

## GRID CONTESTS FOR TWO YEARS NOW SCHEDULED

Only One Date Left Open for Conference Game

JOURNEY TO VILLANOVA AT PHILADELPHIA IN '29

Northern Game Expected to Net in the Region of Forty Thousand Paid Admissions in the "City of Brotherly Love."

Gridiron clashes of the Wolfpack of North Carolina State for the next two years have been scheduled and filled with the exception of one date in the calendar for 1930, which is being held open for some Southern Conference team.

Villanova, at Philadelphia, Penn., once again appears on the roster after a lapse of about eighteen years. The Wolfpack met the team from William Penn's country in a fair-weather game back in 1910. Since that time the two squads have not measured swords.

The Philadelphia game, in the opinion of Tal H. Stafford, graduate manager of athletics here, will be a boon to State College because of the fifty-fifty contract and possibility of a 30,000 or 40,000 paid gate toll. The return game here in 1930 would not pull in nearly that amount, of course.

Next year the Wolfpack will have a chance to revenge itself for this year's defeat at the hands of Michigan State when that team is met on their home field. Mississippi A. and M. has also been entered on the 1929 and 1930 schedules, the local team journeying once to the delta country and receiving a return visit here the next year.

The schedules are as follows:

- 1929
- Oct. 5—Washington and Lee at Raleigh.
- Oct. 11—Clemson at Florence.
- Oct. 17 (Thursday)—Wake Forest at Raleigh.
- Oct. 26—Michigan State at East Lansing.
- Nov. 2—North Carolina at Chapel Hill.
- Nov. 9—Davidson at Raleigh.
- Nov. 16—Duke at Durham.
- Nov. 23—Villanova at Philadelphia.
- Nov. 30—South Carolina at Raleigh.
- Dec. 7—Mississippi A. and M. at Starkville.

- 1930
- Sept. 27—Davidson at Charlotte.
- Oct. 4—Washington and Lee at Lexington.
- Oct. 10—Clemson at Florence.
- Oct. 16—Wake Forest at Raleigh.
- Oct. 25—Mississippi A. and M. at Raleigh.
- Nov. 1—North Carolina at Raleigh.
- Nov. 8—(To be filled with conference team.)
- Nov. 15—Duke at Raleigh.
- Nov. 22—Villanova at Raleigh.
- Nov. 29—South Carolina at Columbia.

### Students Find Free Phone Calls Really Cost After Holiday

Easton, Pa.—(IP)—The coin slot in the public pay telephone at Lafayette college recently was left open when the phone was installed, and as a result all money used in making calls was returned. Not a few students took advantage of this as soon as it became generally known, and the telephone did a thriving business in long distance calls. The boys called home and the girl friends all over the country, for nothing.

When they returned from Thanksgiving vacation, however, they were somewhat chagrined to learn that the telephone company had traced their calls, and had taken advantage of the vacation to distribute bills for payment. Not a few students are broke.

## Students Return As Flu Subsides

SECURES "A" RATING FOR STATE COLLEGE

DR. E. C. BROOKS

North Carolina State College of Agriculture and Engineering at Raleigh, through the untiring efforts of its president, Dr. E. C. Brooks, has been admitted to the Association of Colleges and Secondary Schools of the Southern States, giving the institution a recognized standing throughout the United States as an "A" standard technological college.

The nation is divided into regions in which there is an accrediting agency for determining standards of secondary schools, normal schools, colleges of liberal arts, universities, and technological institutions. The Association of Colleges and Secondary Schools of the Southern States is the accrediting agency for states south of the Potomac and Ohio rivers, including Texas, also.

The rating of State College is accepted by the nation as a whole. The acceptance of State College into the association means that the college's standards of instruction, faculty, and equipment give it a recognized standing.

President Brooks has done much to raise the standards of North Carolina's technological institution. State graduates are now accepted at other colleges and universities and by leading business firms.

### AIRPLANE COMPANY TO GIVE SHIP AS AWARD IN CONTEST

Alexander Corporation Conducting Nation-wide Essay Contest Among Colleges

To interest more college students in aviation, the Alexander Aircraft Company at Colorado Springs offers a new Alexander Eaglerock airplane or a complete university course in aeronautics for the best series of four short monthly articles on aviation from January 1 to May 1, 1929, written by undergraduate college students.

The winner will be awarded a four-year scholarship in a leading aeronautical engineering school, or in a school of business administration, where he can get an aeronautical background. Competing students who receive undergraduate degrees June 1 may win a graduate scholarship in a technical school of aeronautics, leading to a master's or a professional degree. As an alternative award, the winner may receive a completely equipped Eaglerock. Articles of superior merit but below winning quality will win their writers 10-hour flying courses. The awards will be made June 1.

The papers, technical or non-technical, and 400 to 500 words in length, must be submitted to the committee on awards on the first of each month from January 1 to May 1. Suggested subjects include, "Future Aircraft Development," "Flying for Recreation," "Commercial Possibilities in Aviation," "The Airplane as a Future Decentralizer of Cities," etc. Candidates will be judged 30 per cent on the content of their articles, and 70 per cent on their qualifications to do justice to the scholarships. The winner, if he qualifies, will be employed in the engineering or some other department of the Alexander Corporation on January 1.

## Unexpected Extra Holiday Ends As Work Is Resumed; Examinations Start Today

### COMMITTEES NAMED BY PRESIDENT BECTON OF ALUMNI ASSOCIATION

Committees of alumni to report on various activities have been announced by J. L. Becton, of Wilmington, president of the general alumni association of North Carolina State College.

The eight committees include the following members:

Board of Trustees: Alan T. Bowler, chairman, Greensboro; J. W. Harrelson, State College; L. R. Gilbert, Weldon; Sherwood Brockwell, Raleigh; J. D. Spinks, Winston-Salem; C. G. Spencer, Carthage; Oliver S. Anthony, Shelby; Buxton White, Elizabeth City; Carl Buchan, Pinehurst.

Athletic, Alumni, and Class Organization: Tal H. Stafford, chairman; E. L. Cloyd, J. W. Harrelson, and J. E. MacDougall, all of Raleigh.

Cooperation with College: I. O. Schaub, chairman, Raleigh, and the Alumni Association executive committee.

New Students: E. L. Cloyd, chairman, State College dean of students; L. O. Armstrong, State, College; A. H. Veazey, Goldsboro; M. L. Rhodes, Lincolnton, and Henry Kendall, Danville, Virginia.

Auditing: W. V. Baise, chairman, Raleigh; John Morson and L. P. Denmark, Raleigh.

Nominating: W. F. Pate, chairman; J. M. Gray and George F. Syme, Raleigh.

Necrology: L. T. Yarborough, E. E. Culbreth, and W. L. Craven, Raleigh.

## 20 Out of 275 Co-eds At Northwest'n Say Smokes Necessities

Evanston, Ill.—(IP)—Cigarettes are considered a necessity by 20 out of 275 co-eds at Northwestern University, who answered a questionnaire sent out by the college Y.W.C.A. to 500 women on the campus for the purpose of discovering the importance of particular expenditures in their budgets.

Fifty-two were doubtful whether "smokes" should be considered a necessity, and the other 203 were certain that they should be classed as a luxury. Sport clothes are considered a necessity by 251 of the women students. Fur coats, in the opinion of 115, are a necessity, while 160 place them in the luxury class. Practically all believe that books, fountain pens, and wrist watches are absolute necessities, and 68 of the 275 are of the same opinion with respect to typewriters.

## Boys Should Have More Than One Friend of Fair Sex, Declares Minister

Columbus, Ohio.—(IP)—"Boys should have more than one girl friend," said Rev. Walter S. James in a talk at Y. M. C. A. meeting at Ohio State University on the subject, "Pettiness as a Pastime."

"One of the prime duties of a college man," he said, "is to show by living example that the age of chivalry is not dead, and girl friends offer the finest way of developing chivalry in a man."

The Rev. Mr. James pointed out that there are two types of petters, only one of which really can be called a petter. The first type is the man who loves and respects a girl, but does not have sufficient money to marry her. The second is the man who does not care for the girl, but who pets because he thinks it the thing to do. "This second type," he said, "is the one we should strive to eliminate."

## Reopening of College Questioned for a Time When Epidemic Was Expected to Return in Greater Severity.

By A. LAURANCE AYDLETT

West Raleigh, Jan. 5.—Examinations on work done during the first quarter of the school year were begun here at 9 o'clock this morning for students at North Carolina State College, having been preceded by two days of classwork at the close of the Christmas vacation.

### Flu Closes Schools

West Raleigh.—North Carolina State College was forced to close its doors at 1 o'clock, December 12, by an unexpected spread of an epidemic of influenza among its students, giving them an additional week to the fortnight scheduled for winter holidays, and dispersing them to their homes in an attempt to forestall a further spread of the disease.

The college infirmary was crowded to capacity when the executive committee of the board of trustees took action on the advice of Dr. A. C. Campbell, physician of the institution. It was one of the first of the southern colleges to close, being followed by others in North Carolina, and then Virginia and Georgia.

Fast spreading of the epidemic caused the closing of schools all through the eastern section of the country and beyond the Mississippi.

### Sc. Vs Close in Midwest

Elyria, O.—(IP)—Colleges and universities throughout the midwest found it expedient to close their doors early for the Christmas vacation this year because of the flu epidemic which swept the country.

Curiously enough, it was exactly ten years ago that the first flu epidemic struck the nation—and the world, although the first epidemic was of a much more serious nature, ending in many more fatalities. This year's flu was of a mild nature, hardly distinguishable in most cases from a hard cold.

### Students Pretend Illness

Oxford, O.—(IP)—The flu epidemic, which closed up colleges and universities throughout the midwest, reached the campus of Miami University and brought with it a wave of freshman tomfoolery.

Learning that the university hospital was overcrowded and that several colleges in the midwest had closed, Miami students went on a spree of pretended illness.

A few were sent home because of overcrowding at the hospital, and many others, envious of those who were sent home to enjoy an extra week of Christmas vacation, mobbed the university clinic, hoping that something would be found wrong with them.

Persistent rumors circulated the campus that classes would be dismissed early if the situation failed to improve.

Emphatic denials, however, were given out by President A. H. Upham, who averred that nothing but an earthquake could shake him from his determination to keep classes going.

An entire freshman dormitory paraded to the hospital for an examination, after having employed every conceivable method of assuming symptoms of influenza.

Freshmen at Fisher hall were reported to be practicing violent coughing. Others were wearing blotters in their shoes and rubbing moist tobacco in their arm pits preparatory to going for an examination at the hospital. Someone told them they

## Stitt Wilson Says Soldiers Should Conquer Cheating

By E. W. BUCHANAN

"I could weep," declared J. Stitt Wilson, in the third of his addresses at State College, referring to the forty-five questions concerning the honor system at State College, "that men in uniform ready to lick the world haven't licked the littlest devil on the campus. You ought to be insulted to be asked, 'What are you going to do with the honor system? or what are you going to do about cheating?'"

In this third of his series of lectures Tuesday morning before the college was closed because of the influenza epidemic, Wilson impressed upon the students the fact that the college campus is a college man's world for four years, and there he must lay the foundations for the character he is to carry through life.

He told the students the habits they formed here in college with regard to cheating would be a foundation for their conduct later on in life when they faced the big issues.

In the two previous addresses Monday noon and Monday night he sketched in brief outline the nature of the present civilization, showing how it has become a hostile thing and a menace to the development of the moral and spiritual life of the student, as well as the average citizen out in life.

"This age of science and machinery and business has utilized the efforts of janking in supplying the necessities of life so that the whole world is caught in the drift of gross materialism and the highest moral influence of the human race is discounted, education is becoming utilitarian, and spiritual interests are considered trivial," he declared, as he closed the address Monday night. He pointed to the press comment on the low ebb of the theatre reflector to bring out the point which he wished to make.

"The world needs to be arrested like a horse brought to its haunches when it is running to hell."

"Science, machinery, and business are not to be blamed for the present moral and spiritual situation of our civilization, but the fact that man has not learned to use these forces properly."

"We've wiped out the old-time devil with horns, but in its place we have the carnate devil of pleasure, love of money and power, that is a menace to the highest spiritual factors of the human race."

Throughout his addresses he impressed upon the students the fact that they did not have to believe what he said, but that he came here from year to year to challenge them to think

## WOMEN EXCEL MEN STUDENTS IN SPIRIT OF YOUTHFULNESS

Sophistication and Open-Mindedness Traits of Co-eds at Northwestern

"Northwestern for her pretty girls!" That's a notorious truth. Slim, shining little legs tripping up and down the rickety wooden steps of U. H. Frantic, starchy-eyed coeds dashing off to meetings, notebooks in one hand, lipsticks in the other. Gorgeous, sleepy-eyed things, incredibly slangy, witty, satirical, underdressed. "They were liberal, individual, grown up," says Bernard De Voto, former faculty member, in the January College Humor. "Here were enthusiasm and open-mindedness and sophistication. They preserved, and at Northwestern monopolized, the eagerness and arrogance of youth that have immemorably signified college."

"As for the men, I spent my time at the dormitories and the fraternity houses. I went with them to movies and restaurants and speakeasies. I joined their bull sessions. They were likable boys, companionable boys—but only boys. Where were the generous, preposterous, passionate midnight arguments that enlarged the soul? Where were the hot lusts for knowledge, sprung from a roommate's air of superiority, or a drowsing professor, or some obscure, probably lascivious allusion in a text? Where were the sparks that set youth championing anarchy or socialism or decadence? I do not say they were not at Northwestern, but they were not visible. The individual did not appear; the man who expressed a preference for golf or Sanscrit over homecoming and

## HONOR COMMITTEE APPOINTED RESULT OF STUDENT VOTE

Three Student Members and Two Faculty Men to Act as 'Grand Jury'

STUDENTS FAVOR KEEPING OF STUDENT GOVERNMENT

Plans Made for Carrying Out Present Examinations — Professors Will Make Report of Work on Class; Students to Decide Whether Professors Remain in Classroom or Not.

By T. A. VERNON

As a result of the official Student Government referendum of 37 questions, signed by 850 men, the Student Council and the faculty advisory committee have seen fit to provide for an Honor Committee to sit as a grand jury in cases of dishonesty. Dishonesty in this case is construed to mean cheating on examinations and stealing. The three student members of this committee were named last night at a meeting of the council. The faculty members are J. D. Clark and E. L. Cloyd.

Tentative plans were made for carrying out the examinations which started today. It will be left to the students to decide whether or not they desire the professor to remain in the room. The professors will make a report of the action of the class. Student Council members will be on the lookout during the exam week and will make reports, also.

Later on in the year a permanent plan for conducting examinations will be made, according to W. P. Albright, student body president.

### The Questionnaire

The first question in the questionnaire was very misleading to some students. The word "only" at the end was the stumbling block for many. Some took the question to mean "continuing or abolishing the honor system." It was meant to apply only to the retention or abolition of the honor system as applied to examinations ONLY.

The vote was overwhelmingly in favor of retaining the honor system in that manner.

The second and fifth questions were nearly the same, and received almost the same number of answers on each side.

Numbers three, four, and ten showed inconsistent answers. In the third question 685 students felt that a student who does not report another for a violation of the rules is lowering the standard of the college. In the fourth, 698 men said that they would not look down on a man for reporting another man. In the tenth, —Continued on page 2.

## College Boys Spend \$26.75 Yearly For Beauty Maintenance

Seattle, Wash.—(IP)—His masculine beauty above the collar costs Joe College \$26.75 per annum for maintenance, according to data collected from district drug stores about the University of Washington campus.

The majority of men shave themselves, and thus save from \$25 to \$75 a year in barber's fees. But this is far from clear profit. Although varying greatly according to the roughness of the beard, the average man shaves four times a week, or 200 times a year, thus consuming a 35 cent tube of shaving cream every five weeks, or \$3.50 worth a year. Razor blades amount to \$4, except for the straight edge artists, who diminish this total.

On top of that, three bottles of face lotion or after-shaving oils nick him for \$2.25.

Talcum comes to \$2 a year, it was found, and \$15 is expended in haircrems and occasional shampoos.

BACK AGAIN

Well, boys, we guess you had a good vacation; anyway, we hope you had a very Merry Christmas and from now on you will have a good New Year. It's the same old phrase folks have been wishing one another for centuries, and we put it off on you now simply because we couldn't do it before the holidays because of school closing.

BOUNDARY DISPUTES

Some time ago the Monroe Doctrine told European nations to keep out of this hemisphere, and on this basis we are to protect the property of our citizens for them. Recently we have had to take this attitude in Nicaragua because of the unsettled conditions there.

If the Coolidge administration would remain consistent with itself it should at once dispatch a force of marines to the South American scene of trouble. Bolivia and Paraguay should be treated in the same way as the Central American countries, since property and capital in the continental states is in just as much danger as it would be in a similar case in the isthmian territory between the two continents.

It is our opinion that the Federal government would refuse to send armed forces to the new scene of dispute because the countries concerned are larger than the weaker Central American republics. If force is to be used in settling argument in one part of Latin America, then it should be used to make the disputants submit their disagreement to an uninterested tribunal of arbitration. We await with interest the continuance or the abandonment of the Coolidge-Republican foreign policy of forceful coercion.

Student Forum

ORGANIZATION TONIC

The seniors at State College who belong to one or more clubs or societies are in many cases asking themselves the question: What will become of the student organizations in the future?

As the college increases in size there is a perceptible decrease in attendance and interest in many of the student activities here. Especially does this rule apply to departmental clubs, county clubs, and literary societies.

One of the reasons for this waning interest in work of this nature is that the students do not discuss the significance of extra-curricular activities in college. Clubs and societies enable one to broaden their acquaintance and to get a broad perspective as to the true values of college life. I shall go so far as to say that the successful student organizations and occasional mass meetings are prerequisite to the development of college traditions and college spirit that are so vital to the life of an effective system of student government.

The work of student organizations should be stressed because of their

Immediate social values. They furnish both a means of fellowship with students who have much in common with us and a means of comparing our abilities and those of other students.

The present dilemma in regard to student organizations offers a terrific challenge to the potential capacity for leadership among students. To put clubs and societies on a firm foundation at this institution will mean a sacrifice of both time and effort. It will mean that we must go out personally and get new recruits from time to time. After this has been done we must make the members feel that it is their organization by giving them something to do.

In order for organizations to come to their own I believe it is necessary for the officers to meet together at regular intervals and discuss plans for the subsequent meetings. These meetings will also enable the leaders to keep a close check on the progress of the club or society. The issue is before us. Are you going to evade or face it? H. C. GREEN.

MORE TELEPHONES

The college administration has taken steps to provide some conveniences for the students, but there are some yet that they have overlooked—the most important one, too—and that is the matter of adequate telephone service for the students.

There are only two telephones on this campus which are accessible to the students, and anyone can imagine the inadequate means of communication that is for one thousand students that live on the campus. When a person desires to use the phones in the "Y" he sometimes has to wait in line for his turn, it matters not how important his message may be. In some instances many hours elapse before the student even knows of a call that may be intended for him. The student is notified at meal time that there is a call, but in the event he misses that meal, he is not notified until the next meal.

The question is, Why can't the college cooperate with the students and help them to have better telephone service? Anyone that knows the situation will agree to the fact that there should be at least one telephone in each dormitory. This would take much work of the "Y" force, as well as mean much to every student. The telephone could be attended to by some student nearest it, and it would be the duty of that student to answer all calls and to find the person that was called for, and it would also be the duty of that student to see that the telephone is not torn down and carried off by some "half-civilized" student. If these telephones were operated by the college, they could also afford to pay the student in charge of the phone something for his services.

It would be a much better plan for the college to operate the telephones, and this could be done by adding a small fee to the regular fees. There is no reason why twenty-five cents per term from each student would not take care of this added expense. Who would not be willing to pay the additional fifty cents per year for the use of a telephone when he desired to make a call? Telephones are operated in this manner at other schools, and they provide very adequate means of communication for all, and why could not such a thing work successfully here on our campus? PAUL S. BALLANCE.

Student Return as Flu Subsidies

(Continued from page 1)

could in that way raise their temperature to a fever point.

One freshman shook his head violently, he requires a headache. Then he hurried over to the clinic for an examination, but received headache pills, not a vacation.

Refreshed by an unexpected vacation of three weeks for the Christmas holidays, and worrying considerably over approaching examinations, possibly wondering if the college would have to close down again because of a return of the influenza epidemic, North Carolina State students returned to the campus classrooms Thursday of this week, the day they were supposed to have registered for the second quarter, to spend a week in completing the scheduled work of the first term.

Question Reopening There was some question as to the reopening of the institution until after the large number of reported cases of the disease in the city had decreased. The influx of returning students began the first of the week, and by Wednesday it was certain the college would open on time.

More and more reports of influenza victims were received in the city as druggists were rushed to fill prescriptions as fast as they came in. Residents were warned against participating in public gatherings and were asked to take particular care against spreading the disease.

Public schools of Raleigh were stricken somewhat when a count showed a good number of pupils absent from the grades, and their teachers failing to show up in a small percentage.

Other Schools Open University of North Carolina preceded the state technical school in

opening by one day, when its students returned to class on Wednesday of this week. Duke University, Wake Forest College, and the other institutions of higher learning in the state once more loaded their campuses with students the latter part of this week.

North Carolina State basketball schedules for the pre-season period were suspended until after return from the holidays. The Tech quint will meet Furman University in the first hardwood contest of the year on January 8.

Honor Committee Appointed Result of Student Vote

(Continued from page 1)

429 men said they would not report another man.

The vote was overwhelmingly for immediate suspension of a man found cheating. There seemed to be little difference between students on the question of penalizing freshmen the same as upperclassmen for violations. A man should be warned before being suspended for cheating, say 774 against 65.

It was favored that students in each class elect a committee of five to handle the cheating when it occurs.

Machinery of Student Government In the questions under Machinery of Student Government it was shown that the students favor the continuation of student government, having students sign an oath, voluntary student government instruction, compulsory instruction for student government members, quietness in dormitories and frat rooms or houses after 8 o'clock p.m., a faculty advisory committee, allowing the accused to be present throughout the whole

Soon Due For Another Trimming

trial, jury trial, support of the majority opinion as expressed in the referendum, and many others.

Want Jury Trials

Answers to another part of the questionnaire showed a feeling among the students that jury trials before the Student Council were preferred to the closed court system now in vogue.

The greater majority of the students expressed willingness to serve on these juries if selected, should the new system be tried. They also desire prosecution and defense attorneys, and the consensus of opinion seemed to tend toward the accused student choosing his own counsel.

Dr. E. C. Brooks, president of the college, made known these facts at a general meeting of the student body at chapel period yesterday.

The official report on the questionnaire follows:

Official Student Council Questionnaire

To the Members of the Student Body of North Carolina State College: The following questionnaire is submitted by the Student Council to the student body for the bringing about of a more perfect Student Government at State College along the lines of high standards of honor and better cooperation between faculty and students:

The Honor System

Note: Check "Yes" or "No" after each question

- 1. Do you wish to continue the Honor System as applied to examinations only? Yes, 164; No, 648. 2. Do you feel that faculty members should supervise and entirely control the conduct of students on quizzes and examinations? Yes, 127; No, 71. 3. Do you think that the student who observes a violation of the Student Government code of honor and does nothing to correct such an offender is guilty of lowering college and student honor? Yes, 682; No, 35. 4. Would you look down upon a man who would report another for cheating? Yes, 114; No, 606. 5. Do you object to faculty members remaining in the classrooms during tests and examinations? Yes, 74; No, 752. 6. Do you think that all students should agree to sit one seat apart during tests and examinations to lessen temptation and to give more freedom of action? Yes, 671; No, 167. 7. Do you favor the immediate suspension of a man found cheating? Yes, 799; No, 674. 8. Do you favor an honor committee to consider all cases of dishonesty on tests and examinations? Yes, 445; No, 177. 9. Should a freshman found cheating be treated with the same severity as an upperclassman? Yes, 416; No, 429. 10. Will you report a man if you see him cheating on tests or examinations? Yes, 283; No, 449. 11. Do you favor warning a man once before reporting him for cheating? Yes, 747; No, 55. 12. Do you favor having students in each classroom elect a committee of five men to handle cheating in that class at time of occurrence? Yes, 239; No, 599. 13. Do you favor having every student sign a pledge of honor on each quiz and examination? Yes, 328; No, 500.

Machinery of Student Government

- 14. Do you favor the continuation of Student Government? Yes, 799; No, 49. 15. Do you favor requiring every student entering State College to subscribe under oath to a stated creed of Student Government and gentlemanly honor? Yes, 498; No, 321. 16. Do you favor a voluntary course in instruction in Student Government for development of a knowledge of Student Government among all students? Yes, 743; No, 76. 17. Do you favor a compulsory course of instruction for all members and officers of Student Government (House and Council)? Yes, 573; No, 244. 18. Do you favor having students in each dormitory and fraternity house elect a Student Government committee to govern the

student conduct in each dormitory and fraternity house? Yes, 481; No, 369. 19. Do you favor quietness after 8 p. m. in the dormitories and fraternity houses or chapter rooms? Yes, 732; No, 98. 20. Do you favor a faculty committee to sit with the Student Council in execution and administration of Student Government? Yes, 439; No, 598. 21. Do you favor a Faculty Advisory Committee for Student Government with power to advise only? Yes, 698; No, 139. 22. Do you favor allowing the accused to be present throughout his complete trial? Yes, 501; No, 43. 23. Do you favor absolutely open trials, whereby all the evidence presented could be printed in all the State papers? Yes, 385; No, 452. 24. Do you favor a jury system to decide the innocence or the guilt of the accused? Yes, 735; No, 111. 25. Would you be willing to serve on such a jury? Yes, 692; No, 126. 26. Should the accused have the right to select some student to defend him? Yes, 807; No, 32. 27. Do you favor a committee to work out penalties according to seriousness of offense committed? Yes, 721; No, 196. 28. Do you favor a separate committee composed of faculty and students to measure out penalties to the offender? Yes, 446; No, 331. 29. Do you favor a prosecuting attorney and defense attorney? Yes, 669; No, 147. (a) Should they be elected? Yes, 429; No, 238. (b) Should they be appointed? Yes, 254; No, 433. 30. Should the sentence of punishment for conviction be imposed immediately following trial? Yes, 446; No, 345. (a) Or should it be imposed the next day? Yes, 351; No, 337. 31. Do you favor suspending a man from college if found under the influence of intoxicating drinks? Yes, 488; No, 328. 32. Should men found drinking at athletic contests, dances, or in the dormitories and fraternity houses all be subject to the same punishment? Yes, 601; No, 227. 33. Do you favor having one day set aside during the first few weeks of the fall term

to explain Student Government and what it means to the student body? Yes, 813; No, 21. 34. Do you favor having all students exempt from term examinations who average 85 or above, for the purpose of raising scholarship? Yes, 758; No, 47. 35. Do you favor one compulsory assembly period each week for all students? Yes, 402; No, 430. 36. Will you support at all times your duly elected officers in the enforcement of Student Government? Yes, 764; No, 40. 37. Will you support the majority opinion as expressed by the students in this referendum? Yes, 769; No, 23.

Smoker "J" Awaiting Loved One

Jamesburg, N. J., December 2, 1927  
Just a-sittin', smokin' Edgeworth  
An' a-thinkin', dear of you;  
An' a candle's burnin' brightly,  
An' it says your love is true.  
For the days are long, of waitin',  
An' the nights are longer still,  
An' sometimes (always smokin')  
I pick up this old quill—  
An' try to write some poetry  
To tell you of my love.  
As poetry it ain't much good,  
But—holy days above—  
It's just the best I can, an' so  
You'll find me, when I'm through,  
Just a-sittin', smokin' Edgeworth,  
An' a-thinkin', dear, of you.

### ELEVEN-YEAR-OLD SON OF PROF. BROWNE TURNS POET

Writes Several Stanzas Depicting Virtues of Our College Football Players

Joseph Moyette Browne, 11-year-old son of T. E. Browne, director of the State College school of education, and one of the most loyal supporters of State College athletic teams, has turned poet. He has just written "State College Team," a tribute to members of the 1928 football varsity.

Young Browne gave each line of his poem much thought and put in writing verses as he worked them out. Several were conceived in the boy's mind as he lay in bed at night, and he would get up immediately and write his thoughts.

The poem is as follows:

#### STATE COLLEGE TEAM

Ole State College plays the best—  
Better than Carolina or all the rest.  
Our good ole coach is Gus Tebell,  
He knows just what the boys to tell.  
Doc Sermon keeps our fellows in shape  
With mercurchrome and adhesive tape.  
Cap Warren is a hero of mine  
Because he can always break that line.  
Chink Outen isn't very fast,  
But oh, man! he can have a pass!  
Preddy Crum is a galloping hound—  
That's how he makes each touchdown.  
John Lepo is fine at tackle:  
His work makes the crowd all cackle.  
Bill Metts can sure center a ball  
When the quarterback gives his call.  
Vaughan may have to sit on the side  
Line an hour,  
But, boy, when he gets in play he  
Shows his power!  
Melton's a man who can run:  
After one touchdown he's not done!  
Frank Goodwin is a man so tall  
He's the one who catches the ball.  
Of Sparky Adams I make this bet:  
He'll make a good drop-kicker yet.  
Jordan is a rather small man;  
He can catch a pass, he surely can.  
Mayfield's a good playing chap;  
No one could ever call him a sap.  
Floyd is a fine playing fellow,  
His tackles make all the crowd bellow.  
Now all join me in singing this toast:  
Of Ole State's team we always boast;  
I'll write them a poem, and sing them  
A song—  
This old team that keeps fighting along.

### Women Excel Men Students In Spirit of Youthfulness

(Continued from page 1)

induced it without shame, who went walking at sunrise because that was his whim, or indulged himself with the ladies of the street corner because that was his whim also. There was no individual. The dreadful Philistinism of adolescence was on them, and overlaying it was a Philistinism more discouraging still. A shadow lay across the Evanston campus, the notched, half Gothic shadow of the buildings that were rising on East Chicago Avenue downtown. Northwestern boys moved with uplifted eyes toward the school of commerce. It was the launching of Becoming. The college must be big, it must be influential, it

must be a servant of Chicago, it must be wealthy—above all it must be wealthy. Presidents who were not ministers began to appear, even presidents who were not Methodists, presidents who were business men. The board of trustees began to fill with Presbyterians, Jews, and Episcopalians.

"There remains the faculty. Like all faculties it had its share of quacks. A few very annoying, some pious, some ignorant, some militantly dull. As a group, they are orthodox. They do not burst out into anything that might embarrass Weiboldt Hall or the next endowment campaign. Not only orthodox, religious, economic and social, is required, but also the will to approve the course of things. And that will is more desirable even than scholarship and professional competence."

### Have you ever tried asking your friends?

Any man who wears John Wards will tell the same story.

The leathers in John Wards are choicer, wear better. The fit and workmanship are more expert. They have more style appeal to men of the better class.

The prices? \$7 and \$9.

**NEW HOME OF CIVIL DIVISION NOT FIRST BUILDING OF ITS OWN**

The last issue of THE TECHNICIAN described the rear wing of the new physics and electrical building as the first home of the civil engineering department all to itself.

In a letter to this publication C. L. Mann, professor of civil engineering, makes clear the situation his department has held up to the time it was removed to the new quarters.

An excerpt from his letter follows: "As a matter of fact, Winston Hall was designed by the Civil Engineering Department, and was built primarily to accommodate this department and the Electrical Engineering Department. At that time, 1909, temporary plumbing was put in the top floor to accommodate the Chemistry Department. The Civil and Electrical Engineering Departments occupied the main floor and the basement floor. The plans then were to erect a separate building for the Chemistry Department.

"Later the temporary plumbing could not meet the requirements, and about 1915 or 1916 the plumbing was reinforced and added to for the purpose of taking care of the Chemistry Department laboratories on the third floor, since no new building had been provided for that department.

"Two years ago the top floor was remodeled for chemistry, and later it was announced that the whole building would be remodeled for chemistry and assigned to that department. A year prior to this the Electrical Engineering Department had moved over to its new quarters, and the Civil En-

**Your Attention is Called to These ANNOUNCEMENTS**

**Debate Try-outs**

postponed to Friday, January 18, at 4 p.m., in Room 109, Pullen Hall.

Each candidate for the squad should prepare a five-minute speech on either side of the subject: "Resolved, That a committee of expert jurists, three in number, should be substituted for the jury in all trials." He should also be prepared to give a one-minute rebuttal speech, answering any of the arguments presented by speakers on the opposite side.

This is your only chance to qualify for the regular varsity debate squad this year!

Engineering Department was occupying its original space on the first floor and basement floor, and then took over the space formerly occupied by the Electrical Engineering Department. Plans were then in progress for the erection of a new Civil Engineering Building."

**GRIMSHAW THINKS RAYON MANUFACTURING IS STILL IN ITS STAGE OF INFANCY**

Manufacture of rayon is still in its infancy, and greater strides will be made in its development in the next five years than have been made in the last ten, this in itself promoting new uses and opening new channels for rayon in an ever-widening market, in

the opinion of A. H. Grimshaw of the Textile School faculty of North Carolina State College.

It is impossible, Mr. Grimshaw believes, to place a limit on the potential increase of the use of rayon. He thinks there is reason to believe that there will be more rayon mills coming to this and other Southern States in the near future.

"Two plants, one at Asheville and the other at Burlington, are creating new opportunities not only to the laboring classes, but for many college graduates," said Professor Grimshaw, who is an authority on textile chemistry. "The Burlington corporation already has employed several State College graduates, and there is the possibility of the need of additional textile experts."

Chemists at State College have tested water from several cities in this section of the country, and reports disclosed that the water in localities selected for rayon plants to be especially suited for rayon manufacture. Its softness and clearness, with a low iron content, are prime factors.

Mr. Grimshaw estimated that any water flowing from the Blue Ridge Mountains could be used for this purpose.

The Textile School has made several tests for mills throughout the industrial sections, Dean Thomas Nelson's faculty and experts using samples sent in by the mill owners.

**MAJOR ZAFRA IS GRANTED LEAVE OF ABSENCE FROM N.Y.U. TO WORK ON INDEX**

New York University has granted the request of The American Society of Mechanical Engineers that Major Carlos de Zafra, a member of the engineering faculty of the University, be given leave of absence for one year, to devote full time to the direction of The Engineering Index Service.

This service, operated without profit to the society, is a most useful aid to research and industry at large through the dissemination of knowledge. It reviews approximately 1,700 technical publications, in 17 languages, from 37 countries, and issues annotations in card index forms. Over 42,000 index cards, involving over 100,000 references in all branches of engineering, have been issued since the first of the year.

Major de Zafra has, during the past two years, devoted much of his time to this important research project, and his release by New York University is an endorsement of and contribution to this monumental undertaking.

**WARREN'S BROTHER TO FIGURE IN UNIVERSITY RING MEETS THIS YEAR**

Chapel Hill.—There is another of the fighting Warrens on the University of North Carolina boxing team this year. Young John Warren, brother of the nationally famous Add Warren, will step into the light heavy-weight berth on the Tar Heel squad, filling the post formerly held by his pugilistic brother.

The Tar Heels boast only four letter men as they prepare to defend the Southern Conference championship won last season, and this younger Warren is hoped to fill a big hole. John Warren fought the light heavy class with last year's freshman team, and many observers say he shows even more promise than the Add Warren that is now scrapping for Gene Tunney's abdicated throne.

**NEW DIVISION OF MINE ENGINEERING IS FORMED; GREAVES-WALKER LEADER**

Demands for experts trained in mining of non-metals in this and other states has brought about the establishment of a new department of mining engineering at North Carolina State College. It was announced recently, with Professor A. F. Greaves-Walker, head of the Ceramics Department, in charge.

Departments of conservation and development and of geological surveys are asking for college men trained in this work, and so far as State College authorities can learn, no other institution in the United States today is giving instruction along this line.

State College has already received requests from feldspar companies, the Arkansas State Geological Survey, Rutgers University, and the University of the State of Washington for men trained in mining non-metals; it was learned. The department this college session has nine senior students in the course, with indications that all will secure positions soon after graduation in June, or will secure fellowships in eastern and western institutions for graduate work.

Professor Greaves-Walker is considered well fitted for directing the instruction of students for non-metallic mining. He has been a leader for several years in ceramic and mining development. The course is expected to attract students from far distant states, as the present graduating class in mining has men from Florida, Pennsylvania, Ohio, and Massachusetts.

**WESTINGHOUSE HAS SEVEN SINGLE PHASE 3-WINDING WATER-COOLED CHANGERS**

The Canadian Westinghouse Company has built and is installing 7 single phase 3-winding transformers of the water-cooled type at the Leaside Station of the Hydro-electric Power Commission of Ontario. These transformers will form the connecting link between the 230-mile Gaitneau-Toronto transmission line at 220,000 volts, and the Niagara transmission system at 112,500 volts, and the Toronto Hydro System at 13,200 volts.

The transformers have 3 windings each of 15,000 K.V.A. capacity, which is equivalent in an ordinary 2-winding transformer to a capacity of 22,500 K.V.A. at 25 cycles, or to 30,000 h.p. They have the largest physical dimensions of any transformers so far built in Canada, occupying a floor space of 131½ feet by 20 feet. It is 34 feet from the floor line to the top of the high voltage bushing. Their total weight is 184 tons.

**WHY TO PRINCETON?**

Princeton, N. J.—(IP)—Considerable amusement has been furnished the Princeton University campus by the publication by the Princetonian of a list of answers to the question of all entering students: "Why did you come to Princeton?"

Here are a few of the answers: "Father and brother Princeton men, Princeton spirit, tradition, and reputation."

"Thought more college life could be found here."

"Because my father wanted me to go to Yale."

"I didn't know the place then."

"To graduate."

"Advantages of country life can never be overstressed."

"Because I like the atmosphere of beautiful buildings and gentlemen."

"Tux—Rubens was such a wonderful painter that they say he could change a laughing face into a sad one by a single stroke."

"Lux—That's nothing. When I went to school my teacher could do the same thing."

"Willie—See that man over there? He's my grandfather."

"Henry—Is he on your mother's side or your father's side?"

"Willie—Oh, he sticks up for both of them."

"Neighbor—I am very sorry, old man, that my chickens invaded your garden."

"His Neighbor—That's nothing; my dog ate your chickens."

"Neighbor—That's great; I just ran over your dog with my car."

**EARLY THINKS LOCAL BAND AND MILITARY UNIT THE BEST EVER**

The local Reserve Officers Training Corps, with its specially trained band, promises to become the best R. O. T. C. unit that has ever been organized at North Carolina State College, in the opinion of the commander in charge, Major C. C. Early.

Major Early has just issued General Orders No. 2, in which he highly commends the showing the student officers have made.

"The State College regiment is an exceptionally fine looking military unit, and is a credit to State College and to North Carolina," said Major Early. "The regiment has made an admirable impression upon the citizens of Raleigh. The soldierly appearance, deportment, and fine physique of the members of the regiment, the well-fitted uniforms, and the excellent marching of the students, have been commented on favorably by all."

Major Early also commended the band, directed by Major P. W. Price, for its good showing. "It is desired at this time to also highly commend the R. O. T. C. band for its appearance and excellent march music. The State College R. O. T. C. band is undoubtedly one of the best R. O. T. C. bands in the United States."

The superior showing made by the regiment was due mainly to the fine spirit and zealous efforts of individual members of the regiment, said Major Early.

**WESTINGHOUSE ELECTRIC HAS NEW INSULATING IDEA FOR USE ON ITS PRODUCTS**

Westinghouse Electric and Manufacturing Company has recently started using a new insulation for the heating wires of electrical appliances. It is called Corox and is remarkable in having a higher insulating value at elevated temperatures and at the same time higher heat conductivity than mica, asbestos, and other materials generally used to insulate electrical heaters. By virtue of these properties Corox improves the efficiency of electric heating apparatus by 10 per cent and lengthens the useful life of the heating element two or three times.

An unusual feature of Corox is that it is made from metallic magnetism, which is a conductor of electricity.

The actual heating element, which is resistance wire of a high melting point, is wrapped with metallic magnesium ribbon. Steam at 450 pounds pressure is then forced over the element and the magnesium metal changes, first into its hydroxide and later to the oxide. The result is a heater wire which is embedded in a hard, dense, white substance, resembling marble. The heating unit thus formed is almost indestructible in normal use.

This new insulation is being regularly used in several of the company's products.
