Worsham, A. D., Jr., Professor, Crop Science Department

PURPOSE OF THIS SCHOOL

To review research data, recommendations and problems in the field of pesticides and application equipment with manufacturers, formulators, dealers, salesmen, professional agricultural workers and farm managers.

REGISTRATION

Registration will be held in the lobby of the McKimmon Center on the N. C. State Campus, Tuesday, January 10 from 8:15 to 9:30 a.m. The registration fee is $15.00 per person – to include a copy of the manual and Tuesday’s lunch. Pre-registration is required to assist the University in making plans for the meeting.

AGRICULTURAL CHEMICALS MANUAL

Printed in connection with the school and furnished to each registrant is a copy of the North Carolina Agricultural Chemicals Manual. This manual includes recommendations on the control of insects, weeds, plant diseases, rodents, and a section on application equipment. Additional copies will be available at $3.00 per copy.

ROOM RESERVATIONS

Rooms should be available for conference participants at the following motels provided reservations are made prior to December 25:

- Mission Valley Inn — 919-828-3173
- Hilton Inn — 919-828-3091
- Hilton Inn — 919-828-0811
- Velvet Cloak Inn — 919-828-0333
- Ramada Inn-South — 919-362-8621

Restrictions:
- Free shuttle provided from the Apex location for 15 or more persons
- Identification required

PARKING

Adequate parking will be available at the McKimmon Center for all participants. The Center is located just off Western Boulevard (U.S. 64 Business) at the intersection with Gorman Street.

JANUARY 10 - 11, 1978

JANE S. MCKIMMON CENTER
FOR EXTENSION AND CONTINUING EDUCATION

NORTH CAROLINA STATE UNIVERSITY

RALEIGH, NORTH CAROLINA

Sponsored by School of Agriculture and Life Sciences and The Division of Continuing Education.
PROGRAM 1978 NCSU AGRICULTURAL CHEMICALS SCHOOL

PESTS: Recognition, Assessment and Control

MONDAY AFTERNOON — JANUARY 9, 1978
Annual Meeting of Pesticide Association of North Carolina
2:00 — Topics of Current Interest
2:30 p.m. — RECESS
3:30 p.m. — Reports of Organizations and Committees
4:15 p.m. — Presidential Address — Chip Medlin, President, Pesticide Association of North Carolina
4:40 p.m. — Election of Officers
5:00 — Social Hour — sponsored and conducted by the Pesticide Association of North Carolina
6:00 p.m. — CONCURRENT SESSIONS
Area I: Tobacco Pests: Diseases, Insects, Weeds, Suckers
A. F. A. Todd, W. S. Misric, and W. K. Collins
Area III: Feed Grain and Soybean Pests
W. M. Lewis, H. E. Duncan, and J. W. Van Duyne
Area VI: Vegetable Pests: Diseases, Insects, and Weeds
C. W. Averre, A. A. Sorensen, and W. A. Skroch
12:15 p.m. — Lunch: Area II, McKimmon Center (Included in Registration Fee)

TUESDAY MORNING — JANUARY 10, 1978
8:15 a.m. — Registration — Lobby Jane S. McKimmon Center
Presiding: T. Carlton Baylock, Associate Director, North Carolina Agricultural Extension Service
9:30 a.m. — Welcome — J. E. Legates, Dean, School of Agriculture and Life Sciences, North Carolina State University
“The College of the People” — A Multi-Media Presentation:
E. W. Glassner, Assoc. Dean and Director of Academic Affairs
K. R. Keller, Assoc. Dean and Director of Research
G. Hyatt, Assoc. Dean and Director of Extension
10:10 a.m. — NCSU’s Involvement in PIAT, ACAC, IR-4, RPAR, Sec. 1B and 24C — T. J. Sheets, Director, NCSU Pesticide Residue Laboratory
10:40 a.m. — RECESS

TUESDAY AFTERNOON — JANUARY 10, 1978
1:00 — Chemical Manual Pick-up
3:00 p.m. — FIELD CROPS
Presiding: G. L. Jones, Specialist in Charge, Crop Science
1:30 p.m. — Broadleaf Signalgrass - Status Report — W. M. Lewis
1:45 p.m. — Postemergence Soybean Herbicides - After Three Years — L. Thompson, Jr.
2:00 p.m. — Corn Earworm or Armyworms in Soybeans? — T. N. Hunt
2:15 p.m. — Screening Nematicides and Fumigants on Corn — H. E. Duncan
2:30 p.m. — Effect of Soil pH on Efficacy of Nematicides — D. P. Schmitt
2:45 p.m. — Chemical Ripening Agent on Tobacco — W. F. Congleton
3:00 p.m. — RECESS

WEDNESDAY MORNING — JANUARY 11, 1978
HORTICULTURAL CROPS
Presiding: A. A. Banadarya, Specialist in Charge, Horticulture
8:30 a.m. — Pesticide Education — It Works — J. H. Wilson
8:45 a.m. — Control of the Spruce Spider Mite on Fraser Fir Christmas Trees — W. A. Nettleton
9:00 a.m. — Ethephon as a Ripening Aid for Fruit and Vegetables — D. C. Sanders, C. R. Unrath, C. M. Mainland
9:15 a.m. — Herbicide Injury Symptoms — W. A. Skroch
9:30 a.m. — Herbicide Update in Horticultural Crops — T. J. Monaco and W. A. Skroch
9:45 a.m. — RECESS
Presiding: G. T. Weekman, Specialist in Charge, Entomology
10:00 a.m. — Fumigants and Variedes for Control of Verticillium Wilt of Tomato — P. B. Showemaker and T. R. Kond-M
10:15 a.m. — Recent Research on Vegetable Insect Pests — G. G. Kennedy
10:30 a.m. — Latest Recommendations for Fruit and Vegetable Insects — A. A. Sorensen
10:45 a.m. — Discussion and Program Evaluation
11:00 a.m. — ADJOURN

MEMORANDUM TO: Program Committee for Agricultural Chemicals School

A. A. Sorenson, Entomology, Chairman
J. V. Baird, Soil Science
W. A. Schroch, Horticultural Science
H. D. Coble, Crop Science
J. W. Glover, Biological & Agr. Engineering
O. T. Sanders, Zoology

SUBJECT: Committee Appointments for 1977-78

Upon the recommendation of your respective department heads, we are requesting that each of you serve on the Program Committee for our annual Agricultural Chemicals School. The Agricultural Chemicals School is a key feature of our educational effort to foster responsible use of agricultural chemicals. Thanks for your willingness to serve our School in this important endeavor.

Traditionally the chairmanship of this Committee has rotated among the departments of Entomology, Soil Science, Horticultural Science, Crop Science and Plant Pathology. Entomology is responsible for providing the chairman for 1977-78. In subsequent years we shall assign this responsibility to the next department in the above sequence.

J. M. Legates, Dean

*This memorandum should replace memorandum dated April 26, 1977.
MEMO TO: Agricultural Chemicals School Program Committee  
FROM: K. A. Sorensen, Chairman

SUBJECT: Preliminary Meeting

A preliminary meeting of our committee and interested persons is to be held on July 1, 1977, at 1:30 p.m. in the Plant Pathology Conference Room (2515 Gardner Hall).

Agenda

1. Report by last year's chairman - Dr. Ron Jones
2. Review of last year's program
3. 30th Annual Agricultural Chemicals School, Jan. 9, 10 & 11, 1978, at Jane S. McKimmon Extension Education Center
4. Program Content
   a. Theme:
   b. Pesticide Association Annual Meeting:
   c. Keynote Speaker:
   d. Administration: "The College of the People"
   e. Grain, Soybeans and Tobacco:
   f. Horticultural Crops:
   g. Peanuts, Cotton and Animals
5. Catered Luncheon - Tuesday
6. Handouts:
8. Time Schedule:
   - Call for papers - August 15
   - Final plans - September 2
   - Program deadline - October 14
   - Distribute programs - January 3
   - Evaluation - January 13
9. Other Items

Please come prepared to contribute. This is a most important meeting.

July 26, 1977

TO: Agricultural Chemicals School Program Committee

FROM: K. A. Sorensen, Chairman

SUBJECT: Minutes of July 1 Meeting and Call for Reports

At our initial July 1 meeting, several points were agreed upon:

1) The 30th Annual N. C. Agricultural Chemicals School is to be held on January 9, 10, and 11, 1978, at the Jane S. McKimmon Extension Education Center.

2) The theme for the 1978 N. C. Agricultural Chemicals School would be:
   Pests: Their Recognition, Assessment and Control.

3) The Pesticide Association would hold its annual meeting on January 9.

4) SALS administration would present the excellent visual, "The College of the People."

5) Registration fee would approach $15 and include a folder, handouts, copy of the N. C. Agricultural Chemicals Manual and a luncheon ticket (Tuesday noon).

6) Departmental handouts consisting of data tables, etc., are encouraged. These should not exceed one page (front and back). Five hundred fifty copies (no staples) must be in Denis Jackson's office by January 4. Please use the following color code: Entomology - white; Plant Pathology - blue; Horticulture - green; Crop Science - yellow.

7) The committee urges that each speaker consider his audience and the large meeting room in preparing visuals. Adequate projection equipment of 2 x 2 slides will be available. As suggested by earlier committees, to assure good visuals, it would be helpful if a practice session was held in each department.

8) Each speaker will have 10-15 minutes and should keep the general theme in mind, and in one's presentation stress pest recognition, assessment and suggested control. Refer to the N. C. Agricultural Chemicals Manual. Special care should be needed in flagging nonregistered pesticides from standard materials.

9) Concurrent sessions (3 rooms are reserved) on vegetables, tobacco, and field crops will be held Tuesday morning. These sessions of 1.5 hours will emphasize a coordinated effort on pest recognition, assessment and pesticide interactions.
10) The following educational displays in the lobby are planned: NCDA Soil Testing, Tissue Analysis, and Nematode Advisory Service, Plant Disease and Insect Clinic, Publications on Pest Recognition, Assessment and Pesticide Interactions, Pesticide Licensing, and Pesticide Association.

11) Time schedule:

Report titles and authors submitted at September 2 committee meeting
Finalize plans on program content - September 2
Program submitted for printing - October 7
Handouts received by Continuing Education - January 4
Programs and a copy of the N. C. Agricultural Chemicals Manual distributed to speakers - January 4
School held - January 9, 10, and 11, 1978
School evaluation - January 13

cct J. E. Legates, T. C. Blalock, K. L. Knight, Fred Cochran, Robert Aycock, Billy E. Caldwell, G. T. Weekman, John Wilson, Denis Jackson, Walton S. Dennis

P.S. Next committee meeting will be held September 2, 1978, at 1:30 p.m. in the Plant Pathology Conference Room (2515 Gardner Hall).
MEMO TO: Drs. Krenzer, Dunphy, Collins and Wilson

FROM: K. A. Sorensen, Program Chairman, N. C. Agricultural Chemicals School

SUBJECT: Concurrent Session on Recognition and Assessment of Disorders

In developing the program for the 1978 N.C.S.U. Agricultural Chemicals School (January 9, 10, 11, 1978), our committee has centered on an overall theme of PESTS: Their Recognition, Assessment and Control. We also wish to have a concurrent session: one for vegetable crops, one for field crops and one for tobacco. As chairmen of extension coordinating committees, we would like you to coordinate a one-hour session with 30 minutes for discussion on Tuesday morning. During this one-hour session, one, two, or three people might introduce the topic and provide an overview.

This could be followed with a slide presentation perhaps illustrating some common problems encountered and the tools of detection and assessment utilized. Certainly insects, diseases, weeds, nutrition, natural and man-influenced agents should be integrated. This presentation by one person or by a panel could then be followed with a general discussion. Of course, key people should be in attendance to help respond to any question raised.

I would like your intentions before September 1. However, in order to be included in the printed program, final plans for respective presentations and personnel involved would be needed before October 7.

I look forward to working with you in this educational endeavor. If things need clarification, please feel free to contact me.

cc Dr. T. C. Blalock
MEMORANDUM TO: Directors and Department Heads

SUBJECT: Agricultural Chemicals Manuals

It has come to my attention that the cost of the Agricultural Chemicals Manuals provided for departmental use has been covered in the registration fee for the Agricultural Chemicals School. I am not aware of the origin of this practice, but it does not appear appropriate that this cost should be borne by the registrants.

This year the registration fee for this School will not cover the cost of the Agricultural Chemicals Manuals used by our School. Departments will have to arrange to pay for such manuals as are needed from funds allocated to them.

Manuals will be available in two forms this year, the conventional bound copy and a loose leaf copy. Please notify Mr. A. Maynard Deekens, 318 Ricks Hall, of the number of each (bound or loose-leaf) you desire to order by November 5, 1977.

J. E. Legates, Dean

REMINDER

TO: Agricultural Chemicals School Program Committee

FROM: K. A. Sorensen, Chairman

SUBJECT: Finalize Program

Our committee and other interested people will meet on September 2, 1977, at 1:30 p.m. in the Plant Pathology Conference Room (2515 Gardner Hall).

Agenda

1. Theme
2. Pesticide Association Program
3. SALS Administration: "The College of the People"
4. Registration fee, luncheon, rooms and equipment
5. Departmental handouts
6. Educational displays
7. Concurrent sessions
8. Report titles and authors
9. Time schedule
10. Next meeting

Please come prepared with report titles and authors entered on separate 3x5 cards.

Mr. K. A. Sorensen, Chairman  
Agricultural Chemicals School Program Committee  
N. C. State University  
Box 5215  
Raleigh, N.C. 27607  

Dear Ken:

I have tried to reach you several times and find you folks telephone is a busy little bee.

Larry M. Land of Coastal Chemical Company, Box 856, Greenville, N. C. 27834 is the Chairman of our 1978 Annual Meeting Program. He will contact you as soon as the program is finalized so that it can be listed in the school program as it was last year. Let Larry know your deadline on printing the program.

As in 1977 our Annual Meeting will be held the afternoon before the opening of the Chemical School. We will have the usual social hour at the end of the Annual Meeting.

We would like a table for the Association set up in the lobby of McKimmon Center lobby and a room reserved for our meeting.

I regret that neither Larry or I could be with you for your meeting September 2nd. Call me if you need additional details.

Yours very truly,

Welton S. Dennis  
EXECUTIVE SECRETARY-TREASURER

MEMO TO: F. A. Todd, Walter Mistric, W. K. Collins, Bill Lewis, Harry Duncan, John Van Duyn, C. W. Averre and Walt Skroch

FROM: K. A. Sorensen, Program Chairman, N. C. Agricultural Chemicals School

SUBJECT: Concurrent Session on Pest Recognition, Assessment and Management

In developing the program for the 1978 N.C.S.U. Agricultural Chemicals School (January 9, 10, 11, 1978), our committee has decided to offer a concurrent session: one for vegetable crops, one for field crops, and one for tobacco. This session will begin at 10:50 a.m. and end at 12:15 p.m. on Tuesday, January 10. One hour should be structured and perhaps contain slide presentations illustrating common pest problems, tools of detection, methods of assessment and methods of control. This could be followed with a panel discussion and an opportunity for audience participation.

Having been selected from your respective extension coordinating committees, I would like for Bill Collins on tobacco, Bill Lewis on feed grain and soybeans, and Charles Averre on vegetables, to convene a meeting of coworkers and conduct a program for this concurrent session.

I look forward to working with you in this educational endeavor. If questions arise, please feel free to contact me.

Mr. Harry H. Ethridge
145-G McKinnon
NCSU Campus

Dear Mr. Ethridge:

Enclosed are some markup copies of the material forwarded to me in August.

Our program committee has finalized plans for the 1978 School (30th Annual). We have an outstanding multi-media presentation, a nationally known scientist (NCSU faculty member), concurrent sessions on tobacco, feed grains and soybeans and vegetables, educational displays and some 20 reports by NCSU faculty members.

Please use the enclosed in your publicity efforts for next year's school. We are most appreciative for your efforts and look forward to working with you and Tom Byrd in making this school a success.

Sincerely,

K. A. Sorensen
Extension Entomologist

KAS: cs

Enclosures

Cc: Tom Byrd
RALEIGH - The 1978 Agricultural Chemicals School sponsored by North Carolina State University has been set for January 9-11 with the theme of the meeting entitled "Pests: Recognition, Assessment and Control."

The three-day school will be held in the new Jane S. McKimmon Center on the North Carolina State University campus and will also feature a meeting of the Pesticide Association of North Carolina.

The theme for the school is based on the fact that agricultural people need to recognize the problem pest, assess the economic impact and render a sound decision on control measures.

An excellent multi-media presentation entitled "The College of the People" will be followed by Dr. Thomas J. Sheets, Director, NCSU Pesticide Residue Lab. This nationally prominent scientist will address the school on "North Carolina State University's involvement in PIAT, ACAC, IR-4, RPAR, Sec. 18 and 24C."

Educational displays in the lobby will emphasize pest identification, assessment services and pesticide interactions. A concurrent session on tobacco pests, pests of feed grains and soybeans and vegetable pests will provide for an integrated overview of pest recognition, assessment and management.

Other speakers on the program are Dean J. E. Legates of the NCSU School of Agriculture and Life Sciences and T. Carlton Blalock, Associate Director, North Carolina Agricultural Extension Service.

A brochure and registration form covering the entire program is available by writing: Mr. Denis Jackson, Division of Continuing Education, P. O. Box 5125, Raleigh, N. C. 27607.
October 12, 1977

Mr. Denis S. Jackson
Continuing Education
147-F McKimmon
NCSU Campus

Dear Denis:

Enclosed is the program for the 1978 NCSU Agricultural Chemicals School. I have delayed forwarding it in hope that the Pesticide Association would have their segment firmed. Conversations indicate that they have a few topics in mind but no commitments to date.

Please go to print with the brochure as last year. I thought about listing displays, etc., and then figured that a simple announcement notice would suffice. We have several displays planned and these should prove educational. I trust our concurrent sessions will be effective. Some time at the end of the program has been designated for evaluation. We plan to pass out a questionnaire. The information obtained should help evaluate strengths and weaknesses and indicate future directions.

I look forward to receipt of program leaflets.

Sincerely,

Kenneth A. Sorensen
Extension Entomologist

MEMO TO: Mr. Tom Byrd
FROM: K. A. Sorensen
SUBJECT: North Carolina Agricultural Chemicals School

Enclosed is the program for the North Carolina Agricultural Chemicals School. Please incorporate in media coverage. It would be nice to have some publicity prior to and during the school.

Thanks for your attention to this.

MEMO TO: Bill Collins, Bill Lewis and Charles Averre

FROM: K. A. Sorensen, Program Chairman, N. C. Agricultural Chemicals School

SUBJECT: Concurrent Sessions on Pest Recognition, Assessment and Management

The 1978 North Carolina Agricultural Chemicals School is just around the New Year. Reference is made to the enclosed program with attention to the Concurrent Sessions on Tuesday morning, January 10, from 10:50 a.m. to 12:15 p.m. We have an excellent opportunity to integrate and present relevant pest technology.

I trust you have or soon will meet with your colleagues and make final plans for your session. So that those desiring a particular session will know what to expect and when, please construct a program outline with time elements. This program and appropriate handouts should be included in the brochure at the registration table. Please forward 550 copies (no staples) to Denis Jackson before January 4, 1978.

Denis Jackson
Continuing Education
147-F McKimmon
NCSU Campus

Respective areas should accommodate anticipated participants. Screens and slide projectors will be available in each area. Chalkboards, overhead projectors, and other visual aids should be requested through Denis Jackson. Table and seat arrangements are also at your discretion. You should plan to moderate the session and handle projection equipment, lights, etc.

In order to evaluate these sessions, I have prepared a questionnaire. We also plan to evaluate the other segments of the 1978 Agricultural Chemicals School. From these completed questionnaires, we hopefully will be able to identify strengths and weaknesses and continually improve our program efforts.

MEMO TO:  Drs. Krenzer, Dunphy, Collins and Wilson

FROM:  K. A. Sorensen, Program Chairman, N. C. Agricultural Chemicals School

SUBJECT: Concurrent Session on Recognition and Assessment of Disorders

In developing the program for the 1978 N.C.S.U. Agricultural Chemicals School (January 9, 10, 11, 1978), our committee has centered on an overall theme of PESTS: Their Recognition, Assessment and Control. We also wish to have a concurrent session: one for vegetable crops, one for field crops and one for tobacco. As chairmen of extension coordinating committees, we would like you to coordinate a one-hour session with 30 minutes for discussion on Tuesday morning. During this one-hour session, one, two, or three people might introduce the topic and provide an overview.

This could be followed with a slide presentation perhaps illustrating some common problems encountered and the tools of detection and assessment utilized. Certainly insects, diseases, weeds, nutrition, natural and man-influenced agents should be integrated. This presentation by one person or by a panel could then be followed with a general discussion. Of course, key people should be in attendance to help respond to any question raised.

I would like your intentions before September 1. However, in order to be included in the printed program, final plans for respective presentations and personnel involved would be needed before October 7.

I look forward to working with you in this educational endeavor. If things need clarification, please feel free to contact me.

K.

FROM:  K. A. Sorensen, Program Chairman, N. C. Agricultural Chemicals School

SUBJECT: Concurrent Session on Pest Recognition, Assessment and Management

In developing the program for the 1978 N.C.S.U. Agricultural Chemicals School (January 9, 10, 11, 1978), our committee has decided to offer a concurrent session: one for vegetable crops, one for field crops, and one for tobacco. This session will begin at 10:50 a.m. and end at 12:15 p.m. on Tuesday, January 10. One hour should be structured and perhaps contain slide presentations illustrating common pest problems, tools of detection, methods of assessment and methods of control. This could be followed with a panel discussion and an opportunity for audience participation.

Having been selected from your respective extension coordinating committees, I would like for Bill Collins on tobacco, Bill Lewis on feed grain and soybeans, and Charles Averre on vegetables, to convene a meeting of coworkers and conduct a program for this concurrent session.

I look forward to working with you in this educational endeavor. If questions arise, please feel free to contact me.

Agricultural Chemicals School--1978
PESTS: Recognition Assessment and Control

Area VI Vegetable Pests: Diseases, Insects, Weeds
January 9, 10:50-12:15 PM

Presiding: Charles M. Averre, Extension Plant Pathologist

A. Introductory Remarks (30 minutes)
   1. Insects Dr. Kenneth A. Sorensen
      Ag. Chemicals Manual, identification, principles of control, granular application equipment, publications.

   2. Weeds Dr. Walter A. Skroch
      Ag. Chemicals Manual, identification, application equipment, publications.

   3. Diseases Dr. Charles M. Averre
      Ag. Chemicals Manual, diagnoses, disease control, sprayers, nematicide applicators, publications.

B. Discussion of pest control by crop (audience choice) (40 min)
   (Panel: Sorensen, Skroch, Averre)
   cucumber        pepper
   sweetpotato     squash
   tomato          beans
   cob crops       potato

C. Evaluation (15 min)
MEMO TO: Program Participants

FROM: K. A. Sorensen, Chairman, Program Committee

SUBJECT: 30th Annual N. C. Agricultural Chemicals School

The recent and most successful N. C. Agricultural Chemicals School is history. The theme (Pests: Recognition, Assessment and Control), individual presentations, educational displays and concurrent sessions were well received. Program evaluation summaries for Tuesday, Wednesday and concurrent sessions are enclosed. Specific suggestions and improvements in future schools will be shared with next year's program committee when appropriate.

I wish to thank those who contributed to the success of this year's program. Special appreciation goes to those who organized the educational displays, those who conducted the concurrent sessions and those whose time and energies were directed toward this program's actuality. Thanks again for a job well done.
