CAMPUS CHANGES ARE NOT CONFINED TO ONE PART ONLY

Only Slight Restriction to the New 'Arts' Center

MORE CONCRETE WALKS LAID DURING SUMMER

Pullen Hall Changed to Fit Needs of English Department—Dormitories Repainted—Holladay to Be Remodeled for Sole Use of Administration Forces.

The march of progress, although it has not been confined entirely to one section of the campus, has centered its activities on a comparatively restricted area in the region of the campus that is to be known in the future as the liberal arts center.

The English department in Pullen Hall is beneficiary of the college improvement program to the extent of eight new classrooms in basement of the building which will be finished this week and ready for use by the time classes are started.

Pullen basement space was formerly used by part of the agricultural division for the storage and multigraphing of papers and pamphlets to be distributed to the farmers of the state. F. H. Jeter, agricultural extension editor, moved his quarters to Ricks Hall and vacated the lower floor two offices he once occupied, carrying with him to new space the bulletin department.

Pullen Remodeled

This evacuation left two additional offices on the first floor for the use of the English department as well as the basement. The basement rooms are plastered ceiling with walls of Celotex finished off by 2-1/2 inch strips and painted. New floors have been laid and modern electrical lighting equipment has been installed. In addition to the classrooms there is one small storage space at the front of the building.

Peele Hall, new home of the science and business school, is now set off in a border of concrete walkways six feet wide. The thoroughfare in front of the building and running past Watauga, Peele, Pullen and Primrose was completed late last spring. Between Pullen and Primrose a set of steps were constructed down the hill to reach the lower ground between the buildings.

From the foot of these steps there is now a finished concrete walk to the driveway with a hard-surfaced footpath. Radiating from each side of this walk are connections to the doorways of Peele and Pullen Halls, making it unnecessary for the students to change classes this winter through the red mud that is often prevalent on the campus.

Behind Peele another walk connects the longer one with another—Continued on page 6.

COLLEGE PRESIDENT

DR. E. C. BROOKS

Only 9 Out of 220 Scholarship Men Lose Privilege

Only nine students out of the men holding the 220 scholarships offered at this institution lost their privilege of having free tuition this year because of excessive class absences during the past session of school, E. L. Cloyd, dean of students and secretary of the committee on scholarship awards, said this week.

One or two whose class scholarship has not been up to the grade were dropped from the number by the executive committee of the board of trustees of the college in a meeting on September 4. Not over 12 men lost their scholarship privileges in these two ways, Dean Cloyd said.

About four scholarships were taken from students formerly holding them because of application from the counties to which they belonged. This was not because of any laxity in class attendance or grades, however.

Each county in North Carolina by statute allowed one scholarship in agriculture, and if there is no claimant from any county at the beginning of the fall term, the scholarship may be transferred to some other governmental district. When, however, the county asks for its scholarship for one of its own citizens, the former holder has to give it up.

The college classes as its regular scholarships those allowed each representative in the General Assembly. These, 122 in number, hold for only one year and carry nothing more than free tuition. Renewal is nearly always obtained if the student shows himself capable in his classwork and attendance.

Holders of the county scholarships agree to teach or to farm in the state for a period of two years after completing their education in the agricultural school.

Practically all scholarships offered at State College are filled this year, Dean Cloyd said.

Mr. Paul Dexter Davis, B. E. 1913, is Assistant Engineer and Designer of Municipal Improvements. His business address is, 401 First National Bank Building, Durham, N. C.

Two Presidents Welcome Incoming Class of 1932

By Dr. E. C. Brooks
President of State College

State College extends a cordial welcome to the new students entering this institution. That the president, the deans, and the members of the faculty will always be willing to meet and to advise with the new men about courses of study, their professional aims, and other matters pertaining to college life; and frequent interviews, especially with the deans, will be very helpful in getting the right start in college.

Students are especially urged to begin their college year with a serious purpose. It is necessary for each to enlarge his knowledge of his chosen vocation, if he expects to increase his capacity for useful work, and this broader knowledge can only come through study. It is even more desirable that students form habits of conduct that will commend them to the public. A young man, to succeed in a permanent way, must be reliable and trustworthy, and these qualities are acquired through habits formed in the daily routine.

In extending this welcome, therefore, to the students for the year 1928-29, I am urging them especially to begin now to enlarge their equipment for usefulness by a proper application to their college duties, to increase daily their capacity for true friendship through the right kind of associations, and to strengthen their fidelity to duty by adhering at all times to fundamental principles of good citizenship, which are always in harmony with the aims of a gentleman and the ideals of a Christian.

Chas. K. Marshall, Jr., Will Head Publicity Bureau State College

Distribution of State College news through a department under the executive branch of the institution has been started, following approval of plans submitted by President E. C. Brooks to the executive committee of the board of trustees.

All campus news of importance is being sent to newspapers and news agencies by Charles K. Marshall, Jr., formerly with the Associated Press as filing and mail editor. He is in charge of the department, with temporary offices set up at No. 18 Holladay Hall. The bureau, working independently of any one school, is closely affiliated with that of the agricultural extension service, F. H. Jeter, editor.

Mr. Marshall will also aid in the editing of college bulletins and publications, and render his assistance to editors of student publications who desire his help. Any student desiring to cooperate with the bureau in the syndication of college news or has any "tips" on possible stories, will be welcomed, he said.

Establishment of the bureau has been a long felt need at State, in view of the need here of an experienced newspaper man to furnish papers and news agencies with suitable "copy." Dr. Brooks received recommendations favorable to Mr. Marshall from both Raleigh papers, prominent alumni and others.

While with the Associated Press here last year Mr. Marshall covered several college events, especially athletic contests.

By W. P. Albright
President Student Body

It is a very great pleasure for me to welcome you to North Carolina State College on behalf of the student body. We are glad to have you as fellow-students and we want you to feel that you are really as much a part of the College as are any of the others of us.

The first few days may be very trying ones; they generally are. You may get a bit homesick and feel discouraged and want to go back home; every Freshman feels that way. That feeling will last for only a few days, so don't be a quitter. Resolve to make the best of it, and you'll soon learn to love State College as we do.

I hope that each of you will become acquainted with the members of the faculty, the older students, and with the members of your class as soon as possible. Make an effort to meet everyone you can, for it will be a very great advantage to you. This will be your home for the next four years, so why not get acquainted and make it worthwhile? Make it a real "college home."

This is the largest freshman class in the history of State College, and I should like to see you make the greatest record of any class that has preceded you. The opportunity is yours, and with a little determination and hard work you can do it. I wish each of you a very successful year.

'Y' Work For New Men Is Officially Begun With Eats

A new phase of the help to freshmen was added to the work of the new student committee this year in getting rooms of the campus for those men who did not have rooms in the dormitories and could not procure them there.

The U-Drive It cars were procured and used all day during the arrival of the first year men. A list of the rooms available for the year was held in the Y. M. C. A. and the men carried to the places until they found one that suited.

The real work of the Y. M. C. A. new student committee began Wednesday night, when they all met at Powell's cabin on the Durham road, for a supper of sausage, potato salad, cakes, ice cream and drinks. Dean Cloyd was chef and everyone enjoyed his cooking. Following the eats an opening address was made by Joe Moore, urging the members of the new student committee to do all they could to be friends to the new men who would be coming on the State campus the following day. The topic of his talk was dependability and he implied to the men with the fact that they must be men to be depended upon.

Following Moore's talk Dr. E. C. Brooks awakened a spirit of enthusiasm in the committee by a very inspiring speech.

An open forum discussion of the problems and plans for the following day was then opened and several of the men made short talks and suggestions.

TWENTY-FIVE FRESHMEN ANSWER CALL TO ARMS IN SERVICE OF THE BAND

Daddy Price's call for handsmen was answered by 25 freshmen and a large number of upperclassmen, which proves that the State College men are losing none of their musical ability. After the tryouts the men were assigned to the various sections. Rehearsals have been held every night since registration. The first rehearsal was good, band headquarters said, so the school can feel sure that it will have the best band yet.

The State College band has always had a reputation as being among the best in the state, but according to Daddy Price, "you ain't heard nothing yet!" It is the best yet, and it owes a lot of credit to the freshman class, which has strengthened it considerably.

The band will start its year's work by playing for a number of local events in the next few days. After this it will leave on a "booster" trip for the North Carolina State Fair Association. The band leaves on a special train and will be gone for two days. It will give concerts in all of the leading cities of North Carolina.

STUDENT BODY HEAD

W. P. ALBRIGHT

New Division of the Business School Opens

A new department of the school of science and business enters into being with the arrival of the fall term this year and is to be known on the campus as the social science group with the divisions in curricula known as general business, journalism, public administration, and rural and industrial sociology.

The new department was incorporated into the business school because of a general feeling of the need for a less specialized course in business, a demand for instruction further into the field of newspaper work, a broadening of the sociology department, and a desire to train college students for the field of public service.

The public administration group is most carefully watched for developments among the students that will make them real leaders in public life. The weakness of local government in North Carolina and all over the country has been recently felt within the last few years and there has grown up a need for men and women specially trained in county and municipal problems to carry on the administrative work of localities. It is in an effort somewhat to alleviate the need in this field that the board of trustees voted the establishment of the public administration group in the social science department.

Change Registration

A new system of registration by which the former students of the college were asked to designate before they left last spring the courses they wished to take this fall was expected to relieve the rush when the old men came back to the campus last Tuesday.

During the summer individual student class rosters have been made out from the information left by the upper classmen, the members of the schedule committee under Professor Mayer having active charge of the work. It is hoped that the new system will prove most effective from now on in the school of science and business, where many students are likely to be irregular.

Advisers were allotted of each school and the students registered in the departments of each school turned in their requests for classes to the advisers. Dr. Z. P. Metcalf, Dean W. C.—Continued on page 6.

DORMITORIES OF COLLEGE CROWDED TO THEIR CAPACITY

College dormitories are loaded to capacity of 1,010 this year and there were about 50 students on the waiting list at the first of the week, according to information given out by T. T. Wellons, superintendent of buildings.

The college Y. M. C. A. had an automobile waiting to place those without a room in some of the houses near the campus, several rooms having been made available in that quarter through the efforts of the Y force. The entire number will be placed, Mr. Wellons said, if it is necessary to set the top floor of Holladay Hall, the administration building, with beds for a few weeks.

About 450 students are expected to room in fraternity houses near the campus, relieving the college dormitories of a considerable load and enabling the institution to care for more men in its allotted space. Approximately 50 students are expected to live with their families in the city of Raleigh and vicinity, some even motoring in each day from the neighboring communities of Garner, Apex and others to attend classes.

From Watauga to Seventh dormitory, Mr. Wellons stated, the college sleeping quarters are now equipped with regulation Simmons doubledeck beds in place of the single beds that formerly were in some of the buildings.

The equipment during the summer of Fifth and Sixth dormitories makes all the sleeping quarters in a line from Peele Hall, new home of the school of science and business, to Seventh dormitory across the railroad complete with modern beds.

It is planned to install the double-deck beds in South and 1911 dormitories next summer, Mr. Wellons stated, thus giving the entire campus housing system the benefit of the better type sleeping equipment.

Since the college has at present no provision for women students, the 12 who have applied for registration will reside in houses off the campus or with their parents in Raleigh.

ENGINEERING DIVISION GLADLY RECEIVED BY DEAN AND INSTRUCTORS

We congratulate you that you belong to the favored class who have the opportunity of a college education. We congratulate ourselves that you have decided to enter State College. We believe that you have made no mistake in your selection and hope to prove it to you. We extend to you a cordial welcome, and pledge our best efforts to make your stay here both pleasant and successful. We earnestly ask your cooperation in these efforts, and, if you give it, we are sure of success.

Mr. William Hawkins Bogart, B. E. 1924, is a designer for the Proximity Manufacturing Co., at Greensboro, N. C. His home address is 408 Church street, Greensboro, N. C.

Fifteen New Instructors Are Added To College Faculty

Fifteen additions to the faculty of State College were announced last week by Dr. E. C. Brooks, president of the college, who also made known that three professors were back after leaves of absence for research and graduate work.

The new members were introduced at a meeting of the faculty Monday which officially opened the college for its thirty-ninth session.

The school of education, which is extending its work so as to meet the needs of rural and urban high schools desiring teachers thoroughly acquainted with farm and community problems, will have Dr. Karl C. Garrison as associate professor of psychology, a new position. Dr. Garrison is native of Lincoln county, a graduate of Lenoir-Rhyne College and the University of North Carolina. He earned his Ph.D. at Peabody, where he taught for a number of years.

The department of electrical engineering will have two new men on its staff. Raymond S. Fournaker, associate professor, was graduated from Texas A. and M. College, where he later taught and did graduate work. Last

year he was at Texas Technological College. William D. Johnson, a graduate of the University of Colorado, and who has taught at the University of Missouri since 1925, is another addition.

J. M. Edwards, Jr., a State College graduate and recently a graduate of Yale, will fill the new job of instructor in mechanical engineering. He has been working with a local firm of architects. Walter C. Voll, Rochester A. and M. Institute, for the past five years superintendent of the metal work in the Gary, Ind., schools, will instruct in foundry and forge.

Five new teachers, including one woman, will be in the school of agriculture. Dr. J. H. Beaumont, until lately with the University of Minnesota, succeeds C. D. Matthews as the head of the horticulture department. H. L. Whitesell, State graduate and specialist in landscape architecture, will do Dr. J. P. Pillsbury's work, who is now doing post-graduate work at Harvard. Dr. B. B. Fulton fills a new position in research in entomology, coming from Iowa State College.—Continued on page 6.

State College Sends Even Dozen To Blue Ridge Meet

Two hundred and forty-two delegates represented fifty-six colleges at the Annual Students' Y. M. C. A. Conference which was held at Blue Ridge, N. C., June 15 to 25.

State College was represented at this conference by A. D. Stuart, J. E. Moore, W. P. Albright, E. W. Buchanan, R. E. Byrd, W. B. Callihan, R. H. Gatlin, W. D. Stephenson, C. L. Clark, Dean E. L. Cloyd, H. C. Green, E. S. King, and W. N. Hicks.

A regular program was followed each day of the conference. At 7 o'clock taps were sounded for rising and breakfast was served at 7:30. The worship period began at 8:30.

Dr. Tallifer Thompson of Union Theological Seminary, Richmond, Va., had charge of the worship period until 9 o'clock. The delegates were then requested to go out into the woods alone for prayer, meditation, and to study themselves.

Interest Groups
The orientation meeting was led by Dr. Harrison Elliott from 9:30 to 10:30. The purpose of this meeting was to interpret the life and teachings of Jesus in terms of present-day knowl-

edge and experience. Dr. Elliott also reviewed briefly the outstanding points that had been disclosed in the lectures during the previous day.

The interest groups, which were held from 10:30 to 11:45, had probably more educative value than any other phase of the conference program. These groups were devoted to such a large variety of subjects that delegates could get helpful information on almost any problem they were facing. In reality these interest groups were forums led by men who are specialists in the fields to which the particular groups directed their attention. Men and women relations, the church, race relations, southern industry, international relations, politics, and religion and science were the subjects that were discussed in these groups.

Have Athletics
The afternoon was given over to such activities as swimming, hiking, baseball, volleyball, basketball, tennis, and nature study. A definite number of points were credited to those who took part in the athletic events. This—Continued on page 6.

Highway Truck and 'Y' Force Again Give Frosh Free Rides

Once again through the courtesy of the State Highway Commission the Y. M. C. A. of State College was enabled to furnish free transportation to the campus from the Union station for the incoming freshmen.

Student drivers of the highway truck met each train arriving during the time the freshmen were expected, helped them with their baggage and conducted them to the college grounds.

As has been the custom for the past few years, members of the Y. M. C. A. student force were stationed at the depot to collect the incoming men in groups and direct them with aid about their baggage.

The little red band on the arm of the workers bearing in white the letters "NCS YMCA" made the wearers easily recognizable as the guides the freshmen had been told would greet them on their arrival.

Assistance of the Y did not stop with all the men were on the campus, but continued through the registration when many of the intricacies of first enrolling on the college books were explained to the new men.

Wolfpack Now Training For '28 Gridiron Work

Tech Squad Back Again Thought To Be Strong Despite Its Losses

Flashy McDowall Will Not Appear Again Under Red and White Banner—Nicholson, Kilgore, Ridenhour and Childress Also Missing—Rainy Weather No Hindrance to Football Education of Pack—Season Opens for Tech Squad With Elon Game on September 28.

By T. A. VERNON

Hail, King Football! May the Wolfpack continue the string of victories. To the coaches, G. K. Tebell, E. R. Slaughter and R. E. Sermon, and to the fifty-odd members of the squad goes a hearty wish for success from students, alumni, and friends. Coach Gus Tebell started the ball rolling Monday, September 3, and has continued until the present day. Not a day except Sunday has been lost. When Jupiter Pluvius does reign the men are shunted into a handy place and given chalk talks on essentials and fundamentals of the game.

Tuesday and Wednesday of this week the squad was confined to its chalk talks while the date of the opening game draws nearer. On September 28 the Wolfpack gets into action after an absence of ten months.

The "Pack" last smelled blood when Michigan State went down by a large score on December 3. It was a rainy day, likened to Tuesday or Wednesday of this week.

All hands are on deck to rush the good boat "Wolfpack" through to another rousing State and Southern Conference victory this year. Some were late in getting to town, it is true, but nevertheless they are here and have been showing up just as well as those who came in at the first.

Tech Losses

The Techs lost several valuable men, chief among them being Jack McDowall, that young man who ran, jumped, kicked, and otherwise did himself into the favor of sports followers throughout the south. C. A. Ridenhour, quarterback of the championship team, Captain N. B. Nicholson, and J. M. Kilgore, tackle, are also lost to the squad. Don Childress also failed to return to the camp.

Letter Men

Captain Bob Warren, Fred Crum, W. F. Metts, J. E. Ford, F. P. Vaughn, Frank Goodwin, A. S. Morris, Lindsay Jordan, Chick Owen, Dewey Floyd, Sparky Adams, and John Lepo are the letter men who have returned to the lair. Members of the reserve team who have shown up are Zeb Plonk, Norris Jeffrey, G. E. Silver, Jimmy Mayfield, F. B. Crowson, J. P. Choplin, D. E. Patterson, J. N. May, J. W. Harden, and "Bus" Albright.

Members of last year's freshman squad who have shown up for practice are McNeill, Stout, Hatcher, Burdell, Tucker, Kerr, Edmondson, Wright, Furtado, Clark, Atkinson, Combs, Herbst, Taylor, Gardner, Hanks, Bethe, Trask, Hargrove, McLawhorne and Stone.

Only Keeping Step

"My, but your daughter is growing fast!" remarked a neighbor. "Oh," said the father comfortably. "I don't believe she's any worse than the other young folks in town."

Grid Schedule

Wake Forest	
September 29:	Carolina at Chapel Hill
October 6:	Presbyterian at Wake Forest
October 13:	William and Mary at Williamsburg
October 18:	State at Raleigh

Carolina	"Chuck" Collins
Duke	"Jimmy" Dehart
Wake Forest	Stanley Cotfall
Davidson	"Monk" Younger

But Too Close
"I can't understand," said Jim, "why Fred is so mean. He rarely attempts to pay when we're out together; I generally have to do that."
"Well," was the reply, "there's one thing about it. You can't say you haven't got a close friend."

Presenting . . . CHARLIE CHAPLIN in the blindfold cigarette test

Famous star selects OLD GOLD

"One cigarette of the four I smoked in the blindfold test was like shooting a scene successfully after a whole series of failures. It just 'clicked' and I named it as my choice. It was OLD GOLD. Which clears up a mystery, for the supply of OLD GOLDS in my Beverly Hills home is constantly being depleted. It seems that Strongheart and Rin-tin-tin are the only motion picture stars who don't smoke them."

Charlie Chaplin

Made from the heart-leaves of the tobacco plant

MR. CHAPLIN was asked to smoke each of the four leading brands, clearing his taste with coffee between smokes. Only one question was asked: "Which one do you like the best?"

CHARLIE CHAPLIN . . . movie favorite the world over, in one of his best-loved pictures—"The Circus."

How does OLD GOLD do it?

What's the secret of OLD GOLD'S winning charm? The answer is very simple. Three types of leaves grow on the tobacco plant . . . coarse, heavy top-leaves, irritating to the throat . . . withered ground-leaves, without taste or aroma . . . and the heart-

leaves, rich in cool and fragrant smoking qualities. These golden-ripe heart-leaves give OLD GOLDS their honey-like smoothness. That's why so many people choose them. And that's why you too can pick them . . . even in the dark.

SMOOTHER AND BETTER—"NOT A COUGH IN A CARLOAD"

Extensive Schedule In Forensics Is Planned

Pi Kappa Delta and Dixie Debating League Contests to Receive Prominence

Forensic endeavors of State College will be confined this year to contests held under Pi Kappa Delta, national honorary Forensic fraternity, the Dixie Debating League, two special debates and two contests usually held in oratory. This information was vouchered for by Professor C. C. Cunningham, instructor in public speaking and coach of debate and oratory here, and governor of the South Atlantic province of Pi Kappa Delta, embracing the states of North and South Carolina, Virginia, and West Virginia. Wofford, Newberry and Presbyterian Colleges in South Carolina; Wake Forest and North Carolina State in North Carolina; Virginia State Teachers College at Farmville; and West Virginia Wesleyan are the schools in this province having a chapter of the national fraternity.

The Pi Kappa Delta debates and oratorical contests, the provincial contests and the provincial convention to be held at either Raleigh or Farmville in March or April will make up the entire program in which this college takes part in the fraternity schedule. Professor Cunningham said this week. The college schedule as a whole is not yet definitely planned for the whole year, he continued.

Colleges in the Dixie Debating League, formed last year through efforts of the forensic council of Alabama University, are: University of Alabama, Alabama Polytech (Auburn), University of Florida, North Carolina State, Duke University, and the College of William and Mary in Virginia. As many of these institutions will be met by State College teams as time and the budget for forensic activities will allow.

Two special debates, Professor Cunningham said, will be arranged with Rutgers University, of New Jersey, in their own state, and with some large northern university at Asheville. The Asheville debate will be held at the Asheville Normal School where Professor Cunningham taught the past summer and which has extended him a special invitation to use their auditorium for the contest.

The oratorical contest on the Constitution and the state Peace oratorical contest will conclude the program of North Carolina State in its platform activities this year. Large prizes are offered to the winners of these meets, together with the distinction of carrying their speeches to other states in the case of the former. State College last year won four out of seven debates, two being lost

to opposing teams and one being scheduled as an open forum debate with no decision between the two teams. In the Peace oratorical contest, State College placed third among eight speakers and brought down the same honors among seven in the contest on the Constitution.

Science and Business School Welcomes New Students In Its Work

By B. F. BROWN, Dean

The School of Science and Business extends a hearty welcome to all the new men. A large majority will be entering college for the first time, and for the first time you will be confronted with the problems of how to act in so strange an environment. Probably the first thing you will notice, in addition to so many things going on and the numerous different people you will deal with, is your freedom. It is to be hoped you will be careful what you do when you think you have nothing to occupy your time.

You will soon learn that State College is friendly. You can expect the generous co-operation and assistance of a fine student body of which you will soon grow to be a part, and you can depend upon the loyalty of the faculty to your interests. You will hear a lot of things and get a lot of new ideas your first few months here, part of which will be true. It is to be hoped you will start out by doing your own thinking.

The School of Science and Business especially welcomes its own students, and wishes them to know, while the school is relatively young here as it is in all educational institutions, that, in common with the other schools of the college, it is second to none for a long way in every direction. May it be that the new men will lose none of the fine enthusiasm with which they enter college, and that the vision of what they hope to make of themselves will never grow dim.

From the Back Seat

The driver of an automobile, who was plainly out of his element in city traffic, attempted to turn his car around in the middle of the block and was side-swiped and upset by a hook-and-ladder fire truck.

Striding angrily over to the overturned car, a traffic policeman poked his head through the broken window and growled, "You'll get ten years for this. Whatcha mean by blockin' traffic like this?"

"You let him alone," said a shrill female voice from the back seat. "How did we know them drunken painters was gonna run into us?"

"Platonic friendship" is the act of holding the eggshell while another eats the omelette.

School of Education Extends Arms To All Considering Teaching

The School of Education at State College of Agriculture and Engineering wishes to extend greetings to the students who are entering the college for the first time, and to offer the services of its faculty to assist you with your work and to make your stay here pleasant and inspiring.

It is quite fitting that in a state whose progress is so directly dependent upon the development of agriculture and manufacturing that the college of agriculture and engineering should assume a responsibility for training teachers to take positions of leadership in our high school program.

It is in the high schools that the mass of workers must secure their educational equipment. It is in a college where the instruction and the environment give emphasis to those subjects so essential to agricultural and industrial progress that men and women may expect to secure the kind of preparation that will give them an understanding of the social and economic problems confronting the persons who are to make a living by working in these vocations, and that will give them an understanding and appreciation of situations to be found

among our agricultural and industrial workers.

We welcome you to State College, and to those of you who wish to cast your lot with the group dedicating their lives to the teaching of North Carolina youth, and who have the ambition and determination to maintain standards of scholarship and character worthy of the leaders of North Carolina boys and girls, we extend a welcome to the school of education.

Some alleged friends are always willing to give you something which doesn't cost them anything. Just like a bartender who gave away the proprietor's drinks.

"STATE COLLEGE OUTFITTERS"

The Technician

Published Weekly by the Students of North Carolina State College

Entered as second-class matter, February 10, 1920, at the postoffice at Raleigh, North Carolina, under the Act of March 3, 1879.

SUBSCRIPTION PRICE: \$1.50 PER COLLEGE YEAR

Our advertisers were solicited with the purpose of putting before you dependable shopping points. Remember this, and feel perfectly safe in guiding your shopping by THE TECHNICIAN.

WELCOME, FRESHMEN

State College hands you greetings. Once again there is new life added to the campus, and once more young blood is seeing the streets of Raleigh. Each year the community is glad to see you come in; each year the people watch for the day when the little red caps appear. And they all are glad to see you, to have you become fellow-citizens of the whole community.

Here, on the West Raleigh campus, we are a community within a community because to us, engrossed in our pursuit of education, the hurry and bustle downtown means little. We are in the world, but apart from it. Yet, despite this fact, we are all essentially living in the same place.

In just a few days, men, you will feel completely one of us. In a comparatively short time you will feel as if you had known most of us for years and it will seem to you that the 400-odd acres the college embraces was really meant to be your home.

Of course there will be some who miss their old haunts, who long for a while to see their old friends back home; but, boys, you will soon make new friends, you will soon learn your way around, and it won't be long before you realize how good a community is State College.

When the reports for the first six weeks of freshman classwork are sent from the registrar's office there will be some of you who will be disappointed, and again at Christmas there will be some whose work has not been satisfactory. But think of this now as you begin, and make a resolve in your mind that you will not be one of those who leave. Set yourself toward the goal of four years at State College, and you will make the grade. For some it may be a hard, uphill pull, for some it will more than likely be much easier, but for those who set their minds and their energies to it it will be easiest of all.

And then some of you may have come here not knowing what you really wish to study; your choice may be only temporary. In the last analysis it is you who know best, it is you who has your own life to lead, it is for you to decide what you will study, and it is you who will decide. Then, when you have made your decision, stick by it.

There may be for some of you more than one road to follow. There is the bookworm student, represented in fiction and sometimes in life as delving deeply into his subjects, his textbooks and papers piled high about him, his knowledge more than proficient, and his scholarship soaring toward the highest pinnacle. On the other hand there is the student who pays no attention to his work and his studies, but who is interested mainly in the social life perhaps better afforded at college than in his home town. He doesn't consider his parents' money spent to raise his educational standard is being for the greater part thrown away, or rather, let us say, being spent inefficiently—for college is supposed to help us be efficient.

As always, there is the center road—that of a combination. There will be students among the class of 1932 to whom this road will most appeal. And they will be the ones who spend a portion of their time in the furtherance of their education and a portion toward social activities. Which of these highways you are to take each must choose for himself; but his choice need not be conclusive. There is always a detour that will bring you into the road you really meant to take if the signs had not pointed in the wrong direction.

And now, boys, college is a means of teaching you to think for yourself. Remember, the world consid-

ers men the "cream of the earth," however true that may be. Don't let the world look at you, men, and say, "God help the skim milk." And if you take advantage of your stay at State College it won't.

At times some of you will tire of the institution; sometimes you will feel dissatisfied at being here. But it will all pass over, men, and you will be glad of your choice, you will be glad that you came here and will be glad that you stayed. When four years have rolled into the past you will realize how dear State College has become to you. You will remember with joy the good times you had here; you will feel proud of your alma mater, and will realize there is no school like your own State College, and it will make you glad.

So, once more, men, we extend to you a welcome, and in this first issue of THE TECHNICIAN this year we hope to tell you something of the city of Raleigh through the advertising section and of the "City of State College" through the news columns. We are glad you are here.

Y WELCOMES STUDENTS

By J. E. MOORE, President

New students, in behalf of the Y. M. C. A. staff, the board of directors, and the old members, I welcome you, one and all, to our campus.

The Y. M. C. A. is a student organization run by students and for students. It has an employed staff of six people, a general secretary, an associate secretary, an office secretary, a self-help director and two general assistants, whose business is to help you and to serve you. When you get an opportunity, go around and meet the Y. M. C. A. staff; they will be delighted to make your acquaintance. Remember they are always ready to serve you and to be real friends to you.

The Y. M. C. A. building is the religious and social center of our campus. We want you to feel that it is your home, and not only to feel that it is your home, but to act like it. You will find a nice parlor equipped with deep cushioned chairs, where your mother and relatives may be comfortable when they come to see you. You will also find comfortable chairs, newspapers, magazines, a phonograph and checker tables at the "Y." They are there for your pleasure and convenience—come and use them as though you were at home.

We hope that by putting away selfish ideas, narrow-minded attitudes and beliefs that we can with frank open minds find a greater way of life. The "Y" does not ask you to enter an easy adventure, for the great way of life calls for courage, strength, patience, and hardships—a man's game in every sense of the word. We call you to join us in trying to live lives like John J. Eagen, William Borden, or Alonzo Stag—lives of service.

New students, I welcome you into an organization that needs men, not weaklings; that needs workers, not loafers; that needs men of broad vision, not men of little foresight. The Y. M. C. A. offers a challenge to the best that is within you to try to seek with us the greater way of life and to try to live life at its best. I hope that you will enter every field of our campus life and never rest until the good is better and the better best.

TEXTILE GREETINGS

By THOMAS NELSON, Dean

The textile school extends a hearty welcome to all new students entering State College and hopes that your stay here will be both pleasant and profitable.

Your selection of this institution indicates that you have given serious consideration to your life's vocation.

The beginning of a student's college life is very important, as a good beginning often leads directly to a successful college career. You will find the student body and faculty friendly and at all times willing to do what they can to aid you so that you may take advantage of the opportunities offered to young men by State College. You are indeed fortunate to have these opportunities and should determine to make the best use of the advantages that have been spread before you, and to develop to the full capacity the talents that have been bestowed upon you.

The faculty of the textile school especially welcomes the new textile students and wishes them to know that they are ready at all times to cooperate with them in every way possible.

Aim and Purpose of School

The growth of the textile industry in the south during the past few years has been nothing less than phenomenal, and in this rapid development North Carolina has occupied the foremost place, being now the largest cotton mill state in the South, and the second largest in the nation. This growth requires men of the highest ability and training, who will aid in this movement of the industry to the south.

The purpose of the school, therefore, is to aid the large textile enterprises of the south by giving instruction in the science and practice of all branches of the textile industry; also to make

such studies, tests, investigations and research as will be of the greatest benefit to the south, its manufacturers, its industries and to the textile students.

GRADUATE SCHOOL SPEAKS

By CARL C. TAYLOR, Dean

In welcoming the freshmen to State College I cannot, of course, invite any of you to register in the graduate school. I hope, however, that four years hence I shall have the privilege of registering a great number of you.

I am sure that many of you freshmen even at this early date have purposes for graduate study. All of you have made decisions to be college trained men. Most of you have tentatively selected the profession for which you expect to train yourselves. Each of you proposes ultimately to be the best trained expert possible in his chosen field. In many cases that means you are looking forward to graduate training.

North Carolina State College is already better equipped in many ways to offer you that training than any other institution in the south. By the time you have completed your undergraduate training your Alma Mater will have a larger and better equipped graduate school than is here now. To those of you who, at that time, want to go one rung higher in professional training, it will offer a challenging invitation. Now, at the beginning of your college education, it invites you to take its services and prospects into your educational purposes and plans.

"IF I WERE A FRESHMAN"

By Z. P. METCALF

Director of Instruction, School of Agriculture

I have been asked to write a word of welcome to the incoming freshman class, and I note from former Technicians that these are not so much words of welcome as they are words of advice and admonition. There are two reasons for this: we may depend upon the members of the sophomore class to give you a warmer welcome than the members of the faculty can give; then again, while being a freshman at State College is a new experience for you, to members of the faculty who have seen freshmen classes come and go and have noted the mistakes they have made, there is a tremendous urge to sound a note of warning.

The other day I picked up a little booklet by Dr. Frank Crane entitled, "If I were twenty-one." This booklet is written from Dr. Crane's long experience, and while we might not agree with everything he has to say, it is a booklet well worth pondering over. I recommend it to you most heartily. The reason I introduced this subject was because some of the chapter headings of this little booklet fit properly modified make an excellent freshman creed. Here it is:

1. If I were a freshman: I would adjust myself to the campus and its activities; I would glory in wearing my freshman cap; I would attend my class meetings; I would go to the football games and root.
2. I would take care of my body. I would get out of the two hours physical education all that it is possible to get; I would get some regular exercise every day; I would take care of my natural endowment—especially my eyes, my teeth, and my stomach.
3. I would train my mind. Athletic prowess and social prestige are dear to the hearts of youth, but the chief function of a college is to train the mind. Therefore, I would not fail to get the most important thing the college has to offer.
4. I would be happy. To many of you, this is your first definite break from home ties and most of you will suffer many twinges of homesickness. This is but natural and normal, and I wouldn't give much for the boy that didn't feel that way. Cultivate the other side, enjoy to the fullest your one chance at college life these fine autumn days that nature provides.
5. I would save money. Some of you have perhaps been given a blank check book to draw on your bank for your necessary expenses; some of you have been given a regular allowance, and some of you will have to make a part or all of your expenses while in college. It makes no difference how your college expenses are being financed, you ought to cultivate the art of saving money, which is simply another way of saying you ought to be sure you are getting your money's worth.
6. I would study the art of pleasing. The world market has an unlimited demand for a commodity that is called in the slang of the day "IT." The chief ingredient in this commodity is interest in the other fellow. The world offers no better place for the cultivation of this art than the college campus.
7. I would make an agreement with my conscience. Many of you are released for the first time from parental restraint, if there is any left anywhere in the world. At least, you are away from home and your home community where you are known. You are definitely a part of a community of young men, many of whom may have ideas and ideals differing from yours. Hence, I would make an agreement with my conscience so that I could live with

Sportsmanship and Statesmanship

day by day. Either, I would say, "Now, conscience, you don't know anything about this thing called 'College Life,' and I want you to keep quiet from now on," or I would say, "Now conscience, we have been partners all these years, we are going into a new life together, I want you to stick close through thick and thin, 'cause I sorter have a notion I am going to need you." 8. And lastly I would be a thoroughbred. You will easily acquire the habits and mannerisms so that the whole world will know you are a college student. I would, therefore, make it a definite part of my schedule to study the art of being a thoroughbred on the street, on the campus, and in the classroom. Onion—I'm the strongest person in the world. Boarding-house Butter—Are you overlooking me?

STAY ON THE FAIRWAY; STICK TO CAMELS!

SOMEWHERE between your collar-button and the bottom of your plus-fours there's a smoke-spot—seeking "fill-fullment." The vast majority of jobbies who feel that in'ard hankerin' have discovered what to do about it. They pull a cool cloud of joy away down into it—and slowly exhale fragrant Camel smoke.

Tobacco science has produced in Camel a superb blend of the choicest Turkish and Domestic tobaccos. Just revel once in the delicious, quivering aroma of a cloud of Camel smoke. We'll bet a caddie to a left-handed niblick you'll never get off that fairway!

'Y' PLANS ORGANIZATION OF FELLOWSHIP GROUPS

Upperclassmen Will Call on the Freshmen to Sign Them for Membership

The Y. M. C. A. is planning to organize freshman fellowship groups in the different dormitories under a plan by which upperclassmen will go around to all the freshmen rooms next Wednesday night, September 19, and give them an opportunity to sign up as a member of one of the fellowship groups. At this time rooms will be selected to meet in and each freshman will be told where and where to meet.

The purpose of these groups is to give the new men an opportunity to think through many of the problems that will face them while in college. According to the tentative plans of the Bible Study committee, subjects like "Why am I in college?" "How shall we choose our life work?" and men and women relations will be discussed.

These meetings will be held each Wednesday evening from 6:30 to 7:30, and the freshmen will find the discussions entirely different from classroom work. Instead of one man lecturing or doing all of the talking, each man will be given an opportunity to talk. In these meetings everyone is wanted to feel free to contribute any thought he has that will be helpful to the discussion.

When a student signs up to take part in one of these discussion groups he does not obligate himself in any way. There are no fees connected with the plan and attendance is absolutely voluntary. It is the aim of the Y now, however, to make the meetings so interesting that every man who signs up will want to attend.

If each man in the group helps in the discussion it will be one of the most inspiring and enlightening meetings that one can attend, in the opinion of leaders of the movement.

"So, let us cooperate and put on the most successful freshman fellowship group program that we have ever had at State College," says J. E. Moore, Y president. "You can help your classmates solve their problems and they can help you solve yours."

Fifteen New Instructors Added To College Faculty

(Continued from page 1)

where he was for five years, after being with the New York state experiment station and in Oregon also.

E. C. Campbell, Clemson College graduate with a Master's degree from State, assumes agricultural economics work done last year by R. J. Saville, who is doing graduate work at Cornell.

Miss Willie N. Hunter, home economics teacher in Winston-Salem schools for several years, has been appointed extension specialist in clothing work.

The school of science and business will have Marc C. Leager in the new position of statistics and accounting. Last year Mr. Leager did work towards his Ph.D. degree at Columbia University, after graduating at the University of Minnesota. W. N. Hicks will teach sociology, coming here from Oberlin College, Missouri, where he earned his M. A. after graduating

from State College. He will also teach courses in religion.

S. C. Gladden will teach physics. He is a graduate of the University of Mississippi and comes to State from the University of Kentucky.

Professor George R. Shelton will teach chemistry in the same school, having been transferred from the department of ceramic engineering. He earned his Ph.D. at the University of Illinois.

New Division of Business School Opened

(Continued from page 1)

Riddick, Professor W. L. Mayer, Dean B. F. Brown, and Professor T. R. Hart, were respectively assigned to cover the activities of agriculture, engineering, education, science and business, and textiles. The science and business division was divided by Dean Brown into several groups, each having a special consultant in the person of one of the members of the faculty of that school.

When the old men returned this week it was necessary only to make the needed changes and pay the fees at the bursar's office to complete registration. Freshmen registration remained along the old lines, since it is the first chance the administration has had to become acquainted with the new men and their needs in the educational field.

He Calls, However

Suitors: "Tommy, does a young man call here in the evening to see your sister?"

Tommy: "Not exactly to see her, because there's no light in the room when he's there."

State College Sends Even Dozen to Blue Ridge Meet

(Continued from page 1)

resulted in keen competition between the different delegations, for each was trying to lead the others in the number of points that they scored.

At 7 o'clock the technique groups met for the purpose of instructing delegates in the ways and means of meeting campus problems and in the responsibilities and duties of Y. M. C. A. officers.

From 8 to 9:30 Dr. W. L. Poteat, Dr. W. W. Alexander and other men of this calibre gave addresses describing their religious experiences or those of their intimate friends. In order to give the delegates the benefit of a large range of religious experiences, the conference officials tried to secure men from many walks of life to give these addresses.

New Features

There were two entirely new features added to the conference this year. One of these was the addition of the vocational counselling work and the other was the installation of a conference library. Men like Dean E. L. Cloyd of State College and Dean Francis Bradshaw of the University of North Carolina took part in this vocational counselling work. Those who took this course would report to their counsellor once a day during the whole conference. The purpose of this work was to determine whether one was taking the course in college that he was best fitted for, and to determine what course he should take.

Many knotty religious questions were cleared up for the delegates at Blue Ridge. Judging from the interest shown by the boys, a new conception of

the true meaning of Jesus and of Christianity must have been obtained. Things like prayer and fellowship with God and man became a living reality to many of the delegates.

In the environment of lofty mountain peaks and wholesome companionship time passed very rapidly and the 25th of June soon rolled around. Travelling bags were then packed and the delegates turned reluctant faces toward home—the conference had ended.

President's Course

In addition to the conferences that go on throughout the summer and the Y. M. C. A. Graduate School at Blue Ridge, a course is given for college Y. M. C. A. presidents. This course was begun three years ago.

This past summer three students from State College took the president's course at Blue Ridge. These men were J. E. Moore, W. P. Albright, and H. C. Green.

Three subjects are included in this course, "Basic Principles" (or theology), "The Life and Teachings of Jesus," and "Y. M. C. A. Seminar."

Dr. W. D. Weatherford, president of Southern Y. M. C. A. College, taught "Basic Principles." In this course such subjects were discussed as "What proof have we that there is a God?" "Can a modern man pray?" "How do other religions compare with the Christian religion?" and "Why does a good God allow sin and suffering in the world?" As Dr. Weatherford has a rare insight into theological problems, he cleared up many complicated religious problems that are so numerous among college students.

The "Y. M. C. A. Seminar" dealt with the Y. M. C. A. organization and the duties of the various officers. These classes were taught by several different men. This class was very helpful in throwing light on problems that are involved in the relation of the president to his cabinet.

"The Life and Teachings of Jesus" was taught by Dr. Keslar, who is connected with the School of Religion at Vanderbilt College. This course dealt with the birth and outstanding events in the life of Christ. The class was required to write a paper on the history of the New Testament and one on the application of Jesus' principles to the great social and industrial problems of today.

Campus Changes Not Confined To One Part

(Continued from page 1)

parallel to it and running straight the length of the building, after which it takes an angle toward the dining hall and connects with the concrete walk already in place near that building and leading across the court back of Holladay.

This system of cement walks in addition to those that have been laid for several months gives the front part of the campus a cityfied appearance.

Administration To Move

Across from Peele and Pullen, the forces now occupying Holladay, the administration building, are preparing to move to give room to the incoming men who will entirely remodel the structure from basement to top floor.

Work on this building is supposed to begin about the first of October, according to T. A. Kennedy, superintendent of construction.

Ceilings on the first floor are to be lowered and arched, giving the administration quarters a most artistically architected appearance. Classrooms are to be eliminated from the building after the reconstruction work is finished. The second floor will be occupied almost entirely by the registrar's staff under E. B. Owen. The work is expected to occupy about five months' time.

In the basement the military department will take up its new quarters, leaving Primrose Hall for other use. It is said that Major P. W. Price, known on the campus as "Daddy" Price, seeks permission from the college authorities to turn the small building into headquarters for the college band.

Across the campus from the administrative and literary center, the dining hall has come in for its share of improvements. Kitchen floor space has been increased by 625 feet and the old coal range formerly in use is now replaced by gas equipment.

The two 45-foot chimneys once adorning this building have been torn down and replaced by a new stack 50 feet high and 12 feet farther out. To this structure has been connected the flue pipe to the bakery ovens beneath the kitchen.

Within the building, the old hand-power elevator has been replaced by a new electrically driven lift that operates much quicker and more efficiently than the old one. Cafeteria changes have been confined to a new water cooler, following the seeming precedent of installing a new one of these instruments each year.

Dormitories Palatial

Considerable work has been done in making the dormitories more desirable places to live. The students will find the floors of Fifth and Sixth with a new coat of paint, Seventh, Fourth, and First dormitories in their entirety, and the north end of South have recently received protective coatings on the walls and ceilings of rooms and corridors.

On the western side of Riddick Field, where State College students will soon see the Wolfpack in hard

Strip, successor to ink, makes all pens write better, and the Lifetime pen writes best.

Identify the Lifetime pen by this white dot

The seal of approval

A recent survey of leading universities and colleges conclusively showed that in forty-one per cent of them Sheaffer's Lifetime writing tools are first in favor. **LIGHTEST TOUCH** response, yet a nib fortified to produce easily three carbons of notes, correspondence, confidential matters, gives the Lifetime pen first place wherever pen values are carefully considered. **Unconditionally guaranteed for a lifetime, the beauty and economy of these writing twins have easily earned them the seal of approval.**

scrimmage, have been placed the beginnings of what will eventually be a new addition to the bleachers on that side.

These are to be of long-leaf pine and 20 feet in length with a seating capacity of 1,200. The former structures in this part of the field were old and had become dangerous to life and limb. Work on the bleachers is being

held up temporarily until the other more needed campus improvements can be completed. Mr. Kennedy expects to have them finished in time for the first big game this fall, it was learned this week.

Fencing at the southern end of the field by the railroad has been torn down because of the weak character of the old material, and a new struc-

ture is soon to take its place. Completion of all the work on Riddick Field will take about 30 days, in Mr. Kennedy's opinion.

Behind the concrete bleachers work is being held up temporarily on the new brick and concrete storeroom and warehouse under construction beside the spur track. This is to be completed as soon as possible.

**TALIAFERRO THOMPSON
ADDRESSES FRESHMEN**

**Says Four Kinds of Men on Any
College Campus—'Y' Staff
Presented**

"There are four kinds of men on any college campus," stated Dr. Taliaferro Thompson, at the presentation of the Y. M. C. A. staff for 1928-29 to the freshmen Sunday night.

"There is the man controlled by the crowd, the man controlled by fear of the consequences of his action, the man controlled by his convictions, and the man whose life is controlled by Christ," he stated in one of the most inspiring speeches that has ever been given to the freshmen at State College.

Throughout his speech he urged the men to begin their college career

**How Gold
Prospector
"Went Scotch"**

Minneapolis, Minn.
April 30, 1928

Larus & Bro. Co.
Richmond, Va.
Dear Sirs:

Two years ago last winter I went into the Red Lake gold fields in Canada. It was a tough trail from Hudson, over 140 miles of snow and ice. There were fourteen of us on the trail going in, and frequently at night when seated around a big camp fire, some one would ask me for a pipeful of Edgeworth. These Canadian boys sure like our Edgeworth.

In four weeks' time I ran out of Edgeworth. I was glad to get 'most any old tobacco.

One day, however, I dropped in to Dad Brown's tent, a 72-year-old prospector, and seeing a can of Edgeworth on an improvised table, back there 150 miles from the "steel," I perked up at once, saying, "Dad, I'm plum out of tobacco—how's chances for a pipeful?" "Help yourself," he said. So pulling my heavy duty pipe from my pocket, I loaded it with Edgeworth, packing it in so tightly that I couldn't get the least bit of a draw.

I excused myself for a moment, and stepped outside to remove about three pipefuls to put in my pouch. Dad stepped out, saying, "You're worse than any Scotchman I ever saw." "Then I confessed. I told him what happened to my Edgeworth—that I was just dying for a smoke, and he understood right away. He said, "Boy, Edgeworth is mighty scarce in these parts, but I reckon I can spare what's left of that can. Help yourself."

You can just bet your last nickel that I guarded this Edgeworth with extreme care until I got back to the "steel."

Yours very truly,
C. M. Bahr

Edgeworth
Extra High Grade
Smoking Tobacco

along the right lines and not to allow themselves to be gobbled up by the mob and subject themselves to mob rule. His closing plea was for these men to base their lives and all that they do throughout their four years of college life upon the principles of Jesus Christ and allow their lives to be guided by those principles.

Dr. Thompson is one of the outstanding Christian leaders of the day and is recognized throughout the world as such. Many of the students have heard him before, especially those who were at the Blue Ridge conference for the summer. Several years ago he came to this campus to preach a baccalaureate sermon for the seniors, and again this year he returned to welcome the freshmen to the campus and give them advice that might be of use to them in their college career.

Moore Speaks

Just before Dr. Thompson made his speech to the freshmen, Joe C. Moore, president of the "Y," for this year, in a short speech expressed to the freshmen the purpose of the Y. M. C. A. at State and the things that it is going to try to accomplish during this year's work.

He explained that the work of the Y is divided up into a number of different departments and branches and that in order to accomplish the best work in those branches they must be under a man who has full charge of that department of work.

The men in charge of the work for the present school year were then introduced to the freshmen in the following order: Dean I. O. Schaub, chairman of the board of directors of the Y. M. C. A.; E. L. Cloyd, dean of students; E. S. King, general secretary; T. N. Hicks, associate secretary; T. J. Grant, treasurer; B. H. Gatlin, chairman of the new student work; H. C. Green, in charge of the Bible study groups; Shelton Dunham, in charge of the hospital work; T. G. Smith, editor of the handbook and in charge of publications and literature; A. D. Stuart, chairman of the committee on Blue Ridge and other conferences; E. W. Buchanan, in charge of the publicity of the Y. M. C. A.; C. L. Clark, in charge of deputation and extension; A. B. Holden, in charge of the Freshmen Friendship Council; W. P. Albright, in charge of the religious meetings; M. L. Sheperd, chairman of the inter-racial committee; P. M. Coley, chairman of the help committee.

Plain As Can Be

The chairman of a local council in Ireland was not an educated man. He was giving his account of the year's splendid work done by the council. He read the report by the medical officer of health and quoted the death rate as 12.9 per thousand.

"Mr. Chairman," asked one of his opponents, thinking to make capital out of his lack of education, "what does 12 point 9 mean?"

"What does it mean?" replied the chairman, looking severely at his questioner. "It means that out of every thousand inhabitants twelve have died and nine are at the point of death."

**SMITH'S WORK ON FROSH
HANDBOOK IS COMMENDED**

**'Bible' Mailed to Students About
September 1 Carries Much
Information**

T. G. Smith, editor of the freshman handbook, with the assistance of the rest of the staff this year has accomplished a task worthy of praise in putting out what is undoubtedly the most complete and best handbook the freshmen have ever received.

The men who are in charge of the Y for this year state that Smith has done the best work on this book that any editor in the past number of years has done.

It is dedicated to Dean I. O. Schaub, who has always been a strong supporter of those things which make for the welfare of N. C. State College and its students.

It was mailed out to the freshmen about September 1, and carried full information and directions for them. One of the new features this year is the pictures of the members of the staff, which includes T. G. Smith, editor; R. I. Mintz, business manager, and J. P. Choplin and J. A. Westbrook, assistant editors.

It also includes a photograph of Dean of Students E. L. Cloyd, and Dr. E. C. Brooks, with a word of greeting to the new students by these men.

Other photographs include those of the Y. M. C. A. leaders for the coming year, the head of the student government and the president of the student body, and the leaders in the athletic department.

A number of new yells grace its pages and our song, "Alma Mater," which has never been in it before, is found there this year.

The handbook is very complete from beginning to end and offers the new student a fund of information that he would have to hunt for many hours if he had to locate it at different places. This includes directions to the new students as to what to bring to college and what to do after getting there. The Y. M. C. A. and its work is explained, a directory of all the churches in Raleigh, an explanation of the athletic doings at State, an account of the forensic accomplishments and their success at State during the past year, a list of the organizations, class officers, clubs, societies, fraternities, and other information of value that can only be found in this book.

Engagements

Mr. Arsl Cox to Miss Helen Tudor.
Mr. Marion Shirley to Miss Alice Acton.

Mr. Thomas Purdie Richardson to Miss Mildred Land.

Mr. John William Michels of Durham to Miss Margaret Blackwell of Waynesville.

Mr. Edgar Fred Graham of Dallas, Texas, to Miss Clara Jean Brooks of Albemarle, N. C.

Mr. William Peers Stainback of Henderson to Miss Mary Reed Watkins of Middleburg.

Mr. William Guilford Home of Rocky Mount to Miss Louise Richards of Shreveport, La. They were married in Chicago and will live in Cleveland, Ohio.

Mr. Luther Carlton Salter of Raleigh to Miss Darle Beatrice Woodeson of Raleigh.

Mr. Joseph Blount Cherry to Miss Ethel Mae Redman of Marshall.

Mr. and Mrs. George Alan Works announce the marriage of their daughter, Helen Clarissa, to Mr. James Shoffner Hathcock on Saturday, the 16th of June, 1928, Ithaca, N. Y.

Mrs. Charles Duffy Franck announces the marriage of her daughter, Julia Howard, to Mr. James Bruce Crater on Saturday, the 16th of June, 1928, Fayetteville, N. C. Mrs. Crater is a daughter of Mr. C. D. Franck, a member of the first graduating class—1893.

Mr. and Mrs. Sewell W. Chesser announce the marriage of their daughter, Margaret Rebecca, to Mr. Rupert Cecil Barnes on Saturday, the 23d of June, 1928, Raleigh, N. C.

Mrs. Charles Andrews Gwynn announces the marriage of her daughter, Mary, to Mr. William Randolph Clements on Saturday, the 14th of July, 1928, North Fair Haven, N. Y.

Mr. and Mrs. Thomas Hugh Holloway announce the marriage of their daughter, Lucy Inez, to Mr. Waverly Garland Batts, on Friday, August 3, 1928, Durham, N. C.

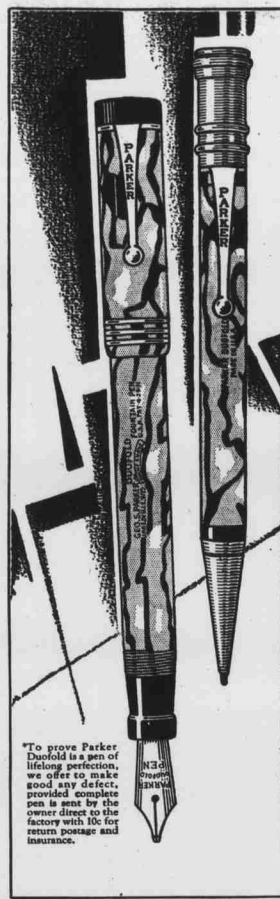

Mrs. William Alexander Hall announces the marriage of her daughter, Nancy Gai, to Mr. Bentz Buell Howard, Jr., on Thursday, August 13, 1928, at Hickory, N. C. At home after September 15, Rutherfordton, N. C.

Mr. and Mrs. John Frank McPhail announce the marriage of their daughter, Flora Virginia, to Mr. Harry Rollins Logan, on Tuesday, September 4th, at Raeford, N. C.

Mr. and Mrs. William Ashley Collins announce the marriage of their daughter, Irene Davis, to Mr. James Clarence Beal, on Wednesday, September 12th, at Nashville, N. C.

Married, M. Ayle E. Perry, of Mount Airy, to Miss Margaret L. Little, of Raleigh.

Mr. and Mrs. Marion L. Walker announce the marriage of their sister,

"To prove Parker Duofold is a pen of lifelong perfection, we offer to make good any defect, provided complete pen is sent by the owner direct to the factory with 10c for return postage and insurance."

**"Alumni News" Grows In
Size To Meet the Needs
Of State Graduates**

Once more the alumni of State College will be put in closer touch with this slim matter when the Alumni News, official publication of the General Alumni Association, will appear monthly, with the October issue as the first to carry the enlarged and improved form and make-up.

This is the first step in the planned complete reorganization of the graduates of the institution. It is the hope of the association that a "great rebirth of college spirit and alumni enthusiasm in all the local associations of alumni" will eventually result from this work.

Plans for an alumni magazine that will be a credit to State College are entertained by the executive committee of the general association. This will carry timely news of the institu-

tion and its activities and work to the widely scattered graduates.

Year before last the Alumni News was discontinued for a period of about twelve months. Need for the publication was keenly felt among the former students of State College who are now out in the field, and plans were made to finance the paper once more. Since then it has been appearing six times each year.

E. B. Owen, registrar of the college, first conceived of the Alumni News, and November 1, 1917, saw the first issue on the press. The primary object then was to publish news of State College graduates who were with the American Expeditionary Forces overseas.

For about nine years after the war the paper appeared monthly, and then came its discontinuance.

In September of last year Owen was reappointed editor of the revived paper at a meeting of the executive council, Tal H. Stafford, E. L. Cloyd, and A. M. Fountain were chosen as his assistants.

One year after resurrection of the Alumni News the pressing need for

a larger publication and one published more frequently was felt, thus leading to the recent action of the executive committee in declaring the new status of the paper.

Tal H. Stafford and Buxton White, both former alumni secretaries, have held for a time the editorship of the paper.

Overworking Caution

Harold had been to Sunday school, and on arriving home was asked by his sister what he had learned.

The lesson was the story of Joseph, and Harold was evidently full of his subject.

"Oh," he said, "it was about a boy, and his brothers took him out and put him in a hole in the ground; and then they killed another boy and took the boy's coat and dipped it in the blood of this boy and—"

"Oh, no, Harold, not another boy," his sister interrupted, horrified.

"But Harold stood his ground."

"It was," he insisted. "I know the teacher said 'kid,' but I don't use words like that."

OBERHOLZER-WENBORNE

Mr. and Mrs. E. W. Wenborne of Brockton, N. Y., announce the marriage of their daughter, Harless Emily, of that city, to Mr. Hendrik Johannes Oberholzer of Fauresmith, Orange Free State, Union of South Africa, on September 4, at the home of the bride's parents.

Mrs. Oberholzer attended school at Southern Seminary in Virginia for two years before completing her studies at Cornell University with degree of bachelor of arts.

Mr. Oberholzer studied at Stellenbosch, Cape Province, South Africa, before coming to the United States, where he entered North Carolina State College. His work for one year at this school consisted of agricultural economics, to which he added a year's work at Cornell. He returned to Raleigh the middle of the month to resume his studies at this institution, where he will finish in December, the first to graduate in agricultural economics work.

Mrs. Oberholzer is now in Raleigh with her husband. They expect later to attend the University of California.

BLACK CATS ENTERTAIN

Winding up the week's social events in Raleigh which were centered around presentation of this year's debutantes, the Black Cats Club entertained in their honor at a dance at the Woman's Club last night, from 9 until 1 o'clock.

INTERCOLLEGIATE CLUB DANCE

The Intercollegiate Club entertained the 1928 debutantes at a dance at the Woman's Club, Hillsboro street, Wednesday night, September 19, from 9 until 1 o'clock. Music was furnished by Charlie Stephenson's orchestra.

This was the first of the social events of the season honoring the young ladies of the state, who made their formal bow to North Carolina society this year.

DEBUTANTE BALL

North Carolina society was at its best among the younger set last Thursday evening, when the ninety debutantes of 1928 were presented to the social group of the state by the Terpsichorean Club at the fifth annual

Debutantes' Ball in the city auditorium.

This event marked the formal opening of the season and held the spotlight for several weeks preceding. In the past it has been one of a number staged by the Raleigh Merchants Association in putting on the Fall Festival, which was discontinued this year. Since the merchants gave up the season opening program, the Terpsichorean Club this year took the responsibility of seeing the younger set have a proper presentation to society.

The ball started at 8:30 with Mr. Sherwood Jones and Miss Sarah Busbee, assisted by Mr. Sterling Manning and Miss Landrum Norris, leading the Terpsichorean Club in the ball manager's figure. Then came the presentation of the debutantes.

Immediately afterward the ninety debutantes of this year and their marshals formed the debutante figure, led by Mr. Archie Allen and Miss Emily Storr, assisted by Mr. David Cox and Miss Annette Pucker. General dancing followed for the rest of the evening.

Music was furnished by Ted Williamson and his orchestra from Oil City, Pa., who have been playing at the Isle of Palms during the summer. Following the ball the Junior Woman's Club entertained the young ladies at tea.

Announcements

First Practice

Of the State College Orchestra will be held on Monday afternoon, and the Glee Club will meet on Monday night, both in Pullen Hall. Please be present.

P. W. PRICE, Director.

If You Wish

To change the address of your TECHNICIAN to have it sent to your girl or sent home, please drop by the office and give the circulation manager notice of where you wish it to go.

all especially appropriate for college men and women. But they are only part of the famous Wahl-Eversharp line of pens, pencils and sets. Any color, any size, any style.

You can give added zest and inspiration to your college work by equipping yourself with modern tools. These 'jewel-like' pens and pencils make writing an actual pleasure.

The pens offer a choice of the Wahl 14 points. You pick the point that fits your writing stroke.

Doubtless your favorite store carries the Wahl-Eversharp line. See him today and be satisfied with nothing less than Wahl quality. Guaranteed pens and pencils to suit every purse.

THE WAHL COMPANY
1800 Roscoe Street Chicago

WALLY SEZ:
My grandpop spluttered through on mid-Victorian instruments of torture but I'm there with the 1928 Wahl stuff. Selah!
—WALLY, the Eversharp Kid

Here's the new student desk set with metal base, pin and clip tray and pencil groove, walnut colored pen with signature nib for college man or woman.
\$7.50

Eversharp leads, designed for Eversharp pencils and best for any pencil, in this Red Top box.

Proof Positive
Young Thing: "I have brought this book back; mother says it isn't fit for me to read."
Librarian: "I think your mother must be m. ken."
Young Thing: "Oh, no, she isn't. I've read it all through."

Just to Oblige
A botanist had just discovered a new plant and asked his wife what he should call it. The lady was deep in a cross-word puzzle. "Call it Sprzophanx," she said.
"Why on earth should I do that?" he asked in amazement.
"Because that is the word I want to finish this puzzle," she replied.

Convenient Calls
Taxpayer—I've called to see the collector of taxes.
Clerk—Sorry, but he's out just now.
Taxpayer—Good! When do you expect him to be out again?

Comforting Picture
Vera—I'm going to have the baby's picture taken today.
Henry—Have it taken when he's asleep. I'd like to know what he looks like that way.
