. The affirmative team, consisting of A. L. Aydtlett and H. H. Burroughs, will argue with the Virginia Teachers' College team in the Y auditorium at 8 o'clock. At the same time the State negative team will meet the affirmative of Virginia State Teachers' College in Farmville, Va. R. R. Pearson and E. W. Buchanan, of the negative, will meet the affirmative team of Virginia Polytechnic Institute Thursday night at Blacksburg.

The proposition used for these contests is: "Resolved, That the United States should cease to protect by armed force capital invested in foreign lands, except after a formal declaration of war." This question is of special interest at present because of the American policy in Nicaragua and China and the discussions being held by the Pan-American Conference at Havana, Cuba.

The Virginia State Teachers' College team, which will appear here, is composed of Louise S. McCormick and Alice Wiley. Miss McCormick is the most experienced and able debater ever trained at the Virginia college and was the leader of the team which met State in an open forum contest in—Continued on page 2.

## ANNOUNCEMENT REVISION OF ACCOUNTING COURSE HERE

### Furnishes Basis for Program of Newly Organized Accounting Fraternity

Announcement of the revision and enlargement of the Accounting course here has been made by Dean B. F. Brown, head of the School of Science and Business.

This revision and enlargement of the Accounting course of State College furnishes the basis for a progressive program for the local accounting fraternity at State College. The new plan provides for nine credits work in the sophomore year, using Kestler's system as the basis for study. Kestler's General Accounting is the most widely known system in the United States, and is used by a large number of our prominent northern colleges. Prof. C. B. Shulenberger, who is responsible for the establishment and teaching of this course at State College, is a pupil of Mr. Kestler.

The junior year under the new system will require eighteen credits of—Continued on page 2.

## STUDENT SUICIDES AT WAKE FOREST

Wake Forest, Feb. 17.—(CP)—Carl J. Salisbury, of Hamilton, Junior in Wake Forest College, met death by his own hand early yesterday morning, was the finding of a second examination by Dr. E. S. King of the medical faculty, it was learned here today.

Salisbury's body was found on the campus twenty minutes after he left his companions in a room. On his desk lay an empty potassium cyanide vial of the chemistry department. It was first thought that the young man had died from a heart attack.

**STATE FRESH CONTINUE CHAMPIONSHIP STRIDE**

**Beat Davidson Fresh By Large Score Wednesday Night; Boyette High Scorer**

The Little Terrors continued their championship march here Wednesday night by defeating the Davidson freshmen by the score of 37-24.

The visitors took the lead early in the game, but the Techlets were right on their heels and were soon in the lead. This lead was never endangered by the Kittens. Tech's yardage were leading by the score of 24-16 at half-time.

The State five opened up the second half with a bang, and with their center, Boyette, leading the attack scored 13 points while the Davidsons were getting eight. Boyette scored 10 of the 13 points in the second half.

Boyette was high scorer of the game with 16 points to his credit. McColl, Davidson, took off second honors in the scoring column with 11 points.

Davidson F. (24)	State F. (37)
McColl (11)	Gammon (8)
Forward	
Rusk (4)	Wright (2)
Forward	
McAllister (2)	Boyette (16)
Center	
Goodson (7)	Thompson (2)
Guard	
Procter	Elliott (5)
Guard	

Substitutions: Davidson, Overman, Marks, Wilson, Goodykoontz; State, Vorel, Sykes, A. Turner, Tucker, B. Turner, Furtado, H. Atkinson (4), J. Atkinson.

Referee, Doak (Guilford); umpire, Slaughter (Michigan); timer, Park (N. C. State).

**STATE FRESH BEAT BY DUKE GRAPPLERS 16-11**

**Three Falls Scored in Match; The State Team Gets One; Winston Team Next**

Tuesday afternoon, February 14, the N. C. State freshmen wrestling team went on the mat at the Frank Thompson gymnasium for their third meet, to be defeated by the strong Duke freshmen by a score of 16 to 11.

Three falls were scored, two of which went to Duke, the other being scored by Dameron, of State, who was wrestling his first match. Eason again set an example for his teammates by winning the bantam.

The State frosh will not go on the mat again for a meet until they tackle the Winston-Salem high school team in the "Camel City," March 2. The boys of the "Camel High" have had a team for the past three years and will offer the local freshmen a good scrap.

Summary: Eason, of State, took a time decision from Mitchell, of Duke, after going for extra periods; time 2:33. Marin, of Duke, took a time decision of 3:56 on Rodriguez, of State. Kerr, of State, won a time decision from Felton, of Duke; time 8:32. Demp, of Duke, pinned Morrow, of State, in 3:30. Dameron, of State, pinned Anderson, of Duke, in 8:40. Knowles, of Duke, took a time decision from Stout, of State; time 2:03. Carpenter, of Duke, pinned Burdell, of State, in 1:05.

Score: Duke, 16; State, 11. Referee, Morris, State Varsity.

**Dr. Kaupp to Give Six Radio Talks On Poultry Topics**

Roy H. Thomas, state supervisor of agricultural education, has arranged to have Dr. B. F. Kaupp, head of the N. C. State poultry department, give a series of lectures over station WPTF of the Durham Life Insurance Company. The third lecture on "Selecting the Eggs and Setting the Hen" is one of six lectures by Dr. Kaupp. This lecture will be broadcast Friday at 11 a.m.

It will be heard by 8,000 students in 130 vocational agricultural schools within a radius of 130 miles of Raleigh, and will enable them to receive adequate instructions in poultry.

The second lecture given by Dr. Kaupp, February 3, was on the subject of "Culling and Selecting of Birds for Breeding Purposes." He stressed the point that only mature and fit birds should be used as breeders.

Dr. Kaupp's next lectures will be given at various intervals on such important subjects as "Get Rid of Parasites Before Hot Weather," "Giving the Chickens the Right Start," and "Chicken Troubles and How to Avoid Them."

**Debate Here Next Week To Be First of Kind in N. C.**

(Continued from page 1)

Portsmouth, Va., last spring. On Thursday night the girls from the Old Dominion will have an "audience decision" contest with the debaters of Wake Forest College.

The judges for the contest here will be Doctor A. R. Newsome, Secretary of the State Historical Commission; Mrs. Kate Burr Johnson, Commissioner of Public Welfare, and Doctor Julia Harris, head of the Department of English of Meredith College. The chairman of the contest will be Professor Hardy M. Ray, of the Department of English, Professor Cunningham's associate in the work in public speaking.

It is expected this unique contest will be largely attended by students and townspeople.

"Weeah you all bin?"  
"Lookin' foah work."  
"Man! man! Yoush cu'osity's gonna git you into trouble yit."

**THEY SATISFY and yet THEY'RE MILD**

*Yes, very mild!*

**Williams Recovering**

A. C. Williams, a member of the junior class, was confined to the hospital during the fall term. The confinement followed an attack of appendicitis.

Mr. Williams was working in Winston-Salem when the attack occurred. He is out of the hospital now and is spending a few days with his friends on the campus.

Mr. Williams expects to be back to his work by the end of this month.

**Announce Revision of Accounting Course Here**

(Continued from page 1)  
work in advanced and cost accounting. The senior year will also require eighteen credits work in accounting systems and auditing.

This program will undoubtedly call for a larger staff of accounting instructors.

Believing that this change in the Accounting course will offer students a complete and thorough training in accounting equal to any course offered in any southern college, the Sigma Alpha Kappa fraternity is pushing a program which will create a fraternity with such rating that admission to a national body is only a matter of two or three years. It also proposes to furnish speakers for the freshman and sophomore classes who will explain the problems and future of men who enter the accounting field.

The new fraternity is making rapid progress, having held its second meeting Wednesday, February 15, at which time faculty members were voted on and bids will be tendered about the latter part of this week.

Texts and magazines treating with accounting subjects were also discussed and steps taken to secure some of these publications through faculty approval and with the cooperation of the library.

**Aim of Education Is Topic of Talk by Gordon Poteat**

(Continued from page 1)  
"The second trend of modern life is the revolt against authority." According to the speaker the youth of today is questioning all authority and attempting to remove all restraints and taboos. Dr. Poteat voiced his opinion that this was a healthy tendency, but said that sometimes the youth in their haste and excitement destroyed those things which would have been of great value to them in meeting life's problems. He said that all "Keep Off" signs were not put up for the protection of the machinery or property, but that many of them were put up for the protection of the individual.

The third trend spoken of in his address was the rise of Nationalism. Dr. Poteat said that all these trends could be found in any part of the world, but that the last two were especially prominent in China today. "As these two tendencies grow and increase they are going to stimulate and hasten the coming of the first in China. And with the progress of these trends in China there is growing a spirit of hatred and revenge towards the powers of the West, who have imposed on them in the past. Eventually the Chinese are going to be strong enough to give expression to this spirit of revenge." In closing the speaker stated that unless we recognize these trends or tendencies and

begin to remove the causes for this hatred the future holds a day of terrible reckoning.

At 6:30 Wednesday evening Dr. Poteat spoke to a small group in the Y. M. C. A. on the religious situation in China, stating in his address that the missionary was the best kind of ambassador and that he was doing more today to prevent war with China than any other force. "The Chinese are not as a whole leading and begging for an opportunity to accept Christianity, but through personal contacts and examples of Christian living the missionaries are causing many to accept the faith, and the teachings of Christ are gradually pervading the thought of China," said Dr. Poteat.

**Large Variety Is Seen By Reviewer in Jan. Wataugan**

(Continued from page 1)  
bus drive to that district is described very realistically; and "Forakon," a story in the Gothic style by Henry J. Young.

Under the head of verse the reviewer desires to make favorable mention of "My Dad," by J. F. Redmon, a composition of some merit, and "A Night of Nature," by J. E. Moore, a few lines of which indicate some degree of poetic imagination.

The sketches are perhaps the most valuable part of the magazine, "Nicknames," by A. M. Greaves-Walker, is particularly good. It is

racy and readable. "Silence," by L. C. Vipond, and "The Shenandoah Hills," by W. R. Dixon.

The reviewer finds the usual editorials, exchanges (too few, by the way), epigraphs (good), reviews, and the department, "On the Campus."

The weak spots, in his humble opinion, are the fiction and the verse. Entirely too much emphasis is placed upon sexual love in the former. The reviewer expresses the belief that the writing of a good love story is beyond the powers of most college students. Only a finished literary artist can produce a piece of fiction involving the reciprocal affection of a man and a woman that does not cloy. Our versifiers might do well to heed the advice of the elder Franklin to young Benjamin. Sentiment and rhythm, not mere rhyme, are the essence of poetry; and it is far better to express our thought appropriately in prose than to express them badly in verse.

Speaking generally, the reviewer expresses the desire to be able to note in the next issue the absence of certain crudities of style and diction that are too conspicuous in this issue. Ill constructed sentences jar upon the ear and offend the critical judgment; and barbarisms and trite expressions, while they may be pardonable or even effective in campus talk, are out of place in a college publication.

# TERRORS WIN AND LOSE TWO ON TRIP

## RESUME OF TRIP SHOWS TERRORS GET EVEN BREAK

### First Game of Trip To Maryland and the Third to V. M. I.

### WIN OVER VIRGINIA IN SECOND AND BEAT W. & L.

### Teams Make Fair Showing in First Big Trip of Season; Score 2 Points More Than Opponents; Next With 37; State Scores 126 Points.

The State College Red Terrors returned to Raleigh Wednesday afternoon after a six-day road trip which took them into Maryland and Virginia, where they played the University of Maryland on Friday night, the University of Virginia on Saturday night, V. M. I. Monday night, and the Washington and Lee cagers Tuesday night. The résumé is as follows:

**The Maryland Game**  
At College Park, University of Maryland scored its seventh straight Southern Conference basketball victory at the expense of North Carolina late last Friday night.

The Old Liners gained an early lead and were in front 15 to 10 at the half.

Radice and Adams headed the visitors' attack, garnering eight points apiece. Dean not only played a bang-up defensive game, but registered seven points.

Young, forward for the visitors, was the main scorer of the evening with 10 points, and Goodwin, rangy

The Red Terrors will meet the Duke University five here Monday night in the Frank Thompson Gymnasium. The freshmen of the two institutions play, so we judge that the game will start at 7 o'clock.

center, gave a fine exhibition in every department.

N. C. State (24) Maryland (36)

Young (10) Evans (5)

Johnson (2) Linkus (1)

Goodwin (7) Adams (8)

Warren Heagy (1)

McDowall (1) Madigan (6)

Substitutions: N. C. State, Haar (4); Maryland, Radice (8), Hale, Hetzel, Dean (7), Koons.

Referee, Menton (Loyola, Baltimore).

**The Virginia Game**  
After winning three games in a row, Virginia's quiet showed a decided reversal of form last Saturday night at Charlottesville, North Carolina State winning by a 10-point margin, 33 to 23.

The Red Terrors started off with a rush, accumulating a four-point lead, but five minutes later the Cavaliers knotted the count. At half-time State was leading 18 to 14.

Virginia showed little improvement in the second half, while the Carolinians continued their good work until midway the half, when the Cavaliers started a spurt that brought them to within four points of State's total. Young, Johnson, and Goodwin then crashed through with double-deckers and frequent changes in the Virginia line-up failed to check the rally.

N. C. State (33) Virginia (23)

Young (9) Jones (5)

**The V. M. I. Game**  
Monday night at Lexington the N. C. State Red Terrors lost to the V. M. I. Cadets by the score of 36-29.

Although they got off to a nice lead of 8-1, the Terrors found their teamwork interrupted by a Cadet rally and were trailing 23-19 at the half-way mark. The Cadets continued to guard closely, sinking a shot now and then, to keep in the lead.

Young was high scorer with a dozen units and again Frank Goodwin was held to a low score, as he got only four points. Fulkerson caged the leather for 11 points, to lead the Cadets.

Substitutions: N. C. State, Johnson (5), Williams, Scott (2), Walker.

Referee, Lambert (Wabash).

**The W. and L. Game**  
Tuesday night at Lexington, Va., North Carolina State took the Washington and Lee Generals in tow, 45 to 29, after having lost the night before to V. M. I. The Red Terrors took the lead early in the game, and with the exception of only a moment in the second half, held the lead throughout.

At this time the Generals tied the count at 29-29.

Captain Spott's team perked up after the opening of the second half, running up 12 points and tied the score before the half of the second period was reached. But, as soon as the mark was tied the Generals got fewer shots by virtue of stellar guarding.

State presented one of the best floor games seen in Lexington and played heads-up ball, finding themselves after an off-night against the institute the night before. Goodwin guarded well and threw the ball in the loop from every conceivable angle for points. He totalled 20, with Lowry and Johnson second with 10 each, and then came Spotts with 9.

## INTRAMURAL ATHLETICS

Sigma Pi forfeit to Kappa Sigma; Sigma Pi forfeit to Phi Pi Phi; Chi Alpha Sigma 16, Sigma Nu 12; Kappa Sigma 19, Chi Tau 17; Kappa Alpha forfeited to Chi Tau; Alpha Gamma Rho 18, Theta Kappa Nu 11; Tau Rho Alpha 33, Pi Kappa Phi 19, Phi Omega 19, Sigma Phi Epsilon 16.

The Sigma Nu's were doped to win, one to the Kappa Sigma's and one to the Phi Pi Phi's. These two forfeits were unavoidable, to a certain extent.

The Sigma Nu's were doped to win but the Chi Alpha Sigmas proved to be a dark horse and nosed out a victory in the last quarter. The real fireworks were furnished by the Kappa Sig's when they licked the strong Chi Tau quint by a last-minute rally.

Wray's long shot from the center of the court in the last minute of play untied the score and brought home the bacon for his team. The consensus of opinion is that this is the best game that has been played to date.

Both fraternities have strong teams and played a good brand of basketball. The sophomores walked over the faculty in a very rough-shod manner and defeated the much-touted faculty volleyball team decisively. The faculty failed to get started and the sophomores took advantage of this early in the game.

The frosh defeated the juniors in a good fast game. The first-year men had the edge on the juniors in experience.

**Miller Discusses Intramural Athletics, Past and Present**

(Continued from last week.)  
Intramural athletics at N. C. State College previous to the organization of the Department of Physical Education consisted of challenge games between freshmen and sophomores. These games were arranged by the students.

Four years ago an intramural program was instituted under the direction of the instructor in charge of Physical Education and one of the coaches. The response of the students has been good. Lack of familiarity with some of the sports has meant the failure of several of the leagues.

On the other hand there has been enthusiastic participation in the more popular sports.

This year the program of intramural sports has been placed under the direct charge of the director of the Department of Physical Education. It is

believed this is a move in the right direction because the director is in sympathy with all phases of the program of the Department of Physical Education. The program of sports has been enlarged, especially in the individual competition. Most all the sports included in the intramural program are being used in the compulsory physical education training classes. It is believed there will be more students taking advantage of these sports if they knew more about them. The opening of the tennis courts and the swimming pool will make two important facilities available for intramural sports.

It is planned next year to organize an intramural athletic association, with membership open to any and all regularly organized units of the college. These units will elect their own officers and appoint their own committees to manage the affairs of their own teams in whatever league they enter.

The members of the association will be governed by a published set of constitution and by-laws explaining the organization. An all-year participation, both team and individual, will add to the competition and the participation.

The successful growth and popularity of intramural sports program depends on the units of the college joining the association and participating. Intramural sports are entirely sponsored for the students who are not on intercollegiate squads. Play the game you like to play and play it that you may be a healthier and happier man that will do credit to N. C. State College.

There has been the following participation in regular organized intramural so far this year and in previous years: Cross-country, 450; horseshoes, 820; soccer, 100; basketball, 1,701; volleyball, 50; baseball, 100; track, 600; tennis, 60; swimming, 50; free throw, 45; wrestling, 16.

Most all sports included in the intramural program are being played in the required classes in physical training. It is believed that students having something of the sport in physical training will take advantage to compete in intramural. This program is for students of the college and their participation will make it successful.

Students, this is your chance to do something big for the college. You will gladly cheer a winning team or a losing team, so why not help in another way?

## Forty Men Answer First Track Call

(By Z. B. Mangum.)

Coach Sermon's call for varsity track Monday afternoon was answered by about forty men. A number of other candidates for the different events are at present occupied in other sports and will report for track later.

There is no outdoor work scheduled for the track candidates until next week, but Dr. Sermon advised the men to start training at once. Indoor work in the gymnasium is the schedule until that time, while the track is being put into good condition.

Dr. Sermon said, "Every candidate will be given a good chance to show his ability." There is a good opportunity for men to come out this year.

**FRESHMEN DOWN WINGATE BY THE SCORE OF 57-24**

**Junior College Team No Match For Little Terrors and Lash Monday Night**

(By C. B. TATE)

The State College Little Terrors defeated the Wingate Junior College in the Frank Thompson Gymnasium Monday night by the score of 57-24.

The visitors put up a gallant fight, but were outclassed in every department of the game. They were never in the lead but once, and that was in the opening minutes of play, when they ran up a 5-2 lead, but at the end of the half the freshmen were leading by the score of 31-13. "Doc" Sermon put in many new men, so that almost all of the substitutes saw action.

The scoring of the freshmen was led by Boyette, center, who contributed 14 points, and Gammon, forward, who scored 11 points.

The game Monday night continued the march toward the state title, for the freshmen have only been defeated by the Carolina Tar Babies, who scored 11 points.

Statistics show that the State College Red Terrors have won only five games from the Tar Heels since 1923, according to an article in the News and Observer. The last win for State was in 1928, when the Terrors were state champs.

In turn have been defeated by the Duke Blue Imps. The State freshmen have defeated the Imps in the only game of the year between the two teams.

## SPORT STUFF

By T. A. VERNON

The Department of Physical Education is doing a great thing for State College in conducting the annual high school basketball tournament. The officials of the tournament are only asking the students to do one thing, and that is to take one or more students in their room and keep them while they are here.

If you do take a student to stay with you, show him around the campus. Tell him the names of all the buildings on the campus, unless he already knows them. Tell him all about State College. Boost State College in the eyes of those 800 high school students, men who will be going to college next fall. Sell State College to them.

The Red Terrors went up into Virginia and Maryland and were able to come back with two scalps in their belt. They met the strong University of North Carolina Tar Heels last night in the Tin Can.

To date the State and Duke freshmen teams are tied for the state championship in that circle. Should the State team have lost last night they must win from the Duke Fresh Monday night to get an even break at the title. State fresh beat the Duke fresh a pair and the Carolina fresh beat the State fresh one game. If the State fresh have any desire to hold the title for the third successive time they must win from both teams.

Statistics show that the State College Red Terrors have won only five games from the Tar Heels since 1923, according to an article in the News and Observer. The last win for State was in 1928, when the Terrors were state champs.

In turn have been defeated by the Duke Blue Imps. The State freshmen have defeated the Imps in the only game of the year between the two teams.

**\$5**

**That Price - no more**

Is all you need to pay for the world's finest pen!

Here's the world's easiest writer due to Parker's Pressureless Touch! A fine ink channel ground between the prongs of the point brings capillary attraction to the aid of gravity feed, causing an immediate and steady ink flow at touch of point to paper. No pressure from the fingers. The light weight of the pen itself is sufficient.

Here, too, is Parker's Permanent Material—28% lighter than the rubber formerly used, yet 100 times as strong.

Parker Precision in manufacture still further insures accuracy.

5 flashing colors, 3 sizes of open barrels, 6 graduated points, leave nothing to be desired in a fountain pen at any price.

So pay \$5 or \$7 only to get a permanently satisfactory pen.

Pencils to match Pens, \$3, \$3.50, \$4.

Be careful to get the genuine. You'll know it by the imprint, "Geo. S. Parker-DUOFOLD."

**Parker Duofold Jr. \$5**

Paragraphs

It was gratifying to learn that Major Early will not be transferred. The War Department will permit him to spend another year in our midst.

"Bogus colleges grant diplomas for small sum," says the president of Salem College. Diplomas may be bought, but knowledge will continue to be secured by study and observation.

What has become of the senior petition which was to have been presented to the faculty council some time ago? Did it die a natural death or is it being held up for some reason?

Six girls were suspended this week at N. C. C. W. for a wild-goose chase in a thirty-five dollar car which they bought and wrecked. Rather a costly ride. The council gave them thirty days.

Our Southern Senators helped to crush Walsh's Power "Trust" quiz Wednesday. The Senate adopted an amendment directing the Federal Trade Commission to make the inquiry. Another case of "shifting the buck."

An orator is a man who can use six-cylinder words to propel a four-cylinder idea, according to the *Fort Arthur News*. It might be added that a debater is a man who can prove one side of a question and then turn around and prove the other side.

College students are falling in line for Al Smith as presidential nominee. An intercollegiate "Smith for President Club" has been organized at New York University. Other similar clubs have been organized at Rutgers and Stevens Tech. Every little boost helps.

Dr. Gordon Potent says that not everything the student hears in the classroom is facts, but is often theory and hot air. The time may come when college students will have to be able to separate the "hot air" from the facts in order to get the most out of a college education. It is hoped it never gets that bad.

The debaters get into action next week. It will be the first one of the year for the State teams. The debate here will be the first decision debate in the history of intercollegiate debating in this state, according to Professor Cunningham. This, coupled with the fact that girls will be opponents, should draw a large audience.

The time is approaching for the high school tournament. Have you signed up to entertain some of these high school boys? The success of this tournament means much to State College if it is successful. Do your part in an effort to make it such. It will be a representative group of boys of North Carolina and the impression that they get while here will very likely be a lasting one. Sign up today.

WHICH WAY?

There are two schools of thought. One says that broad education is the better, while the other says that restriction is necessary. That is, specialization and not a general education is necessary to be a successful business man. Some educators say that the most successful come from the ranks of the former and vice versa. From the mass that is seeking an education today comes the cry, "Into Which Shall We Go?"

Experience will show that men and women who were zealous members of either of the two schools of thought have been successful in their undertakings, while on the other hand many failures are to be found in each of the two. Trying to settle the interrogation by past experience leaves us in the mire as deep as before, as far as the group is concerned, but individually it teaches mankind that he must solve the problem for himself, but he is handicapped in college.

Only a few days ago an instance came to our attention which further proves this point. A student who is one of the brightest in his class, refused to take a science course, due to the fact that he loathed it, and stated that he would stop school immediately if he were forced to take it. What was to be done? The outcome of this episode has not been learned, but nevertheless it seems to demonstrate our point. Is it the proper thing to make the individual take something he despises? Will such a course be beneficial? No. Our modern educators have worked out schedules which will satisfy the group as a whole. Many wish to be restricted and follow the courses prescribed in our colleges today, but for the man who desires to broaden his education is it fair to make him follow the same road. It smothers out individuality. On the other hand there are drawbacks. Some students, sad but true, hunt for what is known as the "crip" courses, but nevertheless has not the average college student reached the age where he knows what is best for himself?

This problem is one that confronts educators every day and it appears that they are beginning to slightly realize that those who wish to deviate from the regular curricula should be permitted to do so in order to specialize or broaden their education.

What are the educators going to do? Will they continue as in the past to favor restrictions to all or will they permit deviation and broadening to those who desire it?

WE GET WHAT WE WANT

The question of finance is to the front. Is college education worth what it is costing us, or are we wasting money on a lot of youngsters who do not appreciate what we are giving them and are not making the return on our investment to which we are entitled? The question was raised by a "Middle-Aged Father" in the *Atlantic Monthly* for May as a personal issue. Generalizing the situation and then substituting for an individual sponsor the generation that is now paying college bills in the large, the personal complaint becomes a national issue that concerns us all. What the colleges are doing is no pleasant question to dally with, once we become convinced that the colleges are "doing" us.

All told, it is estimated, on the basis of an average cost of fifteen hundred dollars per student per year, that college education is costing the nation today well over a billion dollars annually. The income from this investment is not easy to estimate. Is a symphony concert worth the price we usually have to pay for it? This is an individual issue wholly. To a music lover it may be worth twice that. To a non-music lover it might well be an injudicious outlay. Everything is relative. If the colleges were closed and we had that billion dollars to place elsewhere every year, where would we invest it with a guarantee of a richer return? We are getting all we pay for, if we like what we are getting, and if we are better off in having the results in our possession than we would be without them.—*Rocky Mount Collegian*.

Through the courtesy of Huneycutt's London Shop "A Best Dressed Student" contest will be held here some time soon. The winner, who will be selected by popular vote of the student body, will be awarded a suit of clothes by The London Shop. Huneycutt, proprietor of the clothing store, has not definitely set the date, but says he will announce it as soon as plans are completed. This contest should create considerable interest among the student body.

AN INJUSTICE

A freshman, the senior class, and the college have been done an injustice by some unknown person who wrote a letter to Mr. Tillett in answer to the "bumming" question and signed J. A. Yates' name to it. Yates denies any knowledge of the matter and furthermore received a telegram from Tillett apologizing for the embarrassment which the letter caused the freshman, but the public will be some time in learning that a senior did not write the answer, although announcements will be made in the various newspapers of the state to this effect. It is difficult to clear up something which has been broadcast.

It seems that whoever forged the name of Yates to the letter wished to get him in some trouble with the senior class and make him subject to much criticism throughout the state. Whoever did the cowardly trick also evidently must have had some grievance against the senior class or else did not think how serious such a forgery would be. Surely it must have dawned upon the writer as soon as the letter was published that an investigation would be started and the forgery of the freshman's name discovered as a consequence. The forger must have foreseen the discredit that such a letter would bring upon the college and the senior class. For these reasons it is hard to believe that anyone from this institution did the cowardly trick.

The letter contained many grammatical errors and showed lack of courtesy to Mr. Tittle, who is an elderly man.

A freshman in high school should have been able to use better English than appeared in this letter alleged to have been written by Yates; and then to have the public believe that it was the work of a senior of this school is ridiculous.

If a State College student did write the epistle, which is hard to believe, the student council should make an effort to find the guilty person and punish him severely. The writer should suffer the same embarrassment as the freshman and the seniors have as a result of the letter being published in the leading papers of the state. Mr. Tillett states that he will send an announcement to the newspapers to the effect that Yates did not write the letter and is not a senior at State College, which we hope will clear up the matter.

WISE AND OTHERWISE

Due to the recent fraternity average given out by Dean Cloyd's office the fraternity men of State College are facing a real problem. These averages revealed that most of the twenty fraternities on the campus had a lower average than for the corresponding period of last year. Furthermore, the average of the fraternities was lower than the average of the student body.

This is not the usual situation. Therein lies the seriousness of it. Heretofore, the fraternities had shown a scholastic average well above that of the student body. No matter what reproach might have been lodged against the modern Greeks, they could always defend themselves with their averages. Are they to lose their weapon of greatest defense?

Such a decline in the scholarship of the fraternities is sure to attract the unfavorable attention of the college authorities. They are asking: "Wherein Does the Cause Lay?" Probably some members of the administration will suggest the most drastic means to remedy the situation. In fact, such is certain to be the case.

The fraternities are very likely to be put under the judicial eye of the administration. They will not be permitted to remain in status quo. A sweeping investigation will follow. Obviously someone will have to answer. The fraternity men probably know where the trouble lies. It is up to them to better the situation. This is a matter which every chapter president should well take into consideration, for the estimation of fraternities in the eyes of the administration is in danger of being lowered.

EDUCATION HEADS MEET AT ELON IN ANNUAL SESSION

Elon College, Feb. 17—(CP)—The heads of the education faculties of the North Carolina colleges met in annual session at Elon College on February 11. This organization is headed by Dr. John H. Cook of the N. C. C. W. faculty, and comes to Elon College this year upon the invitation of Prof. O. W. Johnson, head of the education department at Elon.

The conference began at 8 p.m. in the Y. M. C. A. hall at the college, and supper was served by the religious education committee of the Elon College students and faculty.

GIVE CREDIT

Are the students on the college publications being treated fairly by the faculty council? No, those students on the publication staffs should be given credit by the college for their work. As the publications are now run there is no incentive to make the students take part in the publications.

The student body elects an editor and a business manager for each publication. If the college would give credit for work on the publications it would make the work on the staffs much easier and at the same time stimulate interest in the publications.

Students are not going to do work on some publication if they do not get credit for it. Can you expect a student to take time from his studies and make low grades in order to work on a staff, where he will get no credit?

I do not think the fair-minded members of the faculty would come to State College to teach merely because they enjoyed it. I know of very few students who will help with the publications simply because they enjoy it.

If you should by chance go by one of the publication offices at twelve or one o'clock at night you would see one or two men at work. Why not give credit for this work and make it easier on the few that are doing the publication work now?

H. H. BURROUGHS.

WHO MAKES THE EXECUTIVE?

The following gives the viewpoint of executives in fitting people into executive positions as expressed by Merlin H. Aylesworth, president of the National Broadcasting Company, himself an executive:

"In this day and age executives are selected by others. The board of directors of a great corporation is made up of men who are high executives in other firms. They keep their eyes upon the promising material in their own organizations as well as in the concerns of which they are the directing heads.

"The way for the aspiring youth or older employe to become an executive is to do the job that is given to him without regard to the time that may be necessary, without regard to immediate physical comfort, and without regard to any other job

that may be ahead. The employe must first prove conclusively to his superiors that he can hold the job that has been given to him before he can expect consideration for higher rank in an organization.

"The success of an enterprise depends on getting the right man for the right place. Those above are likely to know better than you do what they want from you. Let them have it until you have proved your superiority to the work that you are doing.

"My advice to ambitious youth is to be exceedingly careful before taking a new position, to look over its difficulties and disadvantages as well as its rosy aspects and not to leave a firm that you like and respect without being sure that the new one is equal in integrity, as sound, and will offer as permanent employment as the one with which you are associated.

"As for personal advice, I would say the best guarantee of success is to keep physically healthy while forcing your brain to be ever active and progressive.

"No man can choose an executive position for himself. If he shows courage, initiative and intelligence, and is willing to assume real responsibility he will find, however, that other executives will elect him to membership in their ranks."

Never Gets a "Bite" From This Tobacco

Jasper, Tenn. March 23, 1927

Larus & Bro. Co. Richmond, Va. Gentlemen:

I have always wanted to smoke a pipe. After several attempts I gave my "taste" up, for with each trial I got a blistered tongue.

One evening, when looking over a certain outdoor magazine, I read that a certain fisherman could catch more fish when using "Edgeworth," so I decided I would try "his" tobacco—for I am no poor fisherman!

The next day I tried to secure Edgeworth. The local country storekeeper did not have it, so I sent by a friend to the city for my first Edgeworth. Two things have happened: I still smoke Edgeworth, and the local storekeeper always has a supply.

I catch fish and never get "a bite" from Edgeworth!

Yours for keeps, H. V. Massey

BOWMAN'S Jewelers

I. O. O. F. BUILDING RALEIGH, N. C.

De Soto might be a telephone man—today

He pioneered a way into new country — and back again. He led his men through every obstacle; where there were no resources he made them, where there were no boats he built them.

Today men of the telephone industry are the De Soto kind of pioneer. They have the vision to tackle the new job and the resourcefulness to

see it through. In working to make a better cable they saw the need for a new method of insulating wires—and they devised it.

Guiding the technician's skill, telephone pioneering demands courageous business leadership by supervisor and executive. To keep up with a new country, industry needs not only great momentum but right direction.

BELL SYSTEM

A nation-wide system of 18,000,000 inter-connecting telephones

OUR PIONEERING WORK HAS JUST BEGUN

How ambition can almost wreck the life of a woman and twist the careers of the men who love her is shown in a vivid picture which plays at the Superba Theatre Monday and Tuesday. It is Ralph Ince's latest FBO production, "South Sea Love."

It is a vivid story of human emotions told on a background of marvellous pictorial beauty. It begins in New York, where a young man is parting from his sweetheart, promising her to make a fortune in the South Sea Islands and return for her. It shifts to the languorous beauty of the tropics, where he undergoes hardships and saves. She develops stage ambitions. Theatrical "angels" help her on. She uses men for her own advancement when the opportunity arises. One man even goes so far as to leave for the tropics to kill the only human who stands between him and the woman he loves.

From him the man who has gone there to make his fortune, learns the story of the woman's unfaithfulness. He conceives the idea of revenge and has word sent of his death. An estate is mentioned. The woman comes in search of the estate. She is held prisoner. The endless beat of the tom toms, the oppressive heat, the drenching downpour of the rainy season work her nerves to a frazzle.

The climax comes when the two men fight for possession of her, and she realizes there is only one real love in her life.

Fatsy Ruth Miller plays the leading feminine role, and does it with a sincerity and skill that adds much to the story.

Lois Wilson has never looked more lovely, nor has she ever appeared in a more delightful picture than Allan Dwan's production, "French Dressing," which opens at the Superba Theatre Wednesday and Thursday.

Starting as a humdrum drama of domestic life in Boston, where a husband and wife—H. B. Warner and Lois Wilson—are obviously bored with each other, the action moves swiftly to Paris and out of the prim Back Bay atmosphere, in which Lois plays the role of a very conservative wife. In Paris, she plans to obtain a divorce after a

**N. C. STUDENT VOLUNTEER UNION TO MEET FEB. 17-19**

State College to Send Delegates To Conference To Be Held at Duke University

The annual conference of the North Carolina Student Volunteer Union for Foreign Missions is to be held at Duke University, February 17-19. This conference meets once a year and has for its theme some worthy purpose for the advancement of Christianity. This year the theme that the conference will center around is, "The Challenge of World Missions to College Youth Today."

The conference this year is to be to a certain extent an echo conference of the Tenth Quadrennial Students' Volunteer Convention held in Detroit, Michigan, during the Christmas holidays. A number of the delegates and most of the well-known speakers who will appear at Duke were delegates to the Detroit convention.

Some of the noted speakers for the conference are Dr. Edmund D. Soper, Dr. Elbert S. Russell, Mr. Gordon Post, Mr. W. Y. Chen, Miss Miriam Godwin, Mr. J. R. Walker, and others. Mr. J. F. Barnes will direct the music.

All who are interested in attending this meeting should see Mr. King or apply at the "Y" desk for information as early as possible. N. C. State needs her quota of delegates at the conference.

misunderstanding leads her to believe her husband has become too familiar with her gay school chum, played by Lilyan Tashman.

It would be unfair to tell more of the story, but suffice it to say, Lois is converted to the idea of French dressing—as it applies to bobbed hair and clothes, and begins really to live, for the first time in her life. Of course, she meets Clive Brook, a man about town, but the conclusion is a real surprise!

The days of old, the days of gold, are days brimful of romance and adventure of the most entertaining and thrilling sort.

Such is the background for Zane Grey's "Under the Tonto Rim," which is revealed on the screen at the Superba Theatre on Friday and Saturday.

The locale of "Under the Tonto Rim" is the Tonto Basin in Arizona, and the period is the latter part of the nineteenth century, before Arizona had been admitted into the Union.

It was just about this time that gold was discovered in that state, and thousands flocked there. Lawlessness broke out, and gangsters and gamblers made the small mining towns their headquarters. Then in came the Vigilantes, and after a hard-fought battle ousted the outlaws.

Briefly, the story concerns young Edd Denmeade, played by Richard Arlen, who meets Lucy Watson and her brother, Bud, the latter the United States Government assayer in the little town. When gold is found, one Sam Sprall, daring gambler, begins his destruction and thievings, he being the head of a powerful gang. Edd's father is slain, and for a time the youth believes Bud has done the deed. He learns, however, before it is too late that Sprall was the killer, and proceeds to organize the Vigilantes and send Sprall and his men out of town. Then he and the girl top it off with a marriage.

"An Adorable Fraud" might well be the title for "Very Confidential," Madge Bellamy's new Fox Films production directed by James Tinling, which has been booked at the State Theatre for two days commencing Monday, along with five excellent acts of Keith Vaudeville.

In this picture, Miss Bellamy sets her heart upon winning the love of a stalwart football hero and she is kept busy inventing new excuses to keep in his good graces. She starts by posing as a courageous big-game hunter and finishes by doing an amazing stunt that would be a credit to the world's champion automobile racer.

"The Big Parade," which King Vidor made for Metro-Goldwyn-Mayer, is the first picture inspired by the pen of Captain Laurence Stallings, the well known veteran of the A. E. F., playwright, novelist and journalist, who has contributed more than any other one man to our knowledge of the life in France during the great world crisis of 1917-18. It will be at the State Theatre Wednesday, Thursday, and Friday. This knowledge is epitomized in the form of an entertaining romance of love, thrills, passion, and laughter centering in the two characters of Jim Apperson, superbly played by John Gilbert, and Melisande, a peasant man's wife, delightfully portrayed by Renee Adoree.

Two other extraordinary characters in the production are those of Jim's buddies in the billets and trenches, Slim Jensen and Bull O'Hara, played by Karl Dane and Tom O'Brien.

**TEN DELEGATES GO TO GREENVILLE CONFERENCE**

"Y" Promotion Force Sends Group to Ninth Annual Older Boys' Meeting

Ten State College men attended the ninth annual Older Boys' Conference in Greenville, N. C., last Friday, Saturday, and Sunday.

These men, who were from the promotion force of State College, attended the conference for the purpose of leading discussion groups. Mr. King, secretary of State College Y. M. C. A., was asked to send ten boys to Greenville to hold these discussion groups. Heretofore the boys who led these groups have been from Carolina, Duke, and Davidson.

The meeting began Friday afternoon at 3 o'clock and closed Sunday afternoon at 4 o'clock. The meetings consisted of speeches, discussions, and recreation. The theme of discussion was pertaining to the topics which come up in every-day life, and the motto of the conference was the "Inquest of the Best."

The first meeting was for the purpose of getting acquainted. There was a short address of welcome,

which was followed by a brief talk by Reverend O'Brien of that city. The meeting adjourned at 5 o'clock. Friday night the boys were assigned to various discussion groups and short discussions were held.

Saturday morning there was a general meeting in the auditorium, after which the delegates went to their respective discussion groups. These discussion groups lasted until 11:30 o'clock. At this time a picture was made of those who were present at the conference.

Saturday afternoon was devoted to recreation. Saturday evening at 6:30 o'clock the delegates, the discussion leaders, and several visitors were given a banquet in the dining hall at Carolina Teachers College. At this time Henry Rourke, a student at Duke University, and J. A. McMillan, the alumni secretary of Wake Forest, were the speakers at the banquet. The officers for the next year's conference were elected at this banquet.

The final meeting of the conference was held Sunday afternoon from 2:30 to 4:00 o'clock. There were two hundred and fifty "H-Y" boys present at the conference.

The ten boys who were there from State College are: H. C. Green, C. L. Straughn, H. H. Burroughs, J. B. Britt, J. E. Tiddy, E. W. Buchanan, H. H. Rogers, H. M. Stott, C. W. Jackson, and Ralph Brimley.

**A.S.M.E. Will Bring Jas. W. Cox Here For Textile Talk**

The Raleigh section of the American Society of Mechanical Engineers has arranged for an illustrated talk to be delivered by Mr. James W. Cox, Jr., chairman of the Textile Division of the American Society of Mechanical Engineers and a consulting textile specialist of New York City. This talk will be given in the State College Y. M. C. A. auditorium at 8 p.m., Saturday, February 18. Mr. Cox's subject will be "The Manufacture and Finishing of Cotton Cloth."

The talk will cover the manufacture of cotton goods from fiber to finished fabric and will be illustrated by moving pictures made under Mr. Cox's direction in a well known southern cotton mill and finishing plant. The principles of the various processes and operations are very clearly shown by use of slow motion pictures and the telephoto lens which magnifies certain small moving parts to twenty times the original size. Specimens of cotton fiber in the various roving yarns, cloth, etc., will be exhibited. At the close of Mr. Cox's talk, he will be pleased to answer any questions in regard to the fiber.

**"Hoot, Mon, Luckies dinna hurt my throat or wind," says Sir Harry Lauder, celebrated star**

"It takes a Scotchman to truly appreciate that wonderful toasted flavor that comes in Lucky Strikes. I've smoked Luckies for years and all this time I've been active in my work which demands a clear voice for singing and good wind for dancing. And so I say to Sandy McGregor, 'It's always a bright moonlight night with Luckies—Hoot, Mon, they dinna hurt my wind or throat.'"

*Harry Lauder*

**"The Cream of the Tobacco Crop"**

for Lucky Strikes  
says tobacco loose-leaf warehouseman

"I buy Tobacco—I sell Tobacco—I Fox-hunt for my occasional pleasure. In my business, I have noticed that in this Southland where tobacco grows, The American Tobacco Company buys 'The Cream of the Crop' for their LUCKY STRIKE Cigarettes. I am glad to testify as to their quality; their growth is no surprise to me, because I know what goes into their manufacture."

No Throat Irritation—No Cough.

## SOCIAL ACTIVITIES

**Leap Year Cotillion Dance**  
The Leap Year Cotillion Club entertained at a dance Wednesday evening from nine-thirty until one-thirty in the Virginia Dare ballroom of the Sir Walter Hotel. The club is composed of about forty young ladies of the Capital City's elite and under the direct charge of Misses Annie Louise Manning and Sarah Brooks. The dance proved one of the most brilliant social events of the season.

The ballroom was in uniform valentine motif. Streamers of twisted red crepe paper were looped through the three great chandeliers and hung low from the ceiling, just above the heads of the dancers. Each panel of the wall bore brilliant red hearts, thrust through with gold arrows from which red ribbons supposedly fell in streams of blood and ended in pools of smaller red hearts. A long table ran entirely across the lower end of the ballroom, at which punch was served and an assortment of cakes in the form of hearts.

The King Cotton Hotel orchestra

played during the evening in a screen mass of long-leaf pine.

A number of special dances were given, in which the young ladies broke, partially carrying out the Leap Year idea. In these dances the most popular young man present was chosen, and Mr. Jack Keller, an alumnus of State, was awarded first prize, with Irwin Bailey of Raleigh second.

Prior to intermission the grand march was led by Miss Margaret Sherrill and Mr. Henry Young, and the guests were presented with sparklers as favors. For an instant lights were extinguished in the ballroom and all favors sparking in darkness formed an enchanting scene.

**Meredith Entertains Sophomores**  
The sophomore class of Meredith College honored the State College sophomores at a reception on Saturday evening, February 11. This is an annual occasion and is always looked forward to by the sophomores of the two institutions.

The reception this year was an unusual one, with Leap Year adding more interest. After the State College boys had been received in a most joyful and welcoming way and introduced, the students of each college were given attractive date cards in the form of hearts; and then the girls rushed the boys for five-minute dates, in which lots of time was made

by the fair ones, according to the State sophomores.

Following the enjoyable dates, Meredith's most talented entertained by rendering various numbers, including the play "Ah" and a proposal by a girl to a well-known State sophomore. During the entertainment refreshments were served.

The bell rang, announcing that a most successful evening had come to an end.

**Saints Dance**  
The Junior Order of Saints of North Carolina State College entertained the social set of this city at a dance Saturday evening in the Frank Thompson gymnasium.

The spacious gymnasium was decorated in red and black streamers, the colors of the order, descending from the center of the gymnasium. The music, which had much to do with the success of the dance, was furnished by the Carolina Bacchaners of the University of North Carolina.

The figure was led by "Darling" Howard and Miss Nancy Hill of Hickory. The figure closed with the members of the order pinning red roses on their respective partners, as the orchestra played "Girl of My Dreams," following which there was a "no-break" dance for the Saints.

Chaperones were chosen from the members of the faculty and their wives—among whom were Mr. and Mrs. E. L. Cloyd.

**Valentine Dinner Party**  
The Alpha Epsilon Chapter of Pi Kappa Alpha Fraternity of North Carolina State College entertained at a Valentine dinner party Monday evening at their chapter house on Hillsboro Street.

The house was appropriately decorated and a four-course dinner was served. Their guests included West Raleigh friends of the chapter, as follows: Mr. and Mrs. Charles B. Park, Mr. and Mrs. J. T. Rowland, Mr. and Mrs. J. E. MacDougall, Mr. and Mrs. T. N. Park, Mr. and Mrs. William W. White, Miss Rebecca Bowen, Miss Lyda Studdert, Miss Randolph Hill, Messrs. N. E. Edgerton and Jim Rowland.

Mr. Hubert Fields, '27, is spending a few days at the Pi Kappa Alpha fraternity house with fraternity brothers while attending to some business in the city.

Mr. Murray, an alumnus of State and now working in Winston-Salem, stayed at the Sigma Nu house last week-end.

"Pop" Williams, Karl Koontz, John Sherrill, Fred Forbes, John McNair, and George Fowler attended the S. A. E. Fraternity dance in Durham Friday, and will attend the Carolina Mid-Winter today and tonight.

A number of State College students attended the Carolina-State basketball game last night in Chapel Hill.

Mr. "Red" Inscoc is spending the week-end at N. C. C. W.

Many Carolina students attended the State dances here last week-end.

## OFFICIAL OF TELEPHONE COMPANY SPEAKER HERE

**Advices Students How to Analyze a Job and Determine Fitness For It**

Kendall Weisger, director of employment and training of the Southern Bell Telephone and Telegraph Company, spoke to a group of students Thursday at ten o'clock in the Y. M. C. A. auditorium. His subject was, "How to Analyze a Job."

Mr. Weisger said that big business and society want leaders, and that citizens are not interested in paying taxes to educate people who do not desire it. "College boys should be a cross-section of the cream of the state, since they are the product of a process of elimination. It is then their duty to measure up to what is expected of them, he said.

The speaker gave six considerations for the individual to apply when analyzing a job:

1. Is it a line in which I can succeed?
2. Is it with a company to which I can attach fullest loyalty?
3. Is it a job that I can be proud of?
4. Can I depend on its being permanent?
5. Is it a line in which I can continue to grow?
6. Will it compensate me in such a way that I can provide for myself and family and lay aside some for my later unproductive years?

Mr. Weisger puts remuneration last because he says if the other points are satisfactory it will take care of itself.

"These things seem simple and are," says Mr. Weisger, "as for instance Plato's philosophy is the present-day policy in big business: 'No two men are born alike, but each differs from another in natural endowments, one being suited for one thing, another for another thing. All things will be produced in superior quality and quantity and with greater ease when each man is engaged at a single occupation for which he is by nature best endowed.'"

Mr. Weisger advised college graduates to have the courage to get away from the home complex. "Don't be in too big a hurry to get a job. If you spend four years in high school and four years in college, besides the

lower grades, preparing for your work, why not spend a few weeks or months finding the right position?"

Mr. Weisger is interviewing those who are interested in securing positions with the Southern Bell while here.

Professor A. F. Graves-Walker spent last week in Atlantic City, attending the annual meetings of the American Ceramic Society, the National Brick Manufacturers' Association, and the Peta Pi Kappa fraternity.

**Mechanical Seniors Leave February 24 On Inspection Tour**  
The State College senior mechanical engineers will take an inspection trip to several large power stations Friday, February 24.

Leaving here on Friday, in a large bus hired from the Union Bus Company, the sixteen seniors, accompanied by four professors in the mechanical engineering department, will first visit the Durham power plant on the Eno River, about six miles west of Durham. This is a large steam power plant belonging to the Southern Power Company and it furnishes Durham with all its electricity.

From there they go to another steam station belonging to the Southern Power Company. It is the "Buck" station, on the Yadkin River, near Salisbury, acknowledged one of the best and largest in the South.

From Salisbury they go to Norwood, Baden, and High Rock, where there are three hydro-electric power plants on the Yadkin River.

Coming back by Sanford, they will stop at the Carolina Power and Light Company's steam power plant at Moncure, on the Cape Fear River, arriving in Raleigh late Saturday afternoon.

**GRAVES-WALKER TALKS AT CERAMIC MEETING**  
The local student branch of the American Ceramic Society held a special meeting Tuesday evening, February 14.

The program consisted principally of a talk by Professor Graves-Walker. He has just returned from the annual meeting of the American Ceramic Society, held this year in Atlantic City. The greater part of his talk was given to a discussion of things of interest that were brought out at this meeting. Probably the most interesting point which he discussed was a report on some research work conducted on heavy clay products dryers by that particular branch of the society.

**P. A. wins on every count**

ANY way you figure it, P. A. is better tobacco. Take fragrance, for instance. Your well-known olfactory organ will tell you. And taste—who can describe that? And mildness—you couldn't ask for anything milder.

Yes, Sir, P. A. is cool and comfortable and mellow and mild. Long-burning, with a good clean ash. You never tire of P. A. It's always the same old friendly smoke. Get yourself a tidy red tin and check everything I'm telling you!

**PRINGE ALBERT**  
—no other tobacco is like it!

The more you know about tobaccos, the more you appreciate P. A.
