N.C. Collegiate Press Association Holding Meetings in Raleigh

Seventeen Schools Are Represented at the Fall Meeting
NINETY DELEGATES
HERE FROM PAPERS
Delegates Guests at Numerous Banquets and Luncheons; Capital Printing Company, Edwards & Broughton, News and Observer, and the College Among Hosts; Many Promi-

Friday evening finds the North Carolina Collegiate Press Association meeting in full swing on the State College campus. The delegates arrived Thursday afternoon, and were the guests of Meredith and State.

Seventeen North Carolina colleges are represented and about forty publications. The delegates number ninety. The activity for Thursday included the registration at the Y and several social events. The college annual department of Edwards & Broughton Co. entertained the annual group at a dinner at the Sir Walter Hotel, and the Capital Printing Co. was host to the newspaper and magazine groups. Following this the State Theatre entertained the entire membership of the association at a theatre party.

The Friday schedule was as follows:
8:00—Breakfast: Boys, State College Cafeteria; girls, Meredith College Dining Hall.
9:00—Address by president, H. L. Heister.
9:30—Publication reports.
11:00—Address by W. T. Bost.
12:00—Business session.
1:00—Luncheon, Yarborough Hotel, courtesy News and Observer and N. C. State College. Address by Dr. E. C. Brooks.
—Continued on page 5.

U. N. C. FACULTY MEMBERS LUNCHEON GUESTS HERE

Large Number of Visiting Professors Expected for Pre-Game Meeting

Prior to the State-Carolina game there will be a faculty club luncheon at the Y. M. C. A. from 12:30 to 1:30 p. m. Dr. Chase, President of the University of North Carolina, is absent in Europe at this time, but Dr. James F. Royster, chairman of the University faculty, has accepted the invitation of State College faculty to attend the luncheon with a group of the University of North Carolina faculty members as guests. The time for the luncheon has been set one-half hour earlier than the last luncheon on October 13 so that the members attending will have ample time to join their families before the game. The various colleges throughout the State have the same purposes, same ideals, and are working for the same good. According to the opinion voiced by Dr. Gaines, these faculty lunches are the best means of bringing together members of the faculties of the various institutions in order that they may become better acquainted.
About 65 faculty members attended the luncheon given in honor of the Wake Forest faculty, and it is expected that the attendance will be larger at the luncheon Saturday.

Orators and Debaters

All men who plan to compete for the honor of representing State College in debate or oratory this year are asked to meet at 12 noon Wednesday, November 2, in Room D, Pullen Hall. Plans for the year will be discussed.

FORENSIC COUNCIL

PHI KAPPA PHI HONORS EIGHT NEW MEMBERS

Only Seniors Are Given Membership in National Society

METCALF, ANDERSON AND CLOYD CHOSEN OFFICERS

Bailey, Architecture; Britt, Agriculture; Brown and Hardy, Electrical; Rogers, Science; Stott, Vocational Agriculture; Tucker, Industrial Management; Wooten, Agricultural Administration, Are Taken in From Graduating Class.

The Phi Kappa Phi fraternity held its fall election on October 17 and the pledges given notice of their election a few days later.

On this first election only eight men were picked from the present senior class. Those men were: C. Z. Bailey, Architecture; J. R. Britt, Agriculture; T. E. Browne, Electrical Engineering; R. L. Hardy, Electrical Engineering; H. H. Rogers, Science; H. M. Stott, Vocational Agriculture; C. S. Tucker, Industrial Management, and H. H. Wooten, Agricultural Administration.

The Phi Kappa Phi is the only national honorary fraternity at N. C. State which does not discriminate between schools, but chooses its members from the student body at large. To be eligible for membership a student must have an average of eighty-five per cent or above. Scholarship is the first requisite, but not the only one, since character, personality, and college activities are taken into serious consideration. Only seniors are given membership.

At the present there are forty-two active chapters of the Phi Kappa Phi distributed in colleges and universities.
—Continued on page 5.

BAND SOON TO DRESS IN WHITE AND RED UNIFORM

New Outfit To Be Worn On All Occasions of Non-Military Character

The college band will secure new uniforms instead of the old R.O.T.C. uniforms that they have been accustomed to wearing. These uniforms will consist of white trousers and red blazers trimmed in white. A cap or hat of some kind will be added as soon as it can be decided upon. Anyone who has served over a year in the band will wear an insignia.

This uniform is to be worn by the members of all musical organizations on the campus, and will be restricted to their use only. It will be worn to all athletic games and social functions at which they play.

"Daddy" Price has tried for several years to get a uniform for the musical organizations, so that anyone seeing them will know that they are from North Carolina State College. In the past, while making out-of-town trips, due to the khaki uniform, people have thought that the college band was an army organization. For this reason the school did not receive as much publicity as it would have otherwise.

When the band plays for military purposes the R.O.T.C. uniform will be worn as usual, but for all other marchings, games, and social events it will wear the new outfit. The band will be more of a representative organization of State College if it wears its colors.

It is expected to have these uniforms for today's game.

HEADQUARTERS OF N. C. C. P. A.

FORENSIC SCHEDULE HAS WOMAN'S COLLEGE DEBATE

Virginia State Teachers and Alabama University Are Certain, Other Negotiations Underway

As the result of efforts which have been made by the Forensic Council, the schedule of contests in debate and oratory for the current year is gradually taking shape. Debates have tentatively been arranged with the Virginia State Teachers' College and the University of Alabama, and negotiations are taking place with the University of Florida, Rutgers University of New Jersey, Virginia Polytechnic Institute, Virginia Military Institute, Clemson College, Wofford College, Furman University, and the Alabama Polytechnic Institute.

State College will probably have representatives in the oratorical contest on the Constitution again this year, in the State Peace Contest, and in the "Know the South" Contest. The last named is a new contest sponsored by the Nashville (Tenn.) Banner for the purpose of stimulating interest in and knowledge of the South and its material and spiritual resources.

The proposition which will be used in most of the debates this year is: "Resolved, That the United States should cease to protect by armed force capital invested in foreign lands, except after formal declaration of war." This subject grows out of recent activities in Latin-America and China, and should be of special interest to students in a school where military training is established. Moreover, it opens up the entire question of peaceful relations among nations.

As the next step in carrying out this program of forensic contests, a meeting is called of all men interested in debate and oratory, to be held Wednesday noon, November 2, in the public speaking classroom, Room D, Pullen Hall. At that time Professor Cunningham will explain in detail the nature of the contests which are contemplated, and will advise how preparation for the preliminaries should be made.

COMBINED MEETINGS ARE AIM ENGINEERING COUNCIL

Unions of Local Technical Societies Are To Be Held This Year

The first combined meeting of the technical societies of the School of Engineering, comprising the student branches of the American Ceramic Society, American Society of Civil Engineers, American Institute of Electrical Engineers, American Society of Mechanical Engineers, the Architectural Club and Chemical Society, will be held under the auspices of the Engineers' Council on Tuesday evening, November 1st, at 7 o'clock. The meeting will be held in Room 101, Electrical Engineering Building, and will be in charge of the Ceramic Society.

The meeting will be presided over by C. P. Hall, president of the Engineers' Council, and the principal speaker will be Professor A. F.

SENIORS IN ARCHITECTURE TAKE TRIP TO WASHINGTON

Many Government Buildings Fall Prey to Prying Eyes of the Architects

The members of the senior class in the department of Architecture, in company with the departmental head, Professor Ross E. Shumaker, spent the major part of last week in Washington, D. C., on an inspection tour of the Federal buildings and other exceptional works of architecture.

The first day of the trip was taken up with a close inspection of the National Capitol, the Library of Congress, and the Union Station.

The Capitol, with its white dome 225 feet high, is the most conspicuous monument in Washington. This beautiful building, 751 feet in length, was finished, as it is today, in 1863. This was the beginning of the neo-classic spirit which dominates the city. It was a revival of the old Roman classic.

The Congressional Library, which is designed in the Renaissance style, was completed in 1897 at a cost of \$6,000,000.

The Union Station is characteristic of the more modern style, being completed in 1911.

The following two days were spent in visiting the National Museum, the White House, the Pan-American Building, the Washington Monument, the Lincoln Memorial Monument, the Unknown Soldier's Tomb, and the Coliseum in Arlington Cemetery.

The Lincoln Memorial has been completed during the last two years. It is a noble hall of Greek Doric, with reliefs and a colossal statue of the martyred President.

Among the other things of interest that the party did was to visit the Supreme Court, in session, and hear President Coolidge deliver an address of acceptance for the "General Gordon Meade Monument," presented to the Government by the State of Pennsylvania. Many notables were in attendance, including Governor Fisher and
—Continued on page 5.

LECTURE-ENTERTAINMENTS PROGRAM IS COMPLETED

John Cowper Powys Will Give Literary Lecture Nov. 2; Next Lecture Nov. 28

The following lectures and entertainments have been secured by the Committee on Lectures and Entertainments for the fall and winter terms:

November 2 John Cowper Powys, M.A., English novelist, poet, and essayist, will present a literary lecture. Mr. Powys appeared at Wake Forest College last season and Dr. W. R. Cutton, chairman of the lecture committee of Wake Forest, said: "State College is very fortunate in securing John Cowper Powys for 1927-28." Mr. Powys will probably lecture on one of the three following subjects: The Psychology of Modern Literature, Modern American and English

State Teams Have Won But Two Grid Games From Univ.

BAPTISTS HERE THIS WEEK FOR ANNUAL MEETING

State and Meredith Colleges Are Hosts for Three Days

SEVERAL OUTSTANDING SPEAKERS ARE PRESENT

Sessions Will Be Held in Pullen Hall Here and at Meredith for Three Days—Aim to "Make Christ Master of Our Generation."

North Carolina State and Meredith Colleges are hosts during the weekend to over 500 students, workers, student secretaries, and representatives from North Carolina colleges of the State Baptist Student Conference. Thursday, Friday, and Saturday, October 28, 29, 30, are the three days of the convention.

Last year at the Southern Baptist Student Conference, held at Birmingham, it was decided that similar conferences should be held in each southern state during the months of October and November, for the purpose of carrying out the challenge received at Birmingham to "Make Christ Master of My Generation." Taking as the keynote of the North Carolina state conference, "Christ Adequate," they are striving for a rededication of the lives of all the students of this generation to Christ; for a new vision of the missionary spirit; for a burning zeal for soul-winning; and for a quickening gleam of Christianity.

This conference is promoted jointly by a state student committee, of which Mr. B. Paul Caudill, a student at Wake Forest College, is chairman; by the Inter-board Commission; and by the General Board of the Baptist State Convention. Among the outstanding speakers for the conference are: Dr. George Leavell, China; Dr. Wm. Russell Owen, Coral Gables, Fla.; Dr. J. E. Dillard, Birmingham, Ala.; Dr. A. J. Ellis, Raleigh; Dr. Clyde Turner, Greensboro; Dr. Chas. E. Maddy, Raleigh; and Mr. Frank H. Leavell of Memphis, Tenn., who is

ANNUAL CLASSIC USHERS IN "HOME-COMING DAY"

Prizes Given by Local Concerns To Be Awarded for Best Decorated Fraternity House

When Wolfpack meets Tar Heel on Riddick Field, October 29, Homecoming Day for N. C. State College will be officially ushered in. Alumni of this institution will find many new features celebrating their return to the campus.

All national and local Greek-letter fraternities have been asked to decorate their respective homes in the colors of their fraternity and in the blue and white of the University of North Carolina. Duff-Gore Music Co. has offered a prize of six of the latest victrola records to the fraternity whose home is the most artistically decorated on this date.

There is also the probability that a silver loving cup will be donated by a local concern. Competition for this cup will be an annual affair, and permanent possession will be acquired by three years of successful competition.

All activities on Homecoming Day will be sponsored by "The Golden Chain," honorary fraternity in this institution. The members of this organization will act as judges in the decoration contest, and will occupy special seats at the game.

First Game Between Two Schools Played in 1894

RELATIONS SEVERED FOR PERIOD FROM 1905 TO 1919

Records Show Techs Won Only Games in 1920 and 1921—State College's Team Which Won Southern Championship Did Not Play the Tar Heels.

(By C. R. Baugham, Jr.)

It was in 1894 that Carolina and State first met on the gridiron—Carolina then, as now, one of the foremost teams in Southern football circles, with State College then hardly more than a prep school. A and M, as State College was then called, boasted of two buildings and fewer than a hundred students, but was ambitious in a football way.

From 1894 until 1899 the A. and M. teams failed to cross the last white line, but in '99 the dope bucket was upset with a 11-11 tie. Carolina won again in 1901, but from 1902 to 1905 there was a succession of scoreless ties. In 1905 athletic relations between the two teams were severed, and from then until 1919—fourteen years—the teams did not meet.

It was during this fourteen-year period, from 1905 to 1909, that the smile of the great god fame shone on the team from North Carolina Tech, now A. and E. During this period A. and E. listed among her victims Georgetown, the Navy, and teams of equal fame, and was southern champion several years. The Red and White, the old student publication at State College, heaped lavish praise upon the team for her victory over V.

BERZELIUS SOCIETY NOW CHEMICAL ENGINEERING

R. P. Haywood Chosen as President—Adopt Constitution at Tuesday Meeting

The State College Chemical Engineering Society met Tuesday night in Winston Hall for the purpose of adopting a constitution and the election of officers.

This society is the outgrowth of the Berzelius Chemical Society of former years. It is composed of chemical engineering and chemical students.

A committee which had formerly been appointed submitted a constitution. It was read, discussed, and adopted.

The following officers were elected: R. P. Haywood, president; O. J. Williams, vice-president; B. J. Koston, secretary; W. T. Maxwell, treasurer, and H. W. Sigmon, reporter. A program and a publicity committee were appointed by the president. Dr. Randolph discussed a movie of slides to be given at the Y. M. C. A. Saturday at 6:30 p. m. He also discussed the importance of getting industrial men to address the society. The fact that 42 students were present is an indication of a good year.

NOTICE!

The first combined meeting of the six technical societies of the School of Engineering will be held on Tuesday evening, November 1, at 7 o'clock, in Room 101, Electrical Engineering Building.

All engineering students and members of the faculty are invited to attend the illustrated lecture by Professor A. F. Greaves-Walker on "Modern Types of Brick Construction."

SIREN AND FIRE BELLS CAUSE UPROAR TUESDAY

Students Scantily Garbed Seek Cause; Find Meredith Safe From Perils of Fire

"Great balls of fire!" caused a pajama parade to Meredith College Tuesday night.

"Fire! Fire!" was the cry. "It's Meredith!" And from the dormitories poured streams of State boys in various stages of undress. They piled in fivers, on motorcycles, and—Meredith bound!

It happened this way: The usual serene tranquillity reigned at State about 9:30 Tuesday evening, October 25. Suddenly fire bells and the sirens of fire trucks broke the quietness of the night outside. The trucks seemed so near and the sirens so loud that several saw reason to investigate.

From the third floor of South Dormitory some one saw a tremendous blaze that lighted up the sky in the

northwest. It appeared not just in the general direction of Meredith College, but at Meredith itself.

"Fire! Fire! Meredith is on fire!" shouted some one. The cry was taken up, echoed throughout the building, and spread to other dormitories.

"Fire!—Meredith!"

One would have thought South Dormitory on fire. They came out in masses; some were dressed, but most were in various stages of undress. It seemed there had never been so many boys in their rooms at that hour. Pajamas of the "noisy" variety, and—just pajamas! Some were barefooted; others wore no shirts.

They piled into whatever means of conveyance was at hand; some ran toward Hillsboro Street. Half the student body of State seemed gathered in front of Patterson and Ricks halls. The fellows from 1911 Dormitory were there!

Hillsboro Street was congested with speeding cars.

Then came surprise. It was not Meredith, but a barn a few hundred yards from Meredith. The blaze was huge, a "barafire" in the true sense. The crews of two fire trucks fought the fire with chemicals, but the barn was lost.

Meredith was quiet. The large buildings loomed up in the shadows cast by the flames, lights sparkled through the windows, and no great excitement was apparent from the scene of the fire.

"False alarm!" said some one.

"False alarm? The man's losing his barn!"

"Meredith is safe!"

"Allah be praised!"

The road in the Wilmont section which the crowds had followed in attending the fire was so congested that it would have been quite impossible to return the way one came. It was necessary to complete the circuit of Meredith, following the old road back of the buildings, which came into the college driveway, thence led to Hillsboro Road.

The driver of one car, clad in pajamas, bath robe and bedroom slippers, was heard to say when he had reached Meredith driveway:

"Well, this is one time I have checked Meredith in pajamas!"

"Scandal!" hissed one on the back seat.

"Hush the scandal!" whispered another, very dramatically.

It all happened in a few minutes, and soon most of the State fellows had separated from the townspeople, returned to their rooms, and then night fell "in earnest."

Laura LaPlante, Universal's beautiful blonde star, will be seen on the screen of the State Theatre next Monday and Tuesday in her latest release, "Silk Stockings."

This is a story which is admirably suited to Miss LaPlante's unique talent as a comedienne. She has always scored her greatest successes in light farce, and "Silk Stockings" is an ideal vehicle.

Miss LaPlante became a comedienne by chance. Her first real roles were leads in very serious Western melodramas in which she played the innocent country girl beset by the villain and all his henchmen.

The last word in embarrassing moments is to have an ace of hearts found tucked up your sleeve just after you have taken in nearly every chip on the table in a big poker game.

This delicate problem is said to be enacted most convincingly by Adolphe Menjou in "A Gentleman of Paris," his new Paramount vehicle which will be shown at the State Theatre next Wednesday and Thursday.

Menjou's role is that of injured innocence. He doesn't know how the card got in his sleeve, but neither do any of his friends, and they feel that the only decent thing for him to do is to kill himself. Menjou retires to his room with a pistol, and when the pistol is exploded the mystery of the hidden card is explained.

"Mare Nostrum" (Our Sea), which will have its first showing at the Capitol Theatre Monday and Tuesday, is Rex Ingram's first production to be released for two years. The youthful director was compelled to take a year's vacation following the filming of "The Arab." After his recovery he went to Europe and there spent a year producing "Mare Nostrum" on the original locations described by Blasco Ibañez in his famous book. Alice Terry and Antonio Moreno have the leading roles in this Metro-Goldwyn picture.

"Wolf's Clothing," the Warner Bros. production starring Monte Blue, which comes to the Capitol Theatre on Wednesday and Thursday, is a screen version by Darryl Francis Zanuck of a story by Arthur Somers Roche. It deals with the adventures of a subway guard on a wild New Year's Eve in New York.

Patsy Ruth Miller is featured in the supporting cast, which includes John Miljan and Douglas Gerrard. The picture was directed by Roy Del Ruth.

In preparation for her role of "Tillie" in "Tillie the Toiler," her latest Cosmopolitan production, coming to the Capitol Theatre next Friday, Marion Davies read exactly seven hundred and twenty of Russ Westover's comic strips, on which the film play is based. In this manner she became thoroughly acquainted with the character of the little stenographer-heroine of the "funnies." The picture, which was directed at the Metro-Goldwyn-Mayer studio by Hobart Henley, is coming soon to the Capitol Theatre.

Casting of the role of George Washington in Tim McCoy's new Metro-Goldwyn-Mayer production, "Winners of the Wilderness," to be shown at the Capitol Theatre Saturday, is said to have been attended by more difficulties than has ever before presented itself during the casting of a film role. Edward Hearn was selected after research work of some three months gave inkling to the appearance and habits of Washington at the time he

was a major of Virginia militia in service of the British crown.

A face too valuable to wear a beard! That's why you always see Charlie Murray "bare-faced" on the screen.

In "The Life of Riley," a riotous comedy featuring George Sidney and Murray at the Superba Theater Wednesday and Thursday, the latter was to have worn typical farmer chin whiskers, according to the story written especially for the comedy team by Mann Page.

His unadorned face is Murray's fortune, and like his partner Sidney—and unlike many comedians—no "trick" beards or mustaches are needed to make his classic "map" funny.

When the news leaked out that the Maynard production unit sought a bevy of feminine pulchritude as a feature of "Fighting Courage," the stunt drama that comes to the Superba Theatre Friday and Saturday with Ken Maynard, the big Texan who carries the toga of world's champion circus and rodeo rider, as star, they were so deluged with Hollywood beauties that choosing the group was something akin to being turned loose in the treasure room of an Indian prince with carte blanche to select six articles one wants more than anything else.

Kampus Komiks

"Where are you going, my pretty maid?"

"I'm going a-necking, sir," she said.

"Lee, the undertaker, was run over by an auto and died."

"He didn't make much on that funeral, did he?"

"No. In fact, he went in the hole."

Professor—So you said that I was a learned jackass?

Freshie—No, sir; I simply remarked that you were a burro of information.

"Ah suah does pity you," said the colored pugilist to his opponent, as they squared off.

"Ah was born with boxing gloves on."

"Maybe you was," retorted the other, "and ah reckon youse going to die de same way."

If skirts get any shorter, somebody's bound to think of puttin' a handle on em and usin' 'em for a parasol.

Bolick: Why does a rooster stand on one leg in the rain?

Runt: Any fool knows if he lifts the other foot he'll fall down.

B: Hunting is a popular sport nowadays.

C: Hunting what?

B: Oh, well, most anything.

When a girl doesn't wear a transparent dress, then there's nothing worth seeing.—Polytechnic Reporter.

Many an accident has occurred because the man at the wheel refuses to release his clutch.—Florida Flambeau.

Student: Have you forgotten that you owe me two bucks?

Dr. No: No, but give me a little time and I will.

Sailor: P-p-p-p.

Captain: Well, sing it if you can't say it.

Sailor: Should ole acquaintances be forgot and never brought to mind—the bloomin' cook's fell overboard and its twenty miles behind.

Teacher: What does unaware mean?

Susie: It's the last thing you take off at night.

Some editor tells us about a certain American girl who, in disgust, said to her English escort, "Oh, Percy, you

WOLFPACK WINS OVER FLORIDA 12-6

State Wolves Invade Florida and Win 12-6

Jack McDowall Shining Star In State Win Over 'Gators

STATE PLAYS CAUTIOUS IN FIRST THREE PARTS

Godwin Scores First Touchdown and McDowall Adds the Second; Owens Crosses the State Goal Line for Only Florida Score; Warren, Childress, and Jordan Star for State; Crabtree Mainstay for Alligators.

(By T. A. Vernon)

The Wolfpack invaded the Alligator pond at Tampa, Florida, last Saturday, and came off with the long end of the 12-to-6 score in the game with the University of Florida Alligators. Jack McDowall was as usual the shining light in the game.

State opened up the game playing safe, and it was not until the fourth quarter that either team scored. State drew first blood when by a series of brilliant passes and end runs they had advanced the ball to the three-yard line. The feature play that carried the ball to the line was a long pass from McDowall to Childress that netted thirty yards.

Warren hit the line three times with but little gain, so "Sparky" Adams called the men for another line play, but it was not through the line. It was Frank Goodwin's favorite touchdown play. Goodwin loafed across the line and with waiting arms took the pass from McDowall that crossed the last white marker on Plant Field.

Later in the quarter McDowall grabbed a pass from the air that some luckless Florida back had let slip, and raced seventy-five yards through the entire 'Gator defense. His run drew applause from the eight thousand people who visited the fair grounds in the west Florida metropolis.

On the kick-off after the touchdown, Tommy Owens, a speedy substitute who had been rushed in the game, received the ball on his twelve-yard line and raced eighty-eight yards through the Wolfpack for the only Florida score of the day. With but three minutes to play, the Floridians started a desperate rally centered around the feet-tooled Owens. Their air attack failed under the desperate defense of the State eleven. Before they opened the aerial attack, Owens grabbed the ball and raced thirty yards before being brought down by Ridenhour after he had been slowed down by McDowall.

Jack McDowall, a native of Gainesville, returned to his state and showed them that he could strut his stuff. Bob Warren was a big aid in the Tech backfield. His hard plunges were the feature of the line attack. Goodwin and Childress, ends, played havoc with the Florida plays.

State opened the game by playing cautiously, never carrying the ball much. On the exchange of punts that occurred frequently in the first half, State always had the better end of the bargain. Penalties played a big part in the game. Referee Springer was no laggard. His early training at Pennsylvania taught him that there should be no wasting of time. State suffered several penalties for wasting

—Continued on page 6.

STATE-V. M. I. FRESHMEN TIE ON RIDDICK FIELD

Wolffets Show Much Power But Are Unable to Down the Visitors

In a seesaw game that had no definite result the V. M. I. Freshmen and the State Yearlings battled back and forth on Riddick Field Saturday to arrive at a scoreless tie. The State Freshmen threatened to score four times while the Virginians had but one chance.

The two outstanding players of the afternoon were Manushlak for the State Yearlings and Mann, a former Rocky Mount High School star, for the Virginia first-year men. Manushlak, the choice for captain, played a head-up game at left tackle; few plays coming in his direction got beyond the line of scrimmage. Mann was the outstanding ball-toter for the visitors.

The Wolffets showed plenty of power, but were unable to uncover enough at one time. This was the first appearance of the State first-year men trained by Coaches Drennen and Passalacqua. Furtado and Wright played corking good games at end for the State men. Furtado's tackling was especially good.

In the matter of first downs both teams were about equal. The Wolffets clawed out nine while the visitors got only eight. The State men were inefficient in the air, completing but one out of ten passes for a one-yard gain. The Rats did better, completing three out of four for thirty yards.

JACK McDOWALL

Speedy halfback star of many conflicts will show heels to Heels as he did to Florida.

The Wolves took two bites of Alligator, and Tommy Owens, star player from the University of Florida, took one good look at the Wolves and was so scared that he went through the whole back and never made a single stop. His 88-yard dash through the whole Wolfpack was one of the best the writer has seen since he saw McDowall run 95 against the Duke eleven last year.

Talk about college spirit, but the Florida people have college spirit. Tampa is one hundred and fifty miles away from the University, but that did not keep the entire student body of that school from going to Tampa for the game last Saturday. The shopkeepers in the west coast metropolis had their stores decorated in Blue and Orange for the home team and Red and White for the State eleven. That's college spirit. How about a little more in Raleigh and at State College?

E. G. Moore, the ex-editor of this journal, is now at the University of Florida, and was so kind as to send us a clipping from a Jacksonville paper. The sports editor, Sam Butts, in his column "Is, Ands, and Buts," praises Jack McDowall very highly, and mentions that he is of All-Southern calibre. We have long thought the same thing, but now we know it.

Have you ever heard of a college executive that had the audacity to propose to a meeting of college men (executives) that self-help students be barred from participating in athletics? We have. Some one of some little one-horse college that does not have a chance in athletics is trying to bring his school up to the front in the way it seems to us. We do not think that it is fair, and if it is passed we shall raise a ruck about it in our little column.

Carolina is here Saturday. They were there last year, after having played the annual Fair Week game here for several years in the past. Let us hope that they will go back to Chapel Hill none the worse for the adventure into the 'Pack's lair. Of course they will leave their string of victories with us. The Wolf has not beaten the Tar Heel since the year 1921. Now it is time.

Outstanding among the men that the Wolves will have to face in the Tar Heel scrap is Harry Schwartz, the center. Harry is mentioned in southern circles as the best center in the South. Just wait until Bill Metts gets through with him.

Let us pause right here and give praise to one who has not received any before this year. Frank Goodwin is the man in mind. This elongated, rip-roaring end has proved deadly to all comers. He softly swoops across the goal line and grabs a pass—presto, a touchdown. His running-mate, Don Childress, is equally as

FRANK GOODWIN

This lanky end has been a star in all his appearances this year and will deliver against the Heels.

CATAWBA HEAD WOULD BAR ALL SELF-HELP ATHLETES

Dr. Elmer Hoke Presents Such a Proposition to North Carolina College Conference

(Note.—This is a reprint from the News and Observer of October 26. An editorial in that journal the next day severely criticised the plan.—Editor.)

Durham, Oct. 25.—No self-help student having a job in a university or college of North Carolina will be eligible for participation in college athletics should a recommendation made by Dr. Elmer H. Hoke, president of Catawba College, in the opening session of the ninth annual meeting of the North Carolina College Conference here today, be adopted. Striking deep down into athletics of the higher institutions of learning, Dr. Hoke, through his recommendation received by the conference in writing, due to the inability of its author to attend, would make it impossible for any student receiving pay from his school for any job performed to play on any of the college teams.

The fate of the recommendation, which the conference right willingly passed on to the athletic committee, following its presentation to the conference body by the executive conference, will be decided tomorrow. The intent is to check the apparently growing offers to outstanding athletes for the purpose of building up strong varsity teams.

However, all students working their way through school, regardless of the means, would be debarred from participation in athletics, and it would be possible for only those students more favorably situated financially to go out for the various teams.

The presentation of the Hoke recommendation, one of four offered by the Catawba head for consideration of the conference, aroused more interest in the session than probably anything else that has yet been presented. His other recommendations were to increase the fees in all institutions of learning in order that the smaller institutions might stand a better chance of competing with the state-owned and state-helped colleges; that colleges discontinue any and all advertising, and that the soliciting of students for any purpose be forbidden.

The conference began this morning with a meeting of the executive committee, followed by an afternoon business session and an evening meeting, featured by the address of the president, Dr. W. A. Harper, head of Elon College.

good, so do not be prejudiced. Jordan is another up-and-coming youngster.

We got to Florida! How we got there is our business. How we will get to Durham Armistice Day is some more of our business. But when we get ready to go to Greensboro—look out, Seaboard! Here comes the Sports Editor.

"Do you believe in the survival of the fittest?"

"I don't believe in the survival of anybody. I'm the undertaker."
Boston Transcript.

"SPARKY" ADAMS

Plucky little quarterback who will lead the attack against the Heels.

Father—Son, what does this 60 on your report card mean?
Son—I don't know, unless it's the temperature of the room.

Freshman Nominations

Candidates will be nominated for Freshman Class officers Wednesday, November 2d, at the regular assembly in Pullen Hall. C. S. TUCKER, President of Student Body.

FIFTY MEN ANSWER CALL FOR SHOOTING DIVISIONS

Captain Higgins Gets Good Response to His Request to Underclassmen

When Captain Ernest A. Higgins issued a call to candidates for the rifle team about fifty aspirant young shooters answered.

So far little actual shooting has been done due to the fact that the ranges are not in readiness. The indoor range is being worked over and new targets are being installed.

The freshmen, with the aid of pick and shovel, have spent three evenings in leveling and grading the outdoor range. When this work is completed and the ranges are put in good shape, the men will begin preliminary shooting. In all probability the elimination matches will be run off the latter part of next week.

ECOLOGY GROUP TAKES A TRIP IN EAST CAROLINA

Following up the idea that this is a co-educational school, Dr. Wells took his class in Ecology and four women from town on an excursion through the eastern part of the State last week-end. This was done in order to study the ten major ecological communities of Eastern North Carolina.

CAPTAIN NICHOLSON

"Bartemus" will lead the Wolves against the Heels.

YEARLINGS PLAY WAKE FOREST FIRST-YEAR MEN

Freshman Line-up Changed for Hard Scrap With Baby Deacons

The Wolffets are to meet the Baby Deacons on Gore Field Friday at 2:30 p. m. The Wolffets have been under fire once, and now they are ready to take the Deaconlets in hand.

Coaches Drennen and Passalacqua have been busy ironing out the rough spots in the Wolffets' attack, and they have them primed for the fray. Wright has been switched to the backfield and Tucker has taken his place. This is the only change that has been made in the line. The line will be a tough nut for the Wake Frosh to crack. The backfield is to be changed around a bit, but Trask, that speedy little back, will still be in his place it all goes well.

The Baby Deacons have played three games and have been trounced twice. The Duke Fresh took them in hand to the tune of 7-6, and the Wilmington Light Infantry charged to a 17-6 victory. The Deacons, however, came back strong and defeated the Campbell College varsity 35-0. The Wolffets will have some strong opposition on Gore Field.

Wolffet line-up is as follows: Left end, Tucker; left tackle, Manushlak (C); left guard, McNeil; center, Stout; right guard, Hatcher; right tackle, Burdell; right end, Furtado; quarter, Sikes or Kerr; left half, Trask; right half, Edmundson or Fitzgerald; fullback, Wright or Hargrove.

FINE SENTIMENT BY LOCAL COURT AT CALL SESSION

The Court of Customs held a call meeting on Tuesday night in the Y. M. C. A. at which time several cases were tried.

Three freshmen were accused of not speaking respectfully to upperclassmen. Two of them pleaded guilty and the other, not guilty. The judge, U. G. Hodgins, sentenced one to carry his books to class for a week in a suit case, and the other to recite the freshman rules in the dining hall Wednesday. The freshman that pleaded not guilty was given a trial. After the facts in the case had been presented, the jury returned a verdict of guilty in the second degree. The freshman was sentenced to run a gauntlet of 50 sophomores, 25 on each side, on Riddick Field.

Two other freshmen were accused of not wearing the authorized freshman caps, and were found guilty in the first degree. They were sentenced to run a gauntlet of 200 sophomores, 100 on each side.

Atkins—You were at a terrible disadvantage when you met that bear without your gun.
Ivey (the famous hunter)—Yes; I was a stranger in the country and didn't have any road maps.

INSTALL OVERHEAD TRACK IN POLK LABORATORIES

New Arrangements Expected To Be of Assistance to Students in Neat Work

For the past two or three weeks an overhead track has been under construction in the west laboratories of Polk Hall.

This will be a great help to the students in the meat courses, as it will save carrying the dressed hog and beef carcasses. The track will also mean a great saving of time to the students.

This overhead track runs from the killing laboratory to the cutting room and thence into the refrigerating room.

The hog or beef may be skinned and dressed while hanging on the track. After it is dressed it can be rolled very easily over into the cutting laboratory where it can be cut up. After the meat is cut into the various pieces it is then rolled into the refrigerating room where it can be kept at the desired temperature.

The exact cost of the track has not yet been made known, but an estimate would place it at several thousand dollars.

The track has been needed for several years, but it seems that there have never been funds enough to install it.

MEAT-JUDGING TEAM TO BE ORGANIZED AT STATE COLLEGE IN THE FALL

A new judging team will be started at this college next fall, and already many of the Juniors in Agriculture are looking forward to a place on the team.

This will be the Meats Judging Team. It will judge hog, beef, and mutton carcasses while fresh, and also smoked meat.

The team will go to the National Meat Show, which probably will be held in Chicago, Ill., or St. Louis, Mo.

It will be a fine trip, and the boys specializing in Animal Husbandry who are taking Farm Meats I or Farm Meats II this term are looking forward to the beginning of the training period.

Lecture-Entertainment Program Is Completed

Poetry, Living English and American Novels.

November 28 Harold R. Peat, internationally known as Private Peat, will lecture. His subject will probably be, "The Inexcusable Lie." Private Peat served his country in the World War, but does not believe in warfare as a means of adjusting differences. "The Inexcusable Lie" is a stirring appeal for international understanding and harmony among the nations.

December 9 Horace Ashton, who was appointed by the Secretary of the

Navy as special observer for naval intelligence to accompany the ship "Los Angeles" on her flight to Porto Rico and the Virgin Islands, will tell of life aboard the great ship, of the intricacies of the rigging and the operation of the ship. He tells of the difficulties of aerial navigation in a lighter-than-air ship as compared to aeroplanes, and the effects of climatic changes on helium gas. This lecture will be beautifully illustrated.

January 23 to 26 the Imperial Quartet of Chicago will appear in a concert in Pullen Hall. The Imperials may be heard through their Victor records and their popularity is indicated by the large number of return engagements they have filled during the last ten years.

The series will close on February 7th with a popular and novel musical program by Fiecht's Tyrolean Yodlers. This concert is made up of varied folk and yodle songs, Tyrolean, Swiss, and American songs. The program will be varied with numerous instrumental numbers played on instruments popular in the yodlers' native land.

This series of entertainments and lectures is made possible through the library and lecture fee, which is paid by each student when he enters State College.

Baptists Here This Week For Annual Meeting

(Continued from page 1.) the executive secretary of the Inter-Board Commission. Student representatives from the different schools will have a large part on the program.

The opening session Friday night and the Saturday morning session will be held at Pullen Hall. The guests are invited to Meredith College for the afternoon session, at the close of which an informal tea will be given by the Meredith students in the college parlors. Following this, a Halloween dinner will be served to the conference in the Meredith dining hall. The Saturday night session and the sunrise prayer service on Sunday morning will also be held at Meredith; the closing session Sunday morning taking place in Pullen Hall.

The boys are to be entertained by the State students and the girls are to be the guests of the Meredith students. The president of the B. S. U. at Meredith, Madeline Elliott, in behalf of all the students, wishes to extend to all the students and workers of the state a hearty welcome. To the girls who will be the guests in the dormitories a special welcome is given. They are looking forward eagerly to their coming, and praying that the conference may be of value in bringing forth a realization of the aim: "Christ Master of Our Generation."

ties throughout the United States. The fraternity is one of the oldest of its kind in the country, and it represents the qualities of the ideal American college student.

The new officers were also elected at the time of the election of new members. The new officers were: Dr. Z. P. Metcalf, president; Prof. W. A. Anderson, secretary and treasurer, and Dean E. L. Cloyd, historian. The vice-president will be chosen from the newly elected members.

The initiation of the pledges will be held in the college Y. M. C. A. November 7th at 6:30 p.m. Following the initiation, a banquet will be held to welcome the new men.

Collegiate Press Association Holds Meetings In City

(Continued from page 1)

2:45—Address by J. C. Baskerville, correspondent for the Associated Afternoon Papers.

3:15—Business session.

4:30—Tour of Raleigh or fraternity dance at Frank Thompson Gymnasium.

8:30—Collegiate Press Association banquet, Yarbrough Hotel.

10:30—Fraternity dance at Frank Thompson Gymnasium.

The program for Saturday includes: 8:00—Breakfast.

9:00—Committee reports; minute reading.

10:00—Address by J. L. Horne, Jr., president of the Associated North Carolina Press.

10:45—Group meetings in separate rooms at State College "Y": Jonathan Daniels, newspaper group; A. M. Beck, annual group; Herbert Ruffin, magazine group.

12:15—Final adjournment.

1:00—Lunch, State College Dining Hall, west wing.

2:30—State-Carolina game.

9:00—Fraternity dance at Frank Thompson Gymnasium.

The officers of the association are: president, H. L. Hester, Duke; first vice-president, David D. Carroll, U. N. C.; second vice-president, Ann F. Johnston, Queens; secretary, Frances G. Gibson, N. C. C. W.; treasurer, A. L. Aydtett, N. C. State.

A young man had a fine collection of East African trophies, and amongst them a splendid buffalo head.

"What a wonderful head," said a girl. "How did you get that? Was he very savage?"

Combined Meetings Are Aim Engineers' Council

(Continued from page 1)

Greaves-Walker of the department of Ceramic Engineering. His subject will be "Modern Types of Brick Construction," and will be illustrated. As at some time during his career every engineer uses brick in construction, it is anticipated that this subject will attract a good attendance.

This will be the first of six combined meetings sponsored by the Engineers' Council during the college year, each of the technical societies having charge of one meeting. It is planned to have some of the foremost engineers of the country as speakers.

All engineering students are urged to attend, and an invitation is extended to all interested residents of Raleigh.

State Teams Have Won But Two Grid Games From UNC

(Continued from page 1)

M. I. and a consequent southern crown.

Resume Play

In 1919 the teams again fought it out during Fair Week, Carolina getting the long end of a 13-12 score. But 1920 saw a different tale. That year State won her first game between the two state-supported institutions by a score of 13-3.

In 1921 State took what was to be her last Fair Week victory for several years. The climax of the game came when the gigantic Sammy Homewood, State's star end, cracked "Runt" Robbins Lowe and caused him to fumble, and thereupon "Runt" Faucette, brilliant State quarter, recovered and ran for a touchdown, the only one of the game. Faucette kicked goal for a 7-0 victory.

The next year saw Carolina's undefeated Southern Conference team given the score of the season. Carolina was leading 7-0 when State scored a touchdown, but failed to kick goal. Then the ever-surprising Bobby Long kicked a 47-yard gall-kick from a difficult angle. This gall-kick went to naught when Monk McDonald stepped off 95 yards on the kick-off to score and give Carolina a 14-2 victory.

The next few years saw the sunshine resting on Carolina with four shut-out victories over State. In 1923 the score was 14-0, in 1924 it was 10-0, and the next year netted Carolina a 17-0 victory. All of these games were played on Riddick Field as a feature of the State Fair. In 1926 the scene shifted to Emerson Field at Chapel Hill, but it didn't change the results, and Carolina won, 12-0.

Since 1921 State has had teams that scaled the peaks and dropped again to the valleys of deepest failure and dis-

appointment. This year State has a team that has walloped Elon, smashed the Clemson Tiger, battered the Wake Forest Deacons, and last Saturday took two bites of Alligator meat to defeat Florida by a 12-6 score. Over against this must be placed a 20-0 defeat administered by the Purple Hurricane of Furman.

Carolina has had good teams in the past few years, but this year the outfit has been dubbed the "Mystery Crew." A defeat by Wake Forest, a worse one by Tennessee, a victory over the strong eleven of Maryland, a loss to South Carolina, and a "heluva" scrap with the Golden Tornado of Georgia Tech is the year's work so far.

Seniors in Architecture Take Trip to Washington

(Continued from page 1)

ex-Governor Pinchot, both of Pennsylvania. On Tuesday the students had the unexpected pleasure of seeing Colonel "Charlie" Lindbergh take off for Baltimore in "The Spirit of St. Louis."

The party returned to Raleigh the latter part of the week. Many of them visited Baltimore and the Naval Academy at Annapolis. Those who made the trip were: Professor Ross and E. Shumaker; G. P. Hall, C. Z. Bailey, J. M. Wootten, W. A. Cox, Jr., E. M. Kearney, S. V. King, E. M. Inesco, and H. L. Sullivan.

Resists Corrosion

THIS picture, taken in the salt marshes near Kearny, N. J., shows two lines of 30-inch Cast Iron Pipe replacing pipe made of other material. The alternate exposure to the action of salt water and air is a severe test.

While the pipe shown in the picture is subjected to unusual corrosive influences, all underground pipe must be able to withstand corrosion to a greater or less degree. Cast Iron Pipe has this quality. It does not depend on its coating to resist rust; the material itself is rust-resisting. The first Cast Iron Pipe ever laid is in service today at Versailles, France, after two hundred and sixty years' service.

CERAMICS STUDENTS HAVE BENEFICIAL SUMMER WORK

Good Reports on Progress of Men Made to Head of the Department

Reports on summer work made to Professor A. F. Greaves-Walker of the department of Ceramic Engineering, by students in that department and their employers, indicate that all of them spent a most instructive and, in most cases, enjoyable summer in the ceramic plants throughout the country to which they were assigned.

F. E. Trevathan, '28, spent the entire summer at the plant of the Homer Laughlin China Company, Newell, West Virginia, in the center of the largest whiteware district in the country. He was employed as a foreman in charge of a construction gang erecting a railroad tunnel kiln, the most modern piece of burning equipment known to the ceramic industries. Trevathan was fortunate in being thrown in contact with some of the foremost ceramic engineers in the country during his stay in Newell. Trevathan had an excellent record.

F. S. Hardee, '28, was employed as plant foreman at the Selma Brick Company, Selma, N. C., and made a splendid record, being given credit for making a decided improvement in the products. So pleased was the company with his work that he has been offered the plant superintendency upon graduation in June.

J. E. Boyd, '28, also employed by the Selma Brick Company, spending most of his time in the plant office. Boyd, spending his second summer with this company, also made a splendid record with his employers.

W. L. Stafford, '28, spent the summer with the Moland-Drysdale Corporation at Etowah, N. C., working under L. B. Whitaker, '27, who is Ceramic Engineer for the company. Stafford was highly praised by his employers.

D. L. Stuckey, '28, was employed by the Pine Hall Brick Company, Pine Hall, N. C. He was given the opportunity to work in all departments, and during the last few weeks helped to lay out the new sewer pipe plant being erected by the company. Stuckey made a good record.

F. C. Colletta, '28, spent most of the summer with the kiln-testing crew of the Mellon Institute of Industrial Research, being stationed at the plant of the Pomona Terra Cotta Company, Pomona, N. C., and later going to Louisville, Ky. He decided to remain

with the crew this year, but expects to return in the fall of 1928 to finish. A. McK. Greaves-Walker, '29, put in the summer with J. C. Steele and Sons, Statesville, N. C., manufacturers of ceramic machinery. Greaves-Walker was located in the engineering department on machine design, and his work was highly commended by A. F. Steele, '28, who is Chief Engineer for the company.

J. R. Parsons, '29, was with Colletta on the Mellon Institute testing crew, and has decided to remain out of college for a year in order to get more practical experience. He is also located in Louisville, Ky.

R. B. Stamey, '29, was employed at the Pine Hall Brick Company, with Stuckey. He also was given a wide experience, and was highly commended by his employers.

J. T. Dick, '29, was located at the Lillington Brick Company, Lillington, N. C. A shut-down of the plant in midsummer deprived him of the opportunity to gain as much experience as expected, but he reports himself satisfied with his brief stay.

J. A. Boren, '29, was employed at the Pomona Terra Cotta Company, Pomona, N. C., where he was foreman of a loading gang. Boren remained out of college this term, and is still employed on the same job.

K. Aderholt, '30, spent his second summer with the Borden Brick and Tile Company, Sanford, N. C. His employers were highly pleased with his work, and expect him to return next summer.

J. A. Pollard, Jr., '30, worked through the summer in his father's plant, the Pollard Clay Company, at Burnsville, N. C., where he was initiated into all the mysteries of kaolin manufacture.

The department is much pleased with the reports of employers on students' work, especially as several of them express themselves as having been convinced by the results that a ceramic engineer is a necessary addition to their organizations.

NOTICE!

THE WATCHMANS that have not yet been claimed by students will be mailed this week through the postoffice. Until the question or dormitory delivery is settled the magazines will be sent in this manner. It is quite possible that some copies will not be received. If you do not get yours, please see the circulation manager.—Edrons.

BEN DIXON MACNEILL IS INJURED IN AUTO WRECK

Well-Known at State for His Friendliness and for His Sarcasm

Ben Dixon MacNeill, star reporter of the News and Observer, suffered what the doctors thought at first examination to be a fractured skull when the Chrysler roadster in which he was riding collided with other cars near Smithfield Thursday night.

He was on his way to Fayetteville to see the monster air fleet arrive at Pope Field on its way to Augusta, Ga. where a new municipal airport will be opened.

Mr. MacNeill is well known to State College students both for his friendliness and for his sarcastic remarks in his column, "Cellar and Garret."

GOV'T OFFICIAL GIVES A LECTURE ON BEETLES HERE

J. L. King, of the United States Department of Agriculture, who is in charge of research work of the Japanese Beetle, spent some time on the campus this week lecturing on the beetle.

The Japanese Beetle is a bug that destroys the foliage of most farm crops and fruit trees. The nature of infestation can be judged somewhat by the amount that the Federal Government is spending yearly to eradicate this pest. The Government spends yearly \$600,000 trying to find means of ridding the country of the pest. The central laboratory is at River-town, N. J. The most effective means found yet to combat the pest is one of bringing parasites from Japan that will feed on the beetle.

Mr. King spent three years in Japan in an effort to find such parasites that would feed on the beetle. At this time he has found six of these parasites that are effective and two or three that will reproduce here. The heaviest around Philadelphia, but if the beetle area of infestation is in Pennsylvania is not controlled it will spread rapidly throughout the country and thus be a great menace to farming. Mr. King seems to have worked out the life history of the beetle pretty thoroughly, a fact which is highly essential for the control of any pest.

BAILEY DELEGATE OF TAU BETA PI TO COLUMBUS, OHIO

The Alpha Chapter of Tau Beta Pi of North Carolina State was represented by its president, C. Z. Bailey, at the annual convention held in Columbus, O., at Ohio State University, October 13, 14, and 15. There was a one hundred per cent representation of fifty-two chapters.

Tau Beta Pi is a national honorary engineering fraternity. The Alpha Chapter of North Carolina was established here in 1921 and since that time has played an important part in the school of engineering.

At the convention problems of national importance were taken up and plans made to aid in the solution of these problems. Even though business came first, the social end was not neglected. The Gamma Chapter of Ohio State University entertained at a luncheon, smoker, formal dance, and banquet. The delegates were also guests of the athletic department at the Ohio-Northwestern football game. On the return trip Mr. Bailey joined the architectural-seniors of State College at Washington.

Wolfpack Wins Over Florida, 12-6

(Continued from page 3.) time when they really thought that they were doing the right thing.

The defeat was the first Conference loss for the Southerners, while State kept her Conference record clean.

The line-up:

Florida	Position	N. C. State
Vansickle	Left Tackle	Goodwin
Bryan	Left Tackle	Lepo
Allen	Left Guard	Nicholson (C)
Kirschner	Center	Metts
Reeves	Right Guard	Vaughan

Student Body Meeting

A student body meeting will be held in Pullen Hall Tuesday evening at 8:15 for the purpose of electing a student representative on the Publication Board.
C. S. TUCKER,
President of Student Body.

Edgeworth smoking is a part of college education

SELF-HELP CLUB FORMED TO AID LOCAL STUDENTS

For many years State College has needed an organization to bind into a closer brotherhood and friendships the students who are working their way through college. It has at last become a reality.

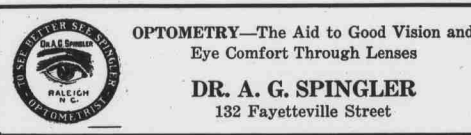

Monday night there met in the Y. M. C. A. fifteen or more who, as self-help men, came together for the purpose of organizing a "Self-help" club. The men whom they felt could best lead them were chosen as follows: J. E. Moore, president; P. S. Ballance, vice-president; H. C. Green, secretary; R. I. Mintz, treasurer, and H. J. Carr, reporter.

A constitution and by-laws were adopted. The purpose of the club, primarily, is to foster a better fellowship between the self-help men on the campus, organize and plan better

methods of getting work for the men who are in need of work, as well as increase a higher standard of work done by the self-help boys.

The State College Self-help Club, as the new organization calls itself, will cooperate to the fullest possible extent with the Y. M. C. A. in getting work for the men on the campus that need help. All men who are working their way through college are invited to come to the meetings of the club and learn what a worthy piece of work it is trying to put across to help men help themselves.

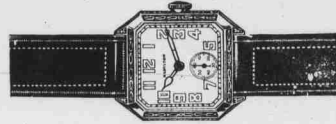

The Self-help Club will hold its meetings Monday nights, at 8 o'clock, in the Y. M. C. A. Its officers and members bid you a cordial invitation to meet with us. If you need a friend, come to any of the officers of the club, and they will be more than glad to help you in any way possible. Remember, most of them have traveled that long, lonesome road named hardship and want to make your way more cheerful.

PLAN INTRA-MURAL SPORTS FOR YEAR

Schedule Made for Competing Teams; Games Will Soon Commence

Extensive plans have been made by the Physical Education Department for intramural athletics this year. It was learned from Professor J. F. Miller, who has charge of this branch of athletics.

There will be interclass competition, which will include the faculty as well as inter-fraternity leagues and inter-dormitory leagues. The sports for the interclass competition will be as follows: soccer football this fall, volleyball this winter, and baseball in the spring.

The sophomores and freshmen have already had considerable training in soccer, and the juniors and seniors are talking daily work-outs. The schedule will start about the middle of November.

The sports for the inter-fraternity will be hand-ball in the fall, basketball in the winter, and swimming in the spring. In the hand-ball tournament the fraternities will have an elimination contest to determine who will best represent them in the regular contests which will start in a few weeks. The gymnasium will be open to the fraternity members who may wish to practice.

The sports for the inter-dormitory league will be horseshoe pitching this fall, boxing and wrestling in the winter, and track in the spring. Each dormitory will have a horseshoe pitching tournament, and the winners from these contests will meet the winners from the other dormitories. This will be the largest tournament of its kind that has ever been attempted at State College, and from the interest that has already been shown it will be a success.

A. S. M. E. INITIATES NEW MEN IN HECTIC FASHION

Thirteen Members Added to Society; President Urges Participation in Programs

Students who happened to be passing the Mechanical Engineering building recently were startled by the clash of boards, muffled cries, and the sound of hurried footsteps. Occasionally a deep growl as of some prehistoric animal out for prey would drown out the other noises and then as quickly would die out again. A second glance around would show the figures of two or three men groping blindly through the new growth of telephone poles on "Ag" hill, while another sprawled helplessly on the edge of the low roof of the Ceramic Laboratory. When the cause for all the disturbance was finally found, the curious ones shrugged their shoulders and said, "Must be the A. S. M. E. initiation." Such indeed was the case.

Thirteen new men were added to the society, twelve of them being Juniors and the other one a Senior. After the initiation, which lasted for about two hours, the entire membership gathered in Professor Vaughan's classroom for a short but very sensible speech by the president, Mr. R. M. Rothgeb, in which he urged the new members to fall right in line and help maintain the high standards of the A. S. M. E. Mr. Rothgeb pointed out that very few of the men present were active in literary society work, and that participating in the program help fill the need of most engineers—the ability to speak.

Mr. Rothgeb announced that the society would hold its annual banquet for the new members next Tuesday night at 6:30 in the basement of the First Christian Church. Mrs. L. L. Vaughan will have charge of the banquet, and her ability to feed college boys assures every one a feeling of "full" satisfaction.

The new members joining are: T. A. Grant, C. H. Jordan, W. M. Pollock, G. L. Johnson, W. D. Woodlief, W. Nixon, B. F. Walton, J. M. Adams, E. W. Worth, S. N. Tyson, F. M. Williamson, and P. E. Thomas. In addition to these Juniors there was one Senior, Mr. B. G. Gorham. It is planned to take in four other men at some early meeting, it being impossible for them to be initiated at the regular time.

If the interest already shown is any indication of the work to be done later, the Mechanical Engineering Department will be well represented in society work this year.

J. L. Campbell, J. S. Wood, J. D. Conrad, and B. J. Kopp, of the class of 1927, are enrolled in the Westinghouse Electric and Manufacturing Company graduate student course. At present, Mr. Campbell is located at the East Pittsburgh Works of this company. Messrs. Conrad and Kopp are at the South Philadelphia plant and the Mansfield Works, respectively.

EX-EDITOR OF TECHNICIAN HAPPILY LOCATED IN FLA.

Says Florida Would Be a Great State if Everglades Would Grow Agricultural Crops

A member of the faculty of State College has been favored with a communication from the former editor of The Technician, Mr. E. G. Moore, who is now connected with the Agricultural Experiment Station at Gainesville, Florida. The letter, in part, is as follows:

"The University of Florida is only 21 years old, and for that reason cannot be compared with our University from the standpoint of real scholarship. The Experiment Station is a strong unit here. They have more Ph.D.'s here than I ever saw before in one collection. Quite a number of interesting specimens, too. If we could get the Everglades to grow crops, we would have the greatest farming state in the Union. The boss thinks perhaps we can coax something to grow there eventually. Our department moved into a big new building just as I came. Our floors are waxed and are good substitutes for mirrors. Our furniture is all metal, etcetera.

"The University has a very good band, but not as good as 'Daddy' Price's according to numbers. We have over 60 men in this one. They have very stunning uniforms and make a good appearance on the field. The freshmen are 'rats' here, and the sophomores chase them quite a bit.

"The student government does not seem to be as strongly entrenched here as it is at State. The student body certainly backs the football team here.

CIVIL SENIORS INSPECT STATE HIGHWAY BRIDGE

The Senior Civil and Highway Engineering classes made an inspection trip to the Swift Island bridge across the Pee Dee River, on State Highway No. 74, on Thursday, October 20. They were accompanied by Dean Riddick and Professors Mann, Tucker, Geile, Shelton, Fontaine, and Ingraham. They reported an excellent trip.

The Swift Island bridge is of national importance to all engineers at this time, as it is being tested to destruction to determine the actual stresses under various loads. This bridge will be submerged when the new dam of the Carolina Power and Light Company, about ten miles down the river, is completed. A new bridge above the present bridge and considerably higher has just been completed.

LIBRARY GETS NEW BOOKS DURING SUMMER MONTHS

Legislature Appropriates Money To Be Used for Buying Books at Will of the Librarian

The last legislature benefited N. C. State Library. It did it when a bit of legislation was set up, entirely free of its and whens, providing for the purchase of books for the D. H. Hill Library. The money set aside is mobile, and can be used as the librarian sees fit. The aim is to supply reading of general interest.

During the summer the librarian, Mr. Capps, has been quietly purchasing books, covering every possible phase of literature. The collection of new works is interesting and makes good reading.

For instance, Somerset Maugham's "Of Human Bondage." Here is a writer that is like a cool breeze on a stuffy night. When your brain is heavy, dull, and unresponsive, read something of Mr. Maugham's. He'll stir your mind. Somerset Maugham wrote the original of "Rain," a recent headliner on Broadway.

"Java Head," by the subtle Joseph Hergeshimer, is another book in the library that is of unusual interest. Mr. Hergeshimer is for a quiet night when you feel that you would delve into the tenuous, scarcely to be laid hold of, things of everyday life. His delicate, subtle stories are excellent fare.

Something that should interest everyone that can read is Edna St. Vincent Millay's "King's Henchman," the first successful American grand opera. Too little can easily be said of this work. It is important not merely because it is first, but because it is new in treatment and development. It is something American in the arts that is successful—a variety in this age of derision of native work in fields other than the material.

RUFFNER TELLS ANIMAL HUSBANDRY MEN OF TRIP TO NATIONAL DAIRY SHOW

The Animal Husbandry Club's regular meeting, held Friday, October 21, at 6:30, was devoted entirely to an account of the trip to the National Dairy Show, at Memphis, Tenn., by the dairy cattle and dairy products judging team.

Prof. R. H. Ruffner, who accompanied the team to Memphis, gave a very thrilling account of the trip and of the National Dairy Show. Visitors were there by the thousands from every part of the country to see the cattle and dairy products. There

were about eleven hundred head of cattle, well-bred and a pleasing sight to look upon, and thousands of dollars worth of dairy products at the show. This is the first year that the show has ever been held in the South, but Professor Ruffner stated that all indications pointed toward a successful show in every way.

"They say dresses are going to be still scantier this season."

"Oh, heavens, and I've been operated on for appendicitis."

Teacher: "What does unaware mean?"

Susie: "It's the last thing you take off at night."—Yellow Jacket.

Best Article Writers To Receive Theatre Passes

The management of the State Theatre has generously promised to award to the writers of the first and second best articles appearing in each issue of The Technician passes which will admit themselves and "lady friend" to the theatre. The article which places first entitles its writer to two Keith passes. The writer of the second best article will receive two passes for the pictures shown the last of the week.

Pledge Dances
The pledge dances, which are given annually by the pledges of the social fraternities of North Carolina State College, will be given Friday and Saturday evenings at 9 o'clock in the Frank Thompson Gymnasium, with Weidemyer's Orchestra playing.
These dances will be an attractive feature for the State College alumni who will attend the Home-coming Day, for the representatives attending the N. C. Collegiate Press Convention, and the visitors attending the Carolina-State game.

Florida Entertains Football Squad
The University of Florida alumni at Tampa entertained the N. C. State football squad in a manner that cannot be surpassed.
The members of the squad were guests of the Tampa Theatre, which is one of the most attractive theatres in the country. Friday night they were invited to a dance at the Country Club on Davis Island. Saturday afternoon the Merry-makers Club honored N. C. State and University of Florida at a tea dance. Saturday evening the football teams were again honored at a dance at the Coliseum on Davis Island, which is the biggest dance floor in the world.

The N. C. State football squad enjoyed this entertainment to the fullest extent, and they highly appreciated the hospitality shown by the Florida people.
Messrs. Thomas Nelson, Jimmie Summey, Wallace Roberts, Jimmie Gaskins, Dick Godfroy, and John Warlick motored to New Bern for the week-end.

Alpha Gamma Rho Entertains
The Alpha Gamma Rho Fraternity entertained October 21 at their home on Hillsboro Street at an informal dance from 8:30 to 12:00.
The reception hall and parlor were beautifully decorated in suite for dancing. The parlor was decorated with fraternity colors and fall flowers. Punch, cakes, and minis were served during the evening.

Professor and Mrs. Armstrong acted as chaperones for the evening, while Mr. and Mrs. Beck of Raleigh and Mr. F. S. Anderson and W. V. C. Evans were special guests.
The ladies in attendance were: Miss Sarah Denson, Miss Virginia Rogers, Miss Catherine Hughes, Miss Margaret Hughes, Miss Catherine Carter, Miss Jewel Sandlin, Miss Margaret Handy, Miss Mildred Jones, and Miss Vivian Sanders.

In addition to the lodge members, the following pledges were present: Messrs. J. O. Allgood, Louis Watkins, Grover Booker, R. S. Lennon, Horace Campbell, J. R. Allen, and E. H. Roberts.
Dunlap-Faulkner
The marriage of Robert H. Dunlap of Charlotte, a well-known junior at State College, to Miss Clara Faulkner of Raleigh, took place at the office of a justice of the peace in Raleigh Monday afternoon.

The marriage came as a great surprise to all those who knew the couple. Mr. Dunlap will continue his studies at State, and Mrs. Dunlap will continue to live at the home of her parents, 212 South Blount Street.

The Phi Kappa Tau fraternity gave a barbecue Saturday, October 22, at the home of Ed. Tull, Kinston, honoring the pledges of the fraternity.
The party motored to Kinston Saturday afternoon in "Collegiate" Fords. The barbecue took place on the lawn of Mr. Tull's country home. In addition to the barbecue, salads, cakes and lemonade were served.

Sigma Phi Banquet
The Sigma Phi fraternity entertained at a banquet Monday evening at the Meremont Tea Shoppe, honoring the pledgees.
The tables were figuratively arranged and beautifully decorated in the fraternity colors of lavender and white, carried out in flowers.

Mr. A. W. Tucker, business manager of Saint Mary's School, was the speaker of the evening.
In addition to the members and pledges of fraternity the guests included Mr. Rogers, of Delta Chapter and Mr. "Spike" Hall.
The Y. M. C. A., decorated in bright-colored Japanese lanterns and crimson maple leaves, took on the appearance of an outdoor garden Monday night, and added much to the merriment of the young Presbyterian boys and girls who met there for their fall social.

Many a young fellow's heart beat fast when forty or more Pence Institute girls and the Presbyterian girls from Meredith filed into the "Y" to enjoy the evening. Punch was served in one of the large rooms where bats, witches, jack-o'-lanterns, and clusters of crimson maple leaves fairly shouted "Hallowe'en".
The "Ag" comedians, in their white pants, long scissor-tail coats and black faces, amused the young folks with their varied and well-carried-out program of songs, banjo pickings, and joke cracking. The "Ag" men's program was enjoyed by all as shown by their roaring applause.
After the minstrel, ice cream and cake were served, thus bringing the beautifully-carried-out social to a happy end as the hands of the clock pointed toward ten o'clock.

Mr. C. Z. Bailey returned Sunday from a two-weeks visit in northern cities. As a delegate Mr. Bailey attended the annual Tau Beta Pi convention at Columbus, Ohio. After the convention he spent a few days in Detroit, Mich., returning to Washington, D. C., where he met the seniors in architecture and spent several days inspecting the public buildings of the capital city.

"My Maryland" Glorifies The Tunes of "Dixie"
"My Maryland," America's own operetta, native in its story and music, a tribute to patriotism and noble characters, a glorification of the tunes of "Dixie" in the days of the war, the latest and greatest of the works of Dorothy Donnelly and Sigmund Romberg, appealing to young and old alike, a really big, sumptuous and important production, opens at the State Theatre Friday, November 4th, for a two-day run, with matinee on Saturday.

With this production by the Messrs. Shubert, America, for the first time in its history, can lay claim to what is to all intents and purposes a national operetta, and the glory of it is that it is a perfect operetta, as well. This production, with Barbara Fritchie as its central figure, and into which has been incorporated the patriotic and historic incidents of her time, is one of the most thrilling and interesting attractions that has been offered in many a day. No matter how blasé a theatre-goer one may be, he cannot be otherwise than stirred to the heights of enthusiasm by this musical spectacle and intensely absorbing drama. "My Maryland" has a record of 300 consecutive performances at the Lyric Theatre, Philadelphia. Following the engagement there, no fewer than six productions of this operetta are to be sent on tour, so spontaneous was the success it achieved and so insistent have been the demands from all over the United States and Canada.

Miss Donnelly and Mr. Romberg were responsible for those great achievements in the light opera field, "Blossom Time" and "The Student Prince." But in "My Maryland" this author and composer have given us a work of stronger and far wider appeal, both in the matter of story told and musical setting.
It is conceded by critics generally that in artistic scenic effects and costumes, the colorfulness of its groupings and pageants, in the care and thoroughness with which it has been staged, this newest of the Shubert operettas is the most ambitious presentation of the present season. The main theme of the story is the love of a southern belle for a Yankee officer, and their fight for love and country.

The chorus is an important factor in this production. Besides the big mixed chorus there is a special male chorus whose singing of some of the stirring martial numbers is an outstanding feature.
The book and ensembles have been staged by J. C. Huffman; the settings were designed and built by Watson Barratt, and the entire production supervised by J. J. Shubert.—Press Agent.

"Are you positive the defendant was drunk?"
"Nodoubt," growled the officer.
"Why are you so certain about it?"
"Well, anyhow," replied the officer, "I saw him put a penny in the patrol box on Fourth Street and then look up at the clock on the Presbyterian Church and roar, 'Gosh, I've lost fourteen pounds.'—*Bull Dog.*

HAROLD F. MANN GIVES OPINION ANNUAL THEMES

Plan Is First Requisite—Knowledge and Ability Naturally, Follow, He Says

What is the big idea in the preparation of annuals? Harold F. Mann, of the Jahn & Olier Engraving Company, gives his seasoned opinion that a definite plan, thoughtfully conceived and carefully carried out, is the main key to a successful book. His views, in brief, are:
"In any endeavor, plan is the first requisite, and knowledge and the ability to follow through results from it."
"School annuals are like mirrors. The materials in both are cold, inanimate substances—glass and metal in one case, and paper, ink, copper, zinc, lead, etc., in the other. But when assembled each one becomes a living, breathing work that reflects imagery of some sort. However, neither one will distort facts. The reflection, invariably, is of that which is put into them."
"If you want your book to be an outstanding success, to sparkle with originality and beauty, then, by all the laws of logic, you must put those characteristics into it. And what is this same, sensible way to do it? You must find and develop the Big Idea. "Finding an art theme idea requires patience, imagination, and untiring effort. History, mythology, timely events, geographical advantages, patriotism, religion, future prophecies, marine stories, and a multitude of other sources are comprehensive enough to supply an idea. Then, of course, the originality of your theme depends upon the skillful way in which you apply the idea. All of us see things in a different manner. To illustrate: A teacher asked his pupils how large the full moon appeared to the naked eye. Some said the size of a silver dollar, others said ten feet in diameter, and still others said about a half-mile wide. The teacher replied that in comparison with other objects it appeared before our eyes about the size of a pin-head.
"Here is proof of the variable imaginations of man. Therefore an idea is capable of many ramifications which are responsible for original conceptions of old ideas.
"Have the courage to use your own ideas. Seek competent guidance when you are in doubt, exercise shrewd

DEAN NELSON ATTENDING SOUTHERN TEXTILE MEET AT BIRMINGHAM, ALABAMA

Dr. Thomas H. Nelson, Dean of the Textile School of State College, will attend the two-day session of the Southern Textile Association at Birmingham, October 28 and 29.
The association is composed of superintendents and overseers of cotton mills in the South. Dr. Nelson is a charter member of the association, and was a member of the first board of governors.
State College men have taken an active part in the association since its organization in 1908. President L. R. Gilbert, a graduate of the Textile School in class of 1907, will preside at the coming meeting. Carl R. Harris, graduate of the Textile School in 1916, is vice-president of the association and chairman of the spinners section.
Mr. Gilbert is the second alumnus of State College Textile School to hold office of president in the association.

John W. Clark, president of the Randolph Mills, Franklinville, N. C., has also served.
The meeting will be held at the Tutwiler Hotel in Birmingham. "Greater Efficiency" will be the theme of the meeting. The program will be featured by a number of addresses of unusual technical interest.

F. L. Tarleton, class of '26, is in the control engineering department of the Westinghouse Electric and Manufacturing Company at East Pittsburg.
