

## STATE COLLEGE DEBATERS' SPEECHES ARE PUBLISHED

"Public Discussion and Debate" Carries Composition by Tiddy

That the State College debaters teams have been and are continuing to be efficient is clearly shown by a reference from one of the college debaters' speeches that was used in one of the most up to date debating manuals that has been published.

The book entitled "Public Discussion and Debate," author, Prof. A. Craig Baird, of the State University of Iowa, published by Ginn & Company, New York, is the most up to date and most authoritative book in the field of argumentation.

Professor Baird, before going to Iowa, was coach of the internationally famous debate teams of Bates College, Maine, the first American college to defeat Oxford University of England.

In his chapter on "Analysis of the Proposition," he quotes from a speech delivered by J. Edwin Tiddy, of N. C. State College, in a debate with Duke University in 1926.

Professor Baird writes: "One of the most effective ways to define is to illustrate. Such method is effective because vivid and clear. The illustration may be an example, an analogous case, or a contrasted case. In a discussion on the proposition, Resolved, That the rules of the United States Senate should be revised as suggested by Vice President Dawes, the following explanation uses effectively his form of definition:

"To bring it home to you, let me explain to you, in a personal way, how the plan of cloture for the Senate which Mr. Dawes advocates differs from that which prevails there at present. You are all members of some organization—your literary society, your lodge, your farm club, your church, your literary society, your lodge, your farm club, your church, your young people's society.

"Now, as you know, such an organization holds a business meeting once in a while—called a deliberative meeting in the parlance of parliamentary procedure. Now, if in such a meeting you were governed by the present Senate rules, it would be possible for any member of the organization to stand up and talk just as long as he wanted to on any motion that was brought before the house.

"In fact, he would not have to talk straight to the point all the time, either. He could start off by making it appear that he was going to talk about a certain point involved in the motion, and then he could say or read anything that he pleased. He could recite poetry, or read a novel, or give a lot of dry statistics from some departmental report a hundred years old.

"He could do anything he pleased to kill time, and the rest of the members would have to let him keep right on for at least two days and perhaps much longer unless they could get two-thirds of the members together to put through a device for stopping him. Of course, you would not all have to listen to him, for you could go out and eat and sleep and do anything you pleased. But, in the meeting, that member would have the floor and nobody could take it away from him."

(From University Debaters' Annual, 1925-1926, p. 13. Reprinted by permission of The H. W. Wilson Company).

### Majority Men Are Slaves Says W. D. Weatherford

(Continued from page 1)

difficult decisions in the light of all the higher things of life, and that many people or the great majority, though free politically, are virtually slaves to a few passions, the greatest of which is fear.

"The majority of us act in the light of some little good, and not in the light of the greatest good for all," he declared, bringing his speech to a close.

"Freedom is having the whole life balanced and ruled by no single passion—appetite or pride." "How many of us are free from our fears?"

### Stafford Returns From Successful Visiting Among Alumni Chapters

(Continued from page 1)

is carried on all during the year by means of correspondence and visits. At least one visit a year is paid to each of the alumni chapters. Ted Stafford, the alumni secretary, does most of the work. Athletics have been taking much of his time lately, but most of that part of his duty is over until baseball season opens. He will start to work in other sections soon. During the Southern Conference basketball tournament Stafford will most likely attend the Georgia alumni meeting, and after the tournament will visit the other graduates. After this he will be tied up with making plans for the annual reunion of former students during commencement.

A great part of the alumni work is carried on in the summer, when there is more time to put on it. During that time Stafford goes around and keeps

## NEW BERNIAN IS LEADER

Charles E. Hibbard of New Bern is the cadet lieutenant colonel of the North Carolina State College Reserve Officers Training Corps, and holds several other high positions, including the presidency of the senior class and manager of the varsity football team of 1928.

Hibbard is in the school of civil engineering at State College and plans to make this profession his life work following graduation in June.

He is a member of the House of Student Government, the honorary Golden Chain leadership fraternity, Tau Beta Pi, Blue Key, Theta Tau and the American Society of Civil Engineers' chapter.

### Weatherford Speaks At Luncheon In His Honor In Cafeteria

"A man in order to be a success in any phase of life has to have some kind of tool to work with," Dr. W. D. Weatherford said at a luncheon given in his honor in the special dining room at the cafeteria Monday at one o'clock.

"A man's success in life is based on three different things. First, he is endowed with certain qualities and innate powers; second, he obtains additional powers by education and from his association with other people, and thirdly, he must have a tool to work with."

Dr. Weatherford is president of the Y. M. C. A. graduate school at Nashville, and was here primarily to inform the students who might be interested in specialized religious training concerning the ability of his college to give them that training.

He showed that any man in order to make the most of his life must have some kind of tool to work with. Some of those indicated were a large business firm, a church, a court, or anything with which a man makes his place in life.

"In this day of specialization and expert training if we would preserve the ancient institution of religion we must have men specially trained in that line," he continued.

"The teaching of religion today must be carried on by men who have been prepared to do it in accordance with the discoveries of this scientific world. The findings of science will not make us lose our religion and concept of God, but will only give us a deeper understanding and appreciation of that God. But in order to get that concept, we must have men who have trained in a modern way to be religious leaders."

He discussed the ability of the Y. M. C. A. graduate school to give men who were interested in becoming religious leaders that training, and brought out the fact that men had all the opportunities there to become Y. M. C. A. secretaries, Y. M. C. A. physical directors, or any other phase of religious life that a man might be interested in. The school is located between Vanderbilt University and Scarritt College, and the students at the Y. M. C. A. graduate school have all the opportunities of getting the work from the instructors in those colleges as do the students of the colleges themselves. He expressed his desire that those who were interested at least investigate.

Members of the cabinet, and promotion force of the local Y. M. C. A. present were: Dean E. L. Cloyd, Professor L. L. Vaughan, Dean I. O. Schaub, W. C. Bangs, B. C. Rogers, Henry Brock Anderson, E. W. Buchanan, J. E. Moore, C. H. Belvin, C. L. Clark, M. L. Shepard, Paul Choplin, T. A. Grant, H. C. Green, T. G. Smith, E. C. Overall, W. P. Albright, A. D. Stuart, Henry Love, R. H. Gatlin, R. S. Dunham, and E. S. King, Y Secretary.

the men in touch with the college, tells them what is being done here and what is being planned. He also sees that the college gets its share of the students from the State, and tells what the school has to offer them in the way of courses.

Frosh: "Who is this Ann How I hear about?"

Soph: "She is some relation to Sue Perlativ."

## PEN COMPANY PROMOTES AVIATION IN COLLEGES

Monoplane "Parker Duofold" Is Making a Tour of Colleges

The Parker Pen Company, Janesville, Wisconsin, has long been a believer in commercial aviation, and operates its own airplane to speed up the conduct of its business.

Wishing to do their bit to encourage interest in aviation among college students, officials of the company have arranged to have the plane visit as many colleges as possible during its trips around the country.

At each college, complimentary flights are given to a certain number of students, usually selected by a drawing for "lucky numbers" conducted under the auspices of the college newspaper.

At Purdue University, Lafayette, Ind., over 1,700 students registered for a chance for a free "air ride," which is typical of the interest shown at every college the plane has visited to date.

During the winter months the plane is being operated in Southern States, and the following colleges are included in its itinerary: Georgia Institute of Technology, Tulane University, Rice Institute, University of Texas, University of Kansas, University of Missouri.

The Parker plane, christened "Parker Duofold" by Amelia Earhart, is a 410 h.p. Fairchild Vespene cabin monoplane, top speed 140 miles per hour. It has double the horsepower of the ordinary cabin monoplane, as this provides an additional factor of safety in taking off in small fields or flying over mountainous territory where high flying is advisable. The plane will climb to an altitude of 20,000 feet with full load, and will climb the first 10,000 feet in 13 minutes.

It is equipped with every device for safety and comfort—brakes on the wheels for quick stopping on the ground and easy maneuvering, heated cabin, quarter-million candlepower landing lights, and many other technical devices recently developed to aid safe flying.

The pilot, Edgar LaParle, has a record of over 3,000 flying hours—a record equaled by few airmen in this country.

The Parker plane, painted red with black-tipped wings to conform to the well-known Duofold pen color scheme, always attracts attention wherever it goes, and thus makes a very effective advertising medium for the Parker Pen Company and its products.

### F. M. Haig Writes Paper On Dairying Industry

(Continued from page 1)

milk, 55.3 gallons; butter, 17.32 pounds; cheese, 4.36 pounds; condensed milk, 14.32 pounds, and ice cream 2.77 gallons. Thus it is seen that dairying is on a sound and healthy basis. The population of this country is increasing at the rate of more than a million and a half each year, and each person is consuming more dairy products each year.

"In fact, since 1916 production and consumption of dairy products has increased 51 per cent. This great increase in production has been brought about while the number of cows per thousand consumers has decreased 16 per cent. This shows that the dairymen are improving their cows, by proper methods of feeding and breeding, thus getting a great deal more milk from less cows."

"Successful dairymen are not trying to see how large a herd they can breed, but are trying to increase the production of each cow. There is no economy or profit in keeping twenty poor producing cows when ten good dairy cows will produce more milk than the twenty poor ones. In 1916 the average milk produced per cow in the United States was 2,700 pounds, while in 1926 the average production jumped to over 4,700 pounds per cow."

"Pure milk contains everything in perfect proportion, including minerals and vitamins, for the growth and health of young and old, in the most digestible and economical form. Every child should have at least one quart of milk per day."

"There is no substitute for butter. It is a wonderful food and gives heat and energy, aids in growth, and helps in digestion and assimilation of other foods. Nothing adds more to the palatability and enjoyment of a meal than butter."

"Cheese is a real food and is not sufficiently appreciated and used. It contains nearly twice as much protein as average beef, and its fuel value is more than twice as great. "Ice cream is delicious, nutritious, and good for everyone, young or old, sick or well, on any occasion. In recent years the manufacture of ice cream has developed into an enormous business."

"During the past few years the use of milk drinks at soda fountains has greatly increased. They are refreshing, nourishing, and wholesome."

"Thus, the consumption of dairy products has greatly increased during the past ten years. A survey made by the American Dairy Council dur-

ing the year 1920 indicated that approximately 20 per cent of the consumer's dollar was used for dairy products. Increased consumption raised this to 25 per cent in 1926. Dietary scientists state that in the interest of health and efficiency at least 30 per cent of the consumer's food dollar should be expended for dairy products."

"Frank O. Lowden, ex-governor of Illinois, paid the following tribute to the dairy cow:

"The cow is the most wonderful laboratory! She takes the grasses of the pasture and roughage of the field and converts them into the most perfect food for man. In that food there is a mysterious something which scientists have found essential to the highest health of the human race, and which can be found nowhere else. Men have sought for centuries the fabled Fountain of Youth. The nearest approach to that fountain which has yet been discovered is the udder of the cow. Without her milk, children languish, the vigor of the adult declines, and the vitality of the human race runs low."

### Brown Urges Golden Rule In Modern Business World

(Continued from page 1)

ships we must build, too; and the result will be a race of ship and armament building. Why cannot the United States be a leader in peace instead of a leader in shipbuilding?"

Mr. Brown's lecture covered the subject of foreign investments in collaboration with relation to international relations and its connection with the part of the United States in world peace. In developing the lecture he spoke of the experience of Germany and her downfall. Then brought in the financial history of the United States of the past two decades.

The fact was brought out that the United States up until 1900 was a debtor nation, and at the present time it is one of the largest creditor nations in the world. This change from one to the other has brought about a different set of economic conditions from that which previously existed.

A surplus of capital was found, and the necessity of seeking outside investments became apparent. High interest rates invited capital to South and Central American countries. But instead of those who invest in those countries becoming citizens there, as they probably should, they have still remained citizens of the United States.

The piling up of enormous fortunes in those countries in the name of foreigners has aroused a kind of feeling of hatred against those who own it, and necessarily against the nation who protects them.

"An ill-conceived feeling has become rampant in the United States that God did not make the people in Central America, but that they are a providential accident. But they are just as human as we, and what we need is simply to put ourselves in their place and see how we would feel if other nations came into our country and usurped our capital and wealth, while we had to do as they said," he declared.

## Honor Banquet Given Four Poultry Judges Recently Returned

(Continued from page 1)

F. W. Cook told about the value of competitive judging in poultry education, and J. A. Medlock told about Broadway and the theatres.

The most interesting report was given by C. F. Parrish, poultry extension specialist, of the winnings made by chickens by 4-H club members at the Madison Square Garden Show. Note the high percentage of first-place ribbons. From 42 birds carried to New York, 41 won ribbons, of which 37 won first place. This is a distinction worth while, and is typical of State College's products.

W. F. Armstrong, associate professor of poultry husbandry, who has been coaching these teams for several years, humorously described his efforts in training and chaperoning the team.

"No other department in the school shows a finer spirit than the spirit shown at these banquets," said Dr. Z. P. Metcalf, director of teaching in the school of agriculture.

About 100 students attended the banquet last Friday night, and among other invited guests were Dr. P. T. Abernathy, Dr. William Moore, W. L. Clevenger, N. W. Williams, John E. Foster, B. A. Sides, Dr. L. H. Snyder, and J. B. Cotner. The present officers of the club are: R. W. Shofner, president; J. P. Choplin, vice-president, and P. J. F. Pepler, secretary and treasurer.

### Holden and Moore Win Senior Debate For Pullen Group

(Continued from page 1)

good authority, he admitted the weaknesses in the system, and left the remedy of them to his colleague, Moore.

Green of Leazar advocated a discrediting of the present system, and presented the three expert jurists as a substitute.

Following this speech, Joe Moore showed how the weaknesses of the present system could be remedied, and how the plan presented by their opponents was weak.

The affirmative rebuttal was very weak, and which, capped by a strong negative rebuttal, gave the laurels to Pullen.

The men were allowed ten minutes for their constructive speech and four for rebuttal. The judges for the evening were Professors E. E. Goehring, T. L. Wilson, and R. O. Moen. Chairman, J. A. Westbrook.

This is the first debate that Pullen has won in two years, but it seems that they have started out to take them all, for they certainly had this one won after the first affirmative speaker took his seat. They, the affirmative, lacked the proof and the conclusive style of speech that the Pullen delegates used, and McKinnon was not up to par at all. It seemed that he lacked preparation on the subject, but this was not the case with the negative team. They had the proof; what they lacked was time to give all of it.

## Reserve Board Would Not Cause Flop, Says Wood

(Continued from page 1)

tain their reserve from a common pool the size of which is controlled by Federal Reserve discount and open market policy.

"The Federal Reserve certainly could bring about a general restriction of credit and fall of prices, but it would involve all markets, and not merely the stock market. The board can no more deflate the stock market, leaving other markets untouched, than they can deflate the price of cotton without involving all other commodities. It is unthinkable that the board would throw the country into depression merely in order to reduce stock prices. Commerce and industry show no signs of unhealthy speculative activity, and no general credit restriction by the authorities in Washington is warranted."

"It is unfortunate that the Federal Reserve Board should have issued a statement that will lead some people to believe they have the power to make or unmake individual prices. The stock market is in such an overbought condition that any official statement of an alarming nature is likely to start liquidation."

"If a lot of people lose money speculating in stocks they will probably blame the board, although the board in fact are not responsible for their losses. The board most certainly can determine the total amount of banking funds at the disposal of the country, but they cannot determine the use that is made of those funds."

## Rainbow Tracked to Blue Tin

Newton, Ill., Feb. 22, 1928

Larus & Brother Co., Richmond, Va.

Gentlemen:

The tobacco samples you sent me have been received, and they are great. If you can picture in your mind the looseness of a traveling man in a small town on a rainy night, not a friend in a hundred miles, nothing to do and no place to go:

That was the position I was in when your samples of Edgeworth came. It was like a voice from above when I opened the package and got the old pipe steaming.

I have smoked various brands of tobacco for the past fifteen years, but never in my life have I found a tobacco at any price that will equal Edgeworth. It does not bite the tongue, and a beautiful aroma follows. With the good old friend pipe and a can of Edgeworth you can dream of the rainbow's end.

Please count me in the future as an Edgeworth booster.

Very truly,  
(Signed) Al Stanley

# Heels Ring 35-34 Against State; Duke Wins 32-21

## Red Terrors Lose To Chapel Hill's Fast Aggregation

Miss of Foul Spells Defeat of N. C. State Quint

OUTCOME DOUBTFUL TILL LAST MINUTES OF PLAY

State Opened Up With Strong Game After Carolina Makes First Score—Goodwin Stars For Local Team.

By FRANCIS TRIPP

University of North Carolina basketball players grabbed the lead in the Big Five race by nosing out N. C. State College five by a 35-34 score in the Frank Thompson gymnasium last Wednesday night in one of the most exciting and closely played games ever staged here.

A foul basket by George Cathey, substitute Tar Heel center, brought the visitors the lone point necessary for the win during the last few minutes of the game that gave a packed house its full quota of thrills.

State opened up strong after Carolina had begun the scoring. After ten minutes of play they were leading by a 15-9 score. Frank Goodwin, lanky State pivot man, gave the spectators a remarkable exhibition of basket shooting, caging nine straight points during the first half and ran up a total of 19 points before he was removed from the game during its closing stages for committing four personal fouls. Carolina came back with a rush just before the half closed and with the brilliant Satterfield leading the attack they tied the count at 15 all as the period ended.

Goodwin opened the scoring in the second half and excitement began. First one team would swing into the lead and then the score would be tied. At one time Carolina pulled ahead to gain a 27-23 margin, but State came back to tie the game amid the deafening din of its supporters. Referee Rawson had a hard time keeping things in order and drew plenty of criticism from the gallery, but he had a tough job on his hands and did good work under the circumstances.

Both Warren and Goodwin were sent to the showers during the latter part of the game, but State was in there until the final gun put an end to things. Satterfield, the brilliant little forward of the Tar Heel quintet, was the visitors' star. He was all over the floor and tossed in the basket from all angles. Frank Goodwin and Larry Haar did most of State's scoring. Goodwin's performance was particu-

## STATE FRESHMEN LICK CAROLINA TAR BABIES

Brown of State in Fine Form to Lead His Teammates to 32-20 Victory

Doe Sernon's freshmen basketballers made their bid for the State championship stronger Wednesday night when they turned back the Tar Heel Babies from Carolina, 32-20. The freshman machine was never matched by that of Carolina. Only once were they forced for the lead, and that came late in the first half.

Brown, State forward, was without doubt the best man on the floor. This chap ran wild; the whole Carolina machine could not stop him. On one occasion he was knocked for a few "stars," but Doe Sernon patched him up and everything was o. k. Another star in the freshman lineup was Brown's running partner, Woodard.

The Tar Babies had a small chape by the name of Greene that gave State guards more trouble than all the rest of the team put together. This fellow had an eye for the basket that was nearly perfect. It was during the first half that he caused trouble, for his eye for the iron ring went wild in the second half.

State opened up the scoring, and before Carolina knew what it was all about six points were registered for the freshmen. Carolina seemed to come to life after this sudden rush, and they chalked up three field goals in succession to knot the score. The half ended 14-12 for State.

The second half was less close, as State opened up a passing and shooting attack that seldom failed to net two points. State scored 18 points in this half while Carolina added 8 points to her 12, the final score being 32-20, State.

larily brilliant and he was easily the outstanding man on the court.

## Next Year's 'Pack Now In Operation On Two Gridirons

The 1929 edition of the North Carolina State College Wolfpack football varsity is now in the making on Riddick and Freshman fields, as Coaches Gus Tebell and Butch Slaughter whip the 60 candidates into shape for practice contests.

Ten lettermen, 24 reserves, and 26 rising sophomores make up the squads, which have been divided, Tebell working the Reds and Slaughter handling the Grays, for the pending full-time scrimmages. The first rough-and-tumble workout saw 56 candidates swing into action, and 11 came out with bloody noses after veterans and hefty freshmen had hooked up for 40 minutes of play.

Tebell is interested in what material he may get from the ranks of the 1929 sophomores, 26 freshmen of Buck Drennan's squad having been awarded numerals. Some outstanding former high school and preparatory school players are included in the lot, which is as follows:

W. D. Avera, Smithfield; Bill Grigg, Shelby; J. H. Gardner, Greensboro, and R. S. Ange, Wendell; ends; Frank Cooper, Newton, Swindle Garner, Mt. Olive, Wilbur Nylen, Winston-Salem, H. W. Tucker, Monroe, David Garfield, Jr., Albion, Mich., and A. Lawrence, Scotland Neck, tackles; L. A. Buffalo, Garner, T. C. Cooke, Raleigh, J. S. Culbertson, Woodleaf, L. P. Warren, Raleigh, and L. E. Osborne, Albemarle, guards; Russell Garner, Mt. Olive, and Captain F. Gorham, Raleigh, centers; Bill Rand, Macon, Ga., and E. L. Davant, Jr., Greensboro, quarterbacks; Ardrey S. Brown, Charlotte, F. Dellinger, Cherryville, H. Fulford, Montcalm, W. Va., C. L. Goodwin, Raleigh, John Walton, Jr., Columbus, Ga., halfbacks; Malcolm Barbour, Erwin, and Bud Rose, Marshall, fullbacks.

## VAUGHN PRESENTED SILVER WATCH BY COACH GUS TEBELL

Fred Vaughn, State College senior and All-Southern Conference football guard during the past season, was presented with a silver wrist-watch at the freshman chapel Wednesday by Gus Tebell. The watch was given by the Southern Conference football committee in commemoration of Vaughn's All-Southern Conference berth.

In presenting the medal Tebell cited the progress of Vaughn through his four years of work as a football player. It was not his pre-known knowledge of football that he received in high school that won him this honor, but it was his ability to stick to a job once given him and his desire to learn the game. Vaughn's first two years of college football were rather dull, but he stuck to it and was repaid by the high honor of being an All-Southern guard.

## State Basketball Prepare For Last Meets of Season

With their second and last game of the season with the University of North Carolina Tar Heels played off here Wednesday night, the North Carolina State College basketballers are now prepared to put in final practices for the final trio of basketball games on their season's card, all coming next week at home, with Wake Forest, Davidson, and Virginia Military Institute.

The contests with the Baptist Deacons and the Presbyterian Wildcats will settle State's final standing in the State Big Five championship race, while the game with the V. M. I. Cadets will add or detract in Southern Conference standings of the two quintets.

Wake Forest will play a return engagement to Tebell's five at the Frank Thompson gymnasium here on next Monday night. State defeated the Miller cohorts in the Raleigh auditorium, 27-20, in January.

V. M. I. comes here on Friday of next week for a one-game stand. The Cadets lost to Virginia by a one-sided score last month, while State defeated the Cavaliers 41 to 15 two days later.

As to the Davidson Wildcats much interest is awaiting the coming of Monk Younger's quintet, which

## Duke Wins Over State Basketball By Score of 32-21

Duke University Gymnasium, Durham, Feb. 15.—The N. C. State College "Red Terrors" fell victims to Duke University basketballers here last Saturday night and were defeated by a 32-21 score in a hard-played game. The Blue Devils win gives each team one victory in their annual series.

The first half was exceptionally close and the lead changed hands several times. State took the advantage at the start, but Duke came back strong to tie the score near the end and a basket by Councillor gave them a 12-10 margin at the gun.

State failed to tie the count after the start of the second half and Duke maintained its lead until the end. Joe Croson, Blue Devil pivot man, led the scorers for the evening with a total of 11 points. Councillor, a sub-forward, was runner-up for scoring honors with eight points.

State scored six field goals and nine from free throws for a total of 21 points. Duke presented a strong defense and the State forwards experienced difficulty in scoring from the field.

Goodwin and Haar led the scoring with eight points each. Goodwin collected three field goals and two from free throws, while Haar collected two from the field and four from free tosses.

The line-ups:

Duke	G.	F.T.	T.P.
Jankowski, r.f.	1	0	2
Councillor, r.f.	3	2	8
Candler, l.f.	1	2	4
Rogers, l.f.	2	0	4
Croson, c.	5	1	11
Werler, r.g.	1	0	2
Farley, l.g.	0	1	1
Totals	13	6	32

State	G.	F.T.	T.P.
Young, r.f.	0	0	0
Mason, r.f.	0	0	0
Haar, l.f.	0	0	0
Atkinson, l.f.	0	4	8
Goodwin, c.	3	2	8
Croson, c.	0	0	0
Johnson, r.g.	0	2	2
Warren, l.g.	1	1	3
Totals	4	9	21

Referee, Minton (Lynch).

bowed over Duke University recently. The game will be the final contest for State, which enters the Southern Conference tournament at Atlanta early in March.

Tebell's starting lineup remains about the same, with Larry Haar and Captain Hank Young at the forwards; Frank Goodwin, center, and Bob Warren and M. Johnson, guards, although Young may not play the entire time.

## Washington and Lee Wrestlers Defeat State College Men

The State College wrestling team met defeat at the hands of Washington and Lee Thursday afternoon in the Frank Thompson gymnasium. The match was very close and was not decided until the last two events, when the visitors won the meet by winning over their last two opponents.

The matches were as follows: 115-pound class: Eason (S.) defeated Bowes (W. & L.), time advantage 8 min. 55 sec.

125-pound class: Kaplan (W. & L.) defeated Stovall (S.), time advantage 4 min. 11 sec.

135-pound class: Capt. Rule (W. & L.) defeated Perry (S.), time advantage 7 min. 32 sec.

145-pound class: Capt. Moore (S.) defeated Belser (K. & L.), time advantage 2 min. 18 sec.

155-pound class: Jones (S.) defeated Hall (W. & L.), time advantage 2 min. 28 sec.

165-pound class: Choplin (S.) defeated Palmer (W. & L.), time advantage 5 min. 23 sec.

175-pound class: Clark (W. & L.) threw Croson (S.) in 7 min. 9 sec.

Unlimited class: Bolton (W. & L.) threw Dameron in 1 min. 50 sec.

Final Score: Washington and Lee..... 16 N. C. State..... 12

## GYM CLASSES PREPARE FOR DEMONSTRATION TO BE HELD LAST OF MARCH

The various gymnasium classes are preparing for the Physical Education Demonstration to be held the last week of the winter term, and it is expected the coming program will be the biggest and best of all.

This event is not an exhibition, but a demonstration of the work given to the gym classes of J. F. Drennan, "Butch" Slaughter, and J. F. Miller.

It is the same work the students follow throughout the term. The program will range from the formal marching, calisthenic drill, mass apparatus work, volley ball, tennis, basketball, boxing, and golf to the leaders' corps group in tumbling and work on the horizontal and parallel bars.

The affair will close with an attractive exhibition of water sports in the pool.

"Did you hear the one about the Scotchman who opened his pocket book at Christmas?"

"No."

"Well, two June bugs flew out."

## ELLINGTON LEADS FROSH TO VICTORY OVER DUKE

State's Elongated Center Counts Eleven Points to Feature 21-20 Victory

With Joe Ellington, local Raleigh boy, finding the basket for 11 points, the State College freshmen defeated the Duke Blue Imps on their court Saturday night 21-20. This victory put the two institutions on a par for the night's work, as the State varsity bowed to the Duke machine 31 to 22.

Brown and Woodard, State forwards, ordinarily high scoring men, were held in check by the Duke guards, but Duke did not have enough men on the floor to keep the freshmen covered. Ellington was a flash all over the court, his steady style of play keeping the Duke Imps on the run. Ellington counted for over half of his team's 21 points, getting 11 for his share. Rose, fast State forward, counted six points to rank next to Ellington in scoring honors.

Duke's best bets were in Brist and Carter. These chaps counted six points each, Brist sinking two field goals and two free shots, and Carter looping the basket for three field goals.

This victory was the second over the Blue Imps this season. State barely nosing out a victory a few weeks ago. This win also further proves that the State freshmen have a strong bid for the state championship.

## Wasn't Asking Me

"Pa," said Clarence, "what do they mean by nursing a grouch?"

"That is what a wife does when her husband is home sick," snapped Ma.—Selected.

"Folks, how can I make Whoopee up here...when down in front the 'coughers' are whooping?"

EDDIE CANTOR  
Premier American  
comedian starring in  
the glorious new  
production, "Whoopie."

Maybe the audience would be grateful if I stepped to the footlights some night and voiced the above protest about the 'coughing chorus' down in front.

"But that wouldn't be kind and it wouldn't be just. The cougher doesn't cough in public on purpose. He can't help it. It embarrasses him as much as it annoys his neighbors.

"What he needs, to avoid that throat tickle, is an introduction to OLD GOLDS."

(SIGNED)

Eddie Cantor

Why not a cough in a carload?

OLD GOLD Cigarettes are blended from heart-leaf tobacco, the finest Nature grows. Selected for silkiness and ripeness from the heart of the tobacco plant. Aged and mellowed extra long in a temperature of mid-July sunshine to insure that honey-like smoothness.

On your Radio... OLD GOLD PAUL WHITEMAN HOUR... Paul Whiteman, King of Jazz, and his complete orchestra, broadcasts the OLD GOLD hour every Tuesday from 9 to 10 P. M., Eastern Standard Time, over entire network of Columbia Broadcasting System.

And as we write this, the snow falls again. "Ain't nature grand?"

We've discovered what appears to be a decent working new typewriter in our office. It's a Royal.

The Senate of North Carolina is to be congratulated on the work it has done in giving the electorate of the State a secret ballot bill.

We are sorry to learn of the death of H. B. Dewar, and express our sympathy with his family. One never knows where next the clammy hand of death will fall.

The press of the State is to some avail, after all. Quite often during the past week several Senators spoke of the demands of the press, the pulpit, and the "punchy" We are glad there is a feeling now that the people should have what they want.

Several members of the upper house of the General Assembly of 1929 seem to feel that the Australian ballot law is an implication that elections in their sections are fraudulent. It is not necessarily that, gentlemen of the Senate, but North Carolina is offsetting in advance any attempts at unfair dealing.

## THE DEATH SENTENCE

The 1929 General Assembly has on docket a bill to abolish the death penalty in this State for three of the four crimes now considered capital offenses. Burglary, arson, and murder are to be taken out of the category, while rape is still to be in its old status.

Ex-Governor McLean never saw an execution, yet many men went to the chair during his administration. Many members of the North Carolina legislature are in the same position. We should venture to say the new chief executive is like his predecessor in this respect, although we have heard nothing said about the matter.

Were the General Assembly and the Governor to visit that little octagonal room in the white-topped tower—a room that has meant the end of the world for almost a hundred men since 1912—and to witness the usual tableau there, the death penalty would be abolished the next day.

They could not unimpassioned listen to the whine of the generator five yards away, nor unmoved look upon the pallid face of the condemned man as he followed his ministers into the room.

They should see the mute, bewildered expression on the face of some who go silently to their death, not knowing what the whole thing is about. They should hear the quavering voices as black negroes read their consolation from the Scriptures.

The mumbling after the strap is fastened across the doomed man's face, the sudden silence when the current reaches the body, the thud of the body against the straps as the muscles tighten and knot, and the laboring drone of the dynamo surging its electricity over the nerve channels—the complete vitaphone would get under the skin of North Carolina's legislators.

To abolish such treatment of condemned criminals in this State

would probably be their first thought. And that is as it should be. Why should we subject people to such torture as the electric chair imposes upon them?

Yet, if North Carolina is to do away with its capital offenses, it should do away with all of them. There is no reason to leave rape in the category of death crimes and take the other three out. Why not do away with the thing in this State altogether? Take the electric chair out of the State Prison and junk it! Pull a sample execution for the General Assembly and we would guess at unanimous consent of that body.

## SECRET BALLOT HERE, TOO

Now that the State of North Carolina has on its statute books an act providing almost absolute freedom and secrecy for the voters of the commonwealth, it would be only the logical thing for such a system to be inaugurated at State College, since this is a State institution.

Some place can be arranged on the campus where there can be sufficient opportunity to carry out the campus elections in such a manner as would bring commendation on the school for its use of the modern balloting system.

If the rest of the country is going forward with the latest developments in government, it would seem only reasonable that college and universities should adopt those plans and keep up the stride. For that matter they should be the first to undertake such, since it is the institutions of learning which are supposed to lead the country and it is from them that new ideas are expected.

Why, then, can the Student Council, the student body concurring, not install Governor Gardner's ideas at its alma mater? It would be another symbol of the leadership in North Carolina collegiate activities.

## THE HOMESTEAD LAW

It is a notorious fact that man intensely resists change. Witness the struggle North Carolina has had with its secret ballot bill since about 1913. Look at the county situation in Tarheelia. The General Assembly had rather add another tax to the pocketbooks of citizens of the State than touch anything relating to the established order in the county organization of the commonwealth.

Strange, too, it seems that an enactment of the carpetbag government after the days of the Civil War should still be used in governmental and administrative circles.

Several years ago the Legislature of this State passed a law giving each citizen a homestead in North Carolina. If his debts were more than he could meet his real and personal property to a specified amount could not be touched for satisfaction of those debts.

An exemption of \$1,500 was given each resident of the State from execution under bill of sale, and of this sum \$1,000 was allowed in real property and \$500 was personalty. This may have been necessary to save the whites from the scawagw administration and negro rule in days past. Why is it necessary now?

Any man in this State can now defraud his creditors by applying for a homestead exemption under the law. The money he borrowed from some one he can refuse to repay and the lender can have no recourse. Even if he is given a judgment it would be of no use against a man claiming he has not sufficient property to permit the sale of it.

Why not have a repeal of an out-of-date piece of legislation?

## SPITTERS

Should State College men spit on the floor of the Y.M.C.A. picture show? That is the question propounded to us twice within recent weeks, coming the first time as a total surprise.

How many of the campus residents would go into one of the downtown theaters with a quid of tobacco in his mouth and expectorate the juice therefrom on the floor of the building?

How many men here would do the same thing in their homes? How many would do it anyway if the lights were burning while the pictures were on the screen?

Is it conducive to the best health to spread bacteria in a puddle of tobacco juice on the floor of a public place? Is it convenient to feel one's shoe slide along the boards and almost park the seat of one's trousers on the scene of another's thoughtlessness?

If student must chew their to-

## EXCELSIOR!

With Apologies to LONGFELLOW  
By Another LONGFELLOW (6 ft. 1/2 in.)

The shades of night were falling fast,  
And out by State College there passed  
A youth in a car—not so nice:  
The top was missing, a strange device,  
EXCELSIOR!

His brow was sad; his eye beneath  
Looked like a clown, just from Keith.  
The poor boy's driver could hardly run,  
But the horn sounded in that well-known  
EXCELSIOR!

In happy homes he saw the light:  
With his girl he'd had a fight;  
His auto lights hardly shone,  
And with every bump he let a groan,  
EXCELSIOR!

"Try not the crossing," the watchman said:  
"Many have tried and come back dead."  
The people in the graveyard now abide,  
But he didn't care, and just replied,  
EXCELSIOR!

"Oh, stay," his sweetheart said, "and rest  
Thy weary head upon my breast!"  
A tear stood in his bright blue eye,  
He pushed down the gas with a sigh,  
EXCELSIOR!

Beware the dangerous Rocky Branch!  
Its wicked waters sing awful chants.  
By this time his Ford did look a sight:  
The engine was knocking up the height,  
EXCELSIOR!

At break of day the Ford did prance:  
The lad was taking an awful chance.  
Then he uttered that repeated prayer,  
"Gee, whiz, my car can't run on air!"  
EXCELSIOR!

A traveler stopped his faithful car.  
When he slammed on the brake he got a jar.  
The radiator was filled with ice,  
The thing had only stalled but twice,  
EXCELSIOR!

There is a twilight, cold and gray,  
Where his Ford will rest some day.  
Up in the sky, serene but far—  
A voice fell, and called the car  
EXCELSIOR!

He who laughs last doesn't see the  
Joke in the first place—and he who  
laughs continually is a fool.

A ring on the finger is worth two on the head.

"The Legislative Grind" sounds "cranky" to us?

And the Senator said: "He sat right down and stood right there."

Note: "We'll bet that was rawther inconvenient."

Jimmie Gerow playing "foot-notes" on the "shoe-horn." Note: Notes.

## News in Brief

Kiwanians have night club.  
Emmett Bishop hit on head.  
Several drunks arrested.  
Boy held up man.

Each "step forward" the Senators take for the Australian Ballot they leave it that much further away.

baeco while enjoying the bi-weekly movies, they might at least carry along a cup or a piece of paper for their expectorant.

Were another epidemic of flu to strike the campus there would be a sick list of a third of the student body as the result of such practice as this. Let's stop it, boys. You wouldn't do it if your mother or your girl were with you. It isn't being done in the best places.

## Too Many For Him

An Irishman was out gunning for ducks with a friend, who noticed that, though Mike aimed his gun several times, he didn't shoot. At last he said:

"Mike, why didn't you shoot that time? The whole flock was right in front of you."  
"Oh, know," said Mike, "but every time I aimed me gun at a duck another man came right between us."

## ARE WE APPRECIATIVE?

This is an appeal to all State College men. I do not think we are appreciating, or, at least, showing our appreciation to Mr. Gilbert T. Stephenson for his great interest in us. He has taught the Sunday morning class of State College men at Pullen Church for several years.

Since I came to college I have made my class my regular place of attendance on Sunday mornings, because I am sure he gives me thoughts and ideas no other man I know could give. His advice is practical and beneficial, because he knows our college life problems and how to solve them.

By his good services Mr. Stephenson has been progressing in his business and social affairs since he finished college at Wake Forest. Recently he was promoted to a higher office of the Wachovia Bank and Trust Company, of which he was already an officer. The office that he now holds requires him to stay in Winston-Salem during the week. Instead of moving his church letter to the Camel City he comes back to Raleigh to teach the State College class every Sunday morning.

The Pullen Church was built mainly for the Meredith girls and the State College boys. Do we appreciate the interest shown us at Pullen Church? If so, let's attend the services and take part.

J. L. SHEPHERD.

## LITTLE KNOWN OF SOILS UNTIL RECENTLY, CLUB IS TOLD BY C. L. NEWMAN

Professor C. L. Newman, associate editor of The Progressive Farmer, gave a very interesting and valuable talk to the Soil Science Club, Wednesday evening at 6:30.

Professor Newman brought out the fact that the soil is one of the oldest substances that we have record of, but that up until twenty years ago little had been done to understand its composition and importance.

Knowledge of intricacies of the soil is still obscure to most people who cultivate it. On one occasion, Professor Newman stated, a woman asked him why she couldn't grow strawberries on her farm. So he asked the general type of the soil, and her reply was "dirt" soil. This classification includes all soils and excludes none, but does not classify soils according to series and type on which adaptability of certain crops depend.

Realizing that plant and animal life make soils, the present generation must go forward to seek more scientific knowledge of them.

George: To avoid being an old maid, would you marry a fool?

Ruby: Why—this is so sudden. (Wham.)

The first petting party was the time Jupiter fed Juno ambrosia and nectar. Which is nothing but a descendant of the old joke which read: "What is the difference between nectar and elixir?" "Why, before he married his wife, he nectar. Now elixir."

## Magill Tells of Foreign Religions in Council Talk

In speaking to the Freshman Friendship Council Sunday afternoon, O. R. Magill, regional secretary of Y. M. C. A., stated that the Christian religion is not the only religion that has contributions to offer humanity.

Magill, having had wide and varied experience in Y. M. C. A. here and in foreign lands, is very able to express his opinion of the various religions. It so happened that Magill appeared on the campus at a time when the council was discussing the various religions. H. C. Greene, leader of the group, realizing that what Magill would say would be of very great value, turned the program over to him, after small business matters had been transacted.

Members of the council listened attentively to Magill for one hour while he related different instances of his experience to illustrate his point. He impressed upon the members of the council that in helping someone else we would usually derive as much benefit from it as the one we were helping. It is his idea that everyone has something to give to someone else, no matter which religion they belong to. He very interestingly told of an occasion when he had spent a vacation with a monk of a religion other than Christianity, what an inspiration it was to him; and how, after having associated with him for some while, he influenced him to adopt Christianity as his means of salvation. Magill impressed the fact that not only did he teach the monk, but while so doing he, also, was benefited by knowledge acquired by being in the presence of that particular man.

The time being up, the speaker closed his lecture, leaving with the students the message that, although the majority of the non-Christians may seem peculiar to us, very logical and sensible ideas can be found in all of them. He left the thought with the students that if another man did not have exactly the same ideas and opinions of a Supreme power that we did, not to think that he was absolutely wrong and out of line with his fellow-men.

Next Sunday the same subject will be discussed, taking it up at the conception of sin in the non-Christian religions. All freshmen are cordially invited to attend these meetings.

Professor Greaves-Walker Re-elected Beta Pi Kappa National Presiding Officer

Professor A. F. Greaves-Walker of the Department of Ceramic Engineering was re-elected national presiding officer of Beta Pi Kappa, professional ceramic engineering fraternity, at the annual convocation of the fraternity held in Chicago last week. He will serve for the next biennium.

While in Chicago Professor Greaves-Walker attended the annual meetings of the American Ceramic Society and the Canadian National Ceramic Society, of both of which societies he is a past-president; the American Refractories Institute and the American Society for Testing Materials. In the latter society he was re-elected a member of the important committee on standards on building brick and refractories.

## WEARING OF CAPS UP TO SOPHS, THINKS BLUE KEY

### Discuss Caring for Visiting High School Basketball Teams Next Month

A request that the sophomore class and the entire student body take the initiative in seeing that members of the first-year class at State College observe the rule of Student Government and wear their caps on the campus was the high spot of the bi-weekly meeting of the Blue Key honor fraternity yesterday.

Mention was made by some of the members of the organization of the fact that several freshmen had been going about the city and campus without the prescribed headgear and giving as their reason the lack of replacements at the office of the dean of students. Other caps have been ordered and are now in the dean's office, so such excuse will not hold water henceforth, it was brought out.

Considerable discussion came up over the snowballing last Wednesday night of the gymnasium crowds as they left Frank Thompson gymnasium after the North Carolina-North Carolina State game. Severe condemnation was made of such practice.

A subject that has been rampant for several weeks was that of the housing facilities of visiting teams, and coupled with this at yesterday's meeting was the problem of caring for members of the high school basketball teams that will come to the campus next month for their annual tournament.

Because several members were not present and a complete report was unobtainable on the hand petitions begun some time ago, this matter was carried over until another two weeks have passed to allow more time in getting students' names on the papers. If this project goes through the faculty council it will mean the complete outfitting of the band in uniforms next fall.

## RIFLE TEAM OUT TO WIN NEW HONORS IN COLLEGE CONTESTS

Having won four out of five matches shot with teams representing every section of the United States, the North Carolina State College Reserve Officers Training Corps marksmen are now out to take regional honors in the Fourth Corps Area of the regular army.

Charles H. Jourdan of Durham is high man so far, with Thomas H. West of Seven Springs runner-up on the team, which is captained by John H. McKinnon of Red Springs, one of the finalists last year at the national matches held at Camp Perry, Ohio.

Selection of the team came through the plan of each R. O. T. C. company in the State regiment entering 10 men. Company D won the final try.

Rifle shooting is open to the entire student body and has been declared a minor sport by authorities. About 30 intercollegiate matches are pending. State has won from University of Wyoming, Oklahoma A. and M., Western Maryland, and Connecticut Aggies this season, losing only to the crack Cincinnati (Ohio) Collegians.

Shoulder-to-shoulder matches are scheduled with Davidson at Davidson in early April, and with University of North Carolina freshmen shooters later.

## Accounting Fraternity Holds Meeting; Budget System Is Discussed By A. S. Brower

At the regular monthly program meeting of the Sigma Alpha Kappa Accounting Fraternity, Friday at noon, A. S. Brower, C. P. A., comptroller of the college and instructor in purchasing and storekeeping, gave a talk on the "Budget System and Its Relationship With the Control of the College."

Besides the members of the fraternity that were present there were also several visitors. The speaker presented the budget system from its beginning four years ago to its present indispensable use in appropriating the necessary funds to the various departments. The old method of issuing funds when needed was not sufficient to meet the need of the state. The budget now takes care of the situation by means of an appropriation for the entire year. This is then allotted to the department as it is needed.

State College each year is appropriated nearly a million dollars to carry on the administration and upkeep of grounds and buildings. This does not include the amount for new buildings.

"It is the aim of the fraternity to present such a program to its members and other students interested in the field of accounting each month. The next business meeting is to be held next Wednesday, and all members are asked to be present," said the president.

## EDITOR GETS IN BAD BY WRITING ARTICLE ON SUBJECT OF PETTING

Toronto, Ont.—(IP)—L. J. Ryan, editor of the Toronto University "Varsity," is in bad with the board of governors of the institution because of a "petting" editorial which he wrote recently.

The board has ordered him fired, but the student organizations refuse to support the move.

A portion of the offending editorial follows: Last week a prominent middle-aged clergyman told his hearers in gentle tones and with irrefutable logic that petting was dangerous and that it should not be practiced. The divine claimed that petting was a new institution, that it exacted gestures intended only for the larger intimacies, and that it debased the coinage of the soul.

In the first place we admit that although petting is a new institution, it is a widely accepted one. In fact petting as an institution has come to be recognized by all who are not willfully blind to existing conditions.

We confess that we cannot see in this situation any great cause for alarm, nor can we see that the generation so much in the spotlight is in danger of losing its moral sense entirely.

## OCCUPATIONS OF WOMEN SURVEYED IN N. J. COLLEGE BY SOPHOMORE CLASS

New Brunswick, N. J.—(IP)—An occupational survey is being conducted at the New Jersey State College for Women by the sophomore class.

At a recent class meeting the ten most popular occupations of its members were separated, and those supporting them were placed under separate chairmen.

The groups, at separate meetings are discussing the advantages, opportunities and demands which those particular positions offer women.

The ten occupations voted most interesting were department store field; dramatic work; interior decorating; journalism; library work; mathematics; music; personal work; social work; and stenographic, secretarial and executive positions.

## DEVELOPMENT OF MAGNETITE

Minneapolis, Minn.—(IP)—As a result of experimental work by the University of Minnesota Mines Experiment station, millions of tons of low-grade magnetite on the eastern end of the Mesabi range, formerly worthless, are now under development.

University ore experiments have made it possible for a \$5,000,000 plant to be built, and when operations are begun, the income provided will be more than enough to make up for the cost to the state of the School of Mines and the Mines Experiment station.

The machine which has made possible the use of this hitherto worthless ore was invented by E. W. Davis, superintendent of the station.

## BOOK ON BOOZE WRITTEN

Moscow, Idaho—(IP)—The legal aspects of international booze running activities have for the first time been gathered in book form by Professor W. E. Masterson, of the college of law of the University of Idaho. His publication, just off the press, is entitled "Jurisdiction on Marginal Seas."

A surgeon in Mexico City has performed a major operation on a patient anesthetized by alcohol. Some of these doctors will do almost anything to make operations popular.

## PUEBLO INDIANS PRESENT PROGRAM IN PULLEN HALL

### Group Composed of Members of One Family of Acoma Tribe

The Pueblo Indian group gave an interesting and unusual program in the Pullen Hall February 8, at 8:00 o'clock, before a large audience made up of students here, towns people and Boy Scouts.

The group was composed of Chief Big Snake, head of the quintet and chief medicine man of the tribe at the Acoma Pueblos in New Mexico, his daughter, Princess Morning Star, and his two sons, Blue Sky Eagle and Wolfrobe, and his adopted son, Ray Silver Tongue, the singer and chanter of the tribe.

Chief Big Snake opened the program with a talk in which he gave some of the tribal customs and told of their life in the southwest. Following this an Indian dance was given called the "Buffalo Dance." Next the singer, Silver Tongue, gave his version of an example of a typical Indian song. A demonstration of sand painting followed this, after which the primitive way of making fire was shown. The program was continued with the "Eagle Dance," and a reading by Wolfrobe. The program ended with the presentation of three more of the tribal dances, the "Bow and Arrow," "Scalp Dance," and the Indian "War Dance." All of the Indians were dressed in their native costumes, which gave much color and variety to the program.

This group has been with a large circus in Germany for the last three years, where they gave a program similar to that presented here. After leaving Germany they went to Washington, where they remained for two and a half months, making phonograph records of their tribal songs and legends for the Smithsonian Institute.

They are now on a tour of the South in their journey back to New Mexico, giving performances and lectures as they go. They filled several engagements while in Raleigh, and were entertained by Professor C. C. Cunningham a number of times.

They are leaving today for Durham, where they will present the same programs that were seen here. They are backed by the school officials and the Boy Scouts.

## Electrical Class Return From Tour of Power Plants

(Continued from page 1)

capped by the roads being made slick by snow, the bus was turned around and the return trip begun.

On the way back to Raleigh a short stop was made at Yadkin, just out of Salisbury, where the Bucks Steam Plant was examined. This plant, better known as the Duke Power Plant, is very unique in that its source of power is secured solely from pulverized fuel. The output is 70,000 KW.

The only stops made between there and Raleigh were Greensboro, where a short visit was made to N. C. C. W., and at Durham the water plant was visited, but due to the wetness of the weather it was of little success, a cording to one of the students.

This trip was an aid to the seniors in engineering from the standpoint that they were able, not to solicit jobs for the future, but that they were able to get a general idea of the actual running of a modern power plant. It is required by all the students making the trip to write a complete description of one of the plants visited. This report will be counted as equal to one laboratory period.

Those making the tour were H. M. Pemberton, W. E. Mosley, J. H. Whittington, K. P. Haywood, W. M. Gaston, O. N. Rich, A. B. Kinney, C. B. Perry, John Perry, A. L. Tanfield, C. M. Calhoun, H. O. Hamrick, O. M. Carpenter, Dan Hutchinson, R. H. Lewis, C. H. Harshaw, J. A. Taylor, W. F. Bristow, J. D. Shaw, R. L. Selby, J. T. Mason, D. C. Mitchell, and Professor R. R. Brown.

R. L. Selby acted as the leader of the party and saw that everything was carried out smoothly. W. M. Gaston was the official entertainer, and also acted in the capacity of assistant driver.

When some big Prune, The son of a Nut, Marries a Lemon, And the Pear Have a Peach of a daughter, With Cherry Lips, And the Rose in her cheeks—How in the Devil Can you believe in Heredity?

"Dad, did Moses suffer with indigestion?"

"I am sure I don't know," snapped his father, "but I am sure I know that 'Well, I think he must have had it because our Sunday school teacher told us that God gave him tablets.'"

I never saw a purple cow, A big one or a wee one; And, with the hooch we're getting now, I'd rather be than see one.

## Psychologist Says Cause Of Laughing Process Is Blocking of the Impulses

Cleveland, Ohio.—(IP)—"Laughter is caused by disappointment," Max Eastman, philosopher, psychologist and author, told an audience here recently.

"Laughter comes from the blocking of the playful impulses, even as distress comes from the blocking of the more serious impulses," he said. "In adult life we find it easier to take playfully the disappointments of others because our play instinct does not have the development it once had."

"The joke with a point is a bubble burst, leaving one's expectations disappointed for a moment until brought to see some new and delightful substance which has taken the place of that originally expected."

"The great humorist is he who sees a coin in the dust and trips you suddenly so that you fall ingloriously, but in such a position as to find the coin."

## OH! OH!

Daintily she tripped Up the Pullman-car aisle; Self-assured was her walk, And conceited her smile. Her beauty was striking, And all of those there In the car turned around As she passed by to stare. And by this regard She was not at all daunted, For notice from others Was just what she wanted. In a moment, however, She came back the aisle; Disappeared was her calmness, And sickly was her smile. And flushed was her face, And hurried her way; Very faint was her bearing, And often she'd sway.

I'll tell you what happened Her poised thus to mar— Unthinking, she'd got— The wrong end of the car!

## Veteran's Style, Says Peele

Herbert Peele, editor of the Daily Advance of Elizabeth City, in an article printed in the issue of January 31, 1928, warmly praised the editor of THE TECHNICIAN for his splendid work in editorial writing.

The editorial of which Mr. Peele made particular mention was relative to the State legislators' appropriations for North Carolina institutions.

"The style of a veteran," says Editor Peele, "and rather neatly put, is that of a veteran's question, in the opinion of The Advance, and this newspaper hopes that Mr. Ayrdlett's editorial experience will not end with his college course."

## NEW GRADING SYSTEM

Oberlin, Ohio.—(IP)—Oberlin College has followed the lead of those higher educational institutions which have abolished the six-letter grading system. Hereafter Oberlin students will either "pass" or "fail," and they'll never know whether it was a pass by a D or an A.

In an Ohio city, the board of health met recently to consider closing all public meetings because of the flu situation. A group of ministers appeared to protest the order because it would interrupt a Billy Sunday campaign scheduled to begin the next day. The health officials listened patiently for a time, and then arose:

"Gentlemen," he said, "we sympathize with you, but it is just too bad the two epidemics had to arrive at the same time."

Twenty-five thousand people were killed by automobiles in the United States in 1928. And yet, if we remember correctly, it was Henry Ford who in 1916 headed a delegation which started across the Atlantic to put an end to the awful European slaughter.

Detroit has decided to give a ten-dollar gold piece to each policeman for every bandit he kills. This is commendable, but it would be much cheaper to follow Chicago's example and let the yeggs kill each other.

A New York Sunday paper makes much ado about a newsboy who became a radio chief. It is our opinion that most radio men would make better newsboys—judging from what we hear over our radio.

"Modern dietetics," says a prominent physician, rushing into print, "are responsible for most of man's stomach troubles." And here all along we had supposed it was the kind of things we eat.

Rip Van Winkle tottered home after his 20-year absence: "Well, my dear, did you finally get registered for the courses you want?" asked his wife.

And now some one has written the life of Boswell. We didn't know any one followed him around with a pad and pencil.

"As impressive as the religious advertisements in a tabloid newspaper," says B. M. Bigelow, by way of inventing a simile.

Yes; or as a Bible in a college dorm.

I can't give you anything but love, says the popular song.

I can't give you anything but one night a month, say the freshmen at Meredith.

"Will you join me in a bowl of soup?"

"Do you think there's room for both of us?"

Old man (introducing his daughter): Do you know my daughter, May?

Student: Thanks for the tip.

"Do you know the subject of the first slow motion picture?"

"No."

"Two Scotchmen reaching for a soda check."

Cado: "Don't football players ever have their suits washed?"

Ditty: "What do you think the scrub team is for?"

She: "Now, what are you stopping for?"

He (as car comes to halt): "I've lost my bearings."

She: "Well, at least you are original. Most fellows run out of gas."

Bizz: I heard you talking to yourself while you were bathing. That is a bad custom.

Toots: I wasn't talking to myself. I was talking to the soap. I slipped on it and fell.

Coed: Jack, are you sure that it's me you love and not my clothes?

Jack: Test me, darling.

Pat: "How would you like to be buried in a Jewish cemetery?"

Mike: "I'd die first!"

Passenger: Vat time does de train leave, you say?

Agent: 1:50.

Passenger: Make id 1:49 and I take it?

Chorus Girl: How did you find your new Harvard friend?

Second Glorified Girl: I just unbuttoned his coon-skin coat and there he was.

Willie: "Did Edison make the first talking machine, dad?"

Dad: "No, son; God made the first one, but Edison made the first one that could be shut off."

"You've heard the sheep song."

"What is it?"

"Wool You be Mine?"

"No, no. All I Want Is Ewe."

## Broadcasting of College News Now Undertaken by Sixty-Three Institutions

Radio is rapidly gaining recognition in the colleges, both as a medium for broadcasting college activities and as a course of study for those who wish to make it their life work. Many of the larger stations are employing only college men in the capacity of announcer or director—men who have had microphone experience.

There are now sixty-three college radio stations in the United States. This is particularly remarkable, since it must be remembered that radio as a college institution is comparatively new. The colleges broadcast lectures, educational talks, talent recruited from the student body, etc. Some of the schools have large and beautiful studios with a staff of artists equal to any commercial station.

Collegiate News Flashes are released to the college radio stations Saturday of each week, and are broadcast not later than Wednesday of the next week.

He: I'm going to buy myself a harem.

It: What do you mean? You can't buy a harem, can you?

He: Sure. I saw a sign at a gas station that said "Six Gals for a dollar."

At first the world was flat. Then some one discovered that it was round. Now it is crooked.

## LEARN THE PIANO IN TEN LESSONS

### Tenor-Banjo or Mandolin in Five Lessons

Without nerve-racking, heart-breaking scales and exercises. You are taught to play by note in regular professional chord style. In your very first lesson you will be able to play a popular number by note.

## SEND FOR IT ON APPROVAL

The "Hallmark Self-Instructor" is the title of this method. Eight years were required to perfect this great work. The entire course, with the necessary examination sheets, is bound in one volume. The first lesson is unsealed, which the student may examine and be his own "JUDGE and JURY." The later part of the "Hallmark Self-Instructor" is sealed. Upon the student returning any copy of the "Hallmark Self-Instructor" with the seal unbroken, we will refund in full all money paid.

This amazing Self-Instructor will be sent anywhere. You do not need to send any money. When you receive this new method of teaching music, deposit with the postman the sum of ten dollars. If you are not entirely satisfied, the money paid will be returned in full upon written request. The publishers are anxious to place this "Self-Instructor" in the hands of music lovers all over the country, and is in a position to make an attractive proposition to agents. Send for your copy today. Address The "Hallmark Self-Instructor," Station G, Postoffice Box 111, New York, N. Y.

### Sigma Pi Dance.

Sigma Pi Fraternity will celebrate the anniversary of the founding of the fraternity at their annual ball in the Frank Thompson Gymnasium to-night.

### Pi Kappa Phi Tea Dance.

Pi Kappa Phi Fraternity will entertain at a tea dance this afternoon from 4:30 to 7 at their home on Hillsboro street.

### Saints Club Dance.

The Saints Club, a junior class order, gave their annual dance last evening from 9 to 12 in the Frank Thompson Gymnasium. The gymnasium was decorated in elaborate color streamers.

A number of visitors were present at the dance, which was one of the most enjoyable dances of the year.

### K. A. Moves In House.

Kappa Alpha fraternity is now located at 2612 Clark Avenue in Fairmont after moving in their attractive new home on February 10.

### Phi Kappa Tau Pledge Dance.

Pledges of the Phi Kappa Tau fraternity honored their future brothers at a dance last Tuesday evening at their home on Groveland street.

The house was attractively decorated in streamers of the fraternity colors. Amplifiers that were connected to the victrola were in each room so that the music could be enjoyed by all. Punch and cakes were served during the evening.

Fraternity members of the college and the social set of Raleigh attended the dance. The following girls attended: Misses Carolipe Tucker, Letitia Mason, Susanne Tucker, Arabella McGill, Elsie Mason Underwood, Mary Helen Keller, Ethel Rowland, Anne Elizabeth Houston, Sheldon Shaw, Anne Vaughn, Sarah Busbee, Billie Freeman, Elizabeth Marsh, Sophie Walker of Baltimore, Elizabeth Glidewell of Reidsville, Louise White.

Mrs. J. N. Mason, Dean Cloyd, and Dean Nelson chaperoned the dance.

### Kappa Sigma Entertains.

Kappa Sigma fraternity entertained at an informal dance Thursday evening at their home on Enterprise street.

Pledges entertained the members of the fraternity at a banquet at the Meremont Tea Shoppe Friday preceding the Saints' Dance.

The following girls attended the dance: Misses Anne Vaughn, Celia Wearn, Dorothy Furr, Melissa Browne, Davetta Levine, Margaret and Madie Hughes, Della Foley, Annie Laurie and Elsie Mason Underwood, Eula Beth Warner, Sarah Busbee, Billie Freeman, Elizabeth Marsh and Mary Lou Coffey.

The chaperones were Mrs. O. R. Browne, Mrs. J. N. Mason, Mrs. Geo. Marsh, and Mrs. Tal Stafford.

### J. E. LASSITER AND WILLIAM P. FISHER TRYING FOR AIRPLANE

J. E. Lassiter and William P. Fisher, students of North Carolina State College, are attempting to win a four-year university scholarship in aeronautics, or Eaglerock airplane, offered this spring by the Alexander Aircraft Company to the American undergraduate who reveals the deepest insight and practical imagination in aeronautics.

A remarkably close understanding of the new industry characterizes papers submitted by students of 183 colleges and universities. Several novel sales ideas are being used to advantage by the Alexander Aircraft Company. The response indicates that thousands of undergraduates seriously consider the new aircraft industry as their intended vocation.

As an added incentive, 17 Eagle-rocket distributors will award free 10-hour flying courses, with approximately \$300, to the college students in their respective territories who make the best efforts to win the awards. Flight instruction manuals will be given other students who place high. The competition closes May 1.

The Alexander Aircraft Company is conducting the contest as a means of interesting more young men and women in flying and in the aero industry as a field of future activity. Within the last year commercial aircraft factories have virtually scrambled for the services of college trained aeronautical engineers and aeronautical executives. The shortage has forced a number of new companies to import engineers from Germany and England.

### Your Attention is Called to These ANNOUNCEMENTS

#### Alpha Phi Gamma

will meet at 7 p. m. Tuesday evening in the library. All members please be present.

#### Red Masquers

will meet today at 12 o'clock. All interested in the new production are invited to be present.

#### April Fool Technician

copy may be turned in at the office at any time. Anyone having a friend not minding being made the subject of a humorous story is asked to take a shot at the project. The more foolish the material the more acceptable it will be to the staff. Try your hand.

### WOMAN TELLS MEN OF THEIR PLACE IN HOME AT AG. CLUB MEETING

Mrs. Jane S. McKimmon, head of home demonstration work in North Carolina, spoke to the Agricultural Club Tuesday evening on the subject, "Man's Place in the Home."

"You are the future fathers," Mrs. McKimmon said, "and should know some things that will lessen the failures now common to marriages."

Last year she told of the physical aspects of a man's place in the home, as for instance furnishing the income. This time Mrs. McKimmon showed how man and wife should agree on certain rules of behavior for the children in their home, and then both should see that they were followed.

A child sees quickly a breach between father and mother, and is very quick to take advantage of it.

The rule in the home should be such that the conduct of one would not interfere with that of the other. Mrs. McKimmon compared a large family with a law-making body, where rules are made by arguments between the members.

The rest of the program consisted of a talk by A. D. Stuart on "A History of Cotton," followed by a song by the club quartet. After this refreshments—ice cream and cakes—were served.

### AERONAUTICAL SOCIETY FORMED THURSDAY, FEB. 14, ON COLLEGE CAMPUS

Seventy-eight men answered the call last Thursday, at 7:30, in Page Hall, when the first meeting of those students interested in aviation was held. Professor W. B. Cobb, chairman pro tem, was the originator of the idea of organizing an aeronautical club at State College. He thought over the proposition during the Christmas holidays, and this meeting was the first step in the actual program he decided upon. He stressed the cooperation that was needed from each member if the club was to be a success and showed the necessity for keeping up enthusiasm.

Detailed plans have been made for securing an option in aeronautical engineering in 1930. The faculty has worked on it thoroughly, and this option has passed the departmental and engineering staff, and is now before the faculty council. This will be a definite part of the M.E. course if it passes the faculty council. There will be 18 hours of aeronautics taken the place of the same time in the study of power plants, heat and ventilation, and refrigeration, if the student so desires. The degree will be similar to the option of construction highway engineering in C.E. The degree will be the B.S. in M.E., aeronautical option.

This is being placed in the college course because without it State College would lose many students that would otherwise come here. The staff thinks that this club or society should be organized for the good of the school.

The purpose of the club is to learn what is going on outside in this particular field, and the latest developments in aviation. Information has already been read in this first meeting that was of value to the men present. The data came from various companies that manufacture aeroplane parts. The society may take up flying as part of its course.

An election of officers was held in the following men were placed in office: President, H. M. Wright; vice-president, G. L. Johnson; secretary, Robert Shelor.

Following this there was a short speech by H. B. Small, in which he pointed out the needs of perseverance if interest in aviation was to be promoted and acquaintance with aeronautics increased. It was also stated that the library was getting as many books on aviation as was possible.

H. B. Poindexter, speaker of the evening and owner of the local flying field, was introduced by Mr. Cobb. Mr. Poindexter pointed out that almost all of the aeronautical engineers came from such schools as this. He also said that a flying school may come to Raleigh at a later date, after which he gave a short history of the teaching of aviation as given at Kelly Field, and said that actual flying was only a small part of aviation.

### VIRGINIA MEDIC SCHOOL RECEIVES GRANT FROM CHEMICAL FOUNDATION

The Medical College of Virginia has received a grant from the Chemical Foundation, Inc., of New York City which will give to the institution for a three-year period a full-time expert for research in chemistry as related to medicine, surgery, and dentistry. It has been announced by Dr. W. T. Sanger, president of the college. Certain apparatus will also be made available through the grant.

A year ago, it is said, the departments of chemistry and medicine began a cooperative plan of investigation which early attracted the interest of The Chemical Foundation. Its representative, in visiting Richmond recently, complimented in highest terms the effective plan of cooperation developed at the Medical College of Virginia. The foundation has indicated an enthusiastic willingness to cooperate in every possible way to make this type of research increasingly effective.

Plans for enlarging the research laboratory have already been taken under advisement at the college, and very shortly the quarters will be available for the use of the individuals cooperating.

### AGE OF FISH KNOWN BY MEANS OF RINGS FOUND ON SCALES

Seattle, Wash.—(IP and U. of Wash. Daily)—Magnify one fish scale 65 times, count the summer and winter rings, and presto a scientist can tell you the age of a fish.

So at least is the theory advanced by L. P. Schultz, of the University of Washington college of fisheries, who, in two years, expects to disclose research results of great value to the commercial salmon industry and the conservation of fish resources.

Schultz has collected and enlarged 3,500 scales. The rate of growth, injuries, and, in some cases, the time of spawning can be determined from the scales, he declares.

The one fortunate thing about the passage of the naval cruiser bill is that it was gotten out of the way before the next naval disarmament conference started. It might have been embarrassing to have the two happen at once.

### RED MASQUERS PLAN TO PRESENT FIRST PLAY; TRYOUTS HELD TODAY

The Red Masquers, local dramatic club, has chosen the well-known play R. U. R. as its first production. Active work on it will begin at once. Copies of the play have been ordered and should be in the hands of the directors, Professors Cunningham and Oberholzer, before the meeting today at 12 o'clock. A date for the tryouts will be selected at this time.

At the meeting of the club last Tuesday night enthusiasm for the play ran high after a synopsis of it was given by Professor Cunningham. The novelty of this unusual play made an instant hit with the members of the club, and they unanimously voted to make it their first production. As both Professor Cunningham and Professor Oberholzer have seen the play as produced by professional companies, they are amply qualified to coach and direct it.

The Red Masquers will welcome new members and visitors at its meeting today at 12 o'clock. The tryouts have not yet been held, so they will be glad to welcome any interested person, whether or not they have had experience in dramatics.

### STATE COLLEGE BAND TO BROADCAST FROM LOCAL STATION THURSDAY, 6:30

The State College band made its first test at noon Thursday, preparatory to broadcasting musical programs for half an hour each Thursday evening at 6:30.

The College is not sponsoring this movement, but it is being done through Major Price's efforts in the interest of the school and members of the band.

This part of the State College radio program will be separate from the regular program which will be broadcast every Monday evening from WPTF, the local station.

The band has prepared a studio in the gymnasium and will relay the program to the station uptown for broadcasting.

This is another proof that the State College band is steadily going forward, as are all other organizations of the College. Those people of the State who have had the privilege of hearing the band at the many football and basketball games held here will be more than pleased to have a chance to hear them again.

### OFFICERS FOR NEXT YEAR TO BE NOMINATED BY FRIENDSHIP COUNCIL

At the regular meeting of the Friendship Council tomorrow at 1:30 in the Y. M. C. A., men will be proposed for officers of this year's council.

Each member of the council will have the opportunity to suggest any man for office. Officers to be selected include president, vice-president, secretary, treasurer, reporter, and group leaders.

Those at the regular meeting a week from Sunday the men for these offices will be chosen by popular vote from the men proposed as candidates.

### NEW JERSEY SCHOOL WILL MAKE HEADLINER STATE COLLEGE DEBATE

Word has just been received from officials in charge of intercollegiate debating at Rutgers University (the State University of New Jersey) that their debate with N. C. State will be made the high spot in their competition for the year.

The contest will be held in Millburn, New Jersey, on the night of Thursday, March 28. It is practically certain that there will be an audience of over six hundred for the contest, because of certain efforts that are being made to play up the contest by both city and university officials. Mr. William Barr, who last year was a member of the debating team from Rutgers which visited Raleigh, is now a member of the faculty of the Millburn High School, and he is using his best efforts to make arrangements for the contest that will be satisfactory in every way.

The entire Rutgers debate squad will attend the contest in a body, and this squad numbers 136. The squad alone will constitute an audience considerably above the average in numbers for an intercollegiate contest. Professor Richard C. Reager, head of the speaking work at Rutgers, is giving special attention to preparation for the North Carolina State debate, and will personally supervise the contest himself.

The proposition to be debated is: "Resolved, That a committee of three judges be substituted for the jury in every trial." North Carolina State will uphold the affirmative, and Rutgers the negative. The State College team that will meet the north-erners has not yet been selected, and its personnel will not be known until after a special tryout to be held on March 8.

Rutgers University has a schedule of debates for the year which includes 33 contests, and 96 different speakers will be used on these debates.

In number of debates and speakers actually appearing on the platform, the State University of New Jersey tops the list of American colleges and universities.

### Pollock and Worth Are Given Positions With Milwaukee Organization

Following announcement that a large eastern electrical goods manufacturing corporation had offered positions to 13 graduates of North Carolina State College, a Milwaukee, Wis., company has just offered positions to two more seniors, and they will report to their new duties about July 15.

The two graduates, specializing in mechanical engineering, are William M. Pollock of Warsaw and Edgar W. Worth of Raleigh.

It is interesting to note, says Professor John M. Foster, that the same corporation employing these men is desirous of taking but 35 graduates from 11 schools all over the country this year. Georgia Tech furnished four, Tulane one, and the others will come from Minnesota and Purdue.

## THE QUEST FOR THE BEST CIGARETTE

LIFE, liberty, and the pursuit of the finest in cigarettes. And hope springs eternal. . . . Our quotations may be a little mixed—but as far as this "quest for the best" business is concerned, Camels are the end of the trail, and the realization of hope. We'll bet life, liberty or what-have-you on that.
