

OAK RIDGE NATIONAL LABORATORY
OPERATED BY
CARBIDE AND CARBON CHEMICALS COMPANY
A DIVISION OF UNION CARBIDE AND CARBON CORPORATION

POST OFFICE BOX P
OAK RIDGE, TENN.
October 12, 1954

Chancellor John W. Harrelson
North Carolina State College
Raleigh, North Carolina

Dear Chancellor Harrelson:

We were pleased to have had, as Research Participants, Dr. Charles W. Jennings of your Chemistry Department and Mr. Willis E. Moody, Jr., of your Ceramic Engineering Department with our Materials Chemistry and Metallurgy Divisions, respectively, during the past summer.

This type of temporary appointment, which is arranged through the cooperation of educational institutions, the Oak Ridge Institute of Nuclear Studies and the Oak Ridge National Laboratory, is designed to enrich the experience of faculty members in the field of nuclear research to the ultimate benefit of their home institutions. At the same time, the work of the Laboratory is advanced by the application of the additional scientific talent to its programs. We are gratified to have had 57 faculty members from 35 institutions as Participants this last year.

The cooperative spirit displayed by Dr. Jennings and Mr. Moody and the effectiveness of their work is greatly appreciated. We sincerely hope that their experience here will be reflected in their teaching and research and will give them additional enthusiasm for all aspects of the important work of the teaching profession. We shall be pleased if others of your faculty will apply for consideration for the appointments which will be available for the summer of 1955.

Very truly yours,

OAK RIDGE NATIONAL LABORATORY

C. E. Larson
Director

CEL/RWJ/js

R. W. Johnson
G. H. Clewett
J. H. Frye, Jr.

Chancellor Boston:

This letter was
acknowledged in a last written note. I
informed Director Larson that the
letter should have gone to you.
